Intro Property Assessed Clean Energy (PACE) Finance WebCourse.

December 1-2, 2015
12-5 p.m. (EST)

Property Assessed Clean Energy (PACE) is an emerging financing tool designed to catalyze energy efficiency improvements on industrial, commercial and residential structures. These programs help communities to reduce their energy use, lower energy costs and lessen environmental impacts. PACE uses special assessment districts to allow for the cost of energy efficiency improvements to be paid for over time through the property owner's tax payments.

The Intro Property Assessed Clean Energy (PACE) Finance WebCourse will explore the process of creating, operating and maintaining a community based PACE program. This two day course will feature a comprehensive overview of PACE including program design, capital markets analysis, investor attraction, legal and regulatory considerations, market potential, operations and much more. CDFA's Intro PACE Finance Course will put your community on the path to energy independence while creating jobs and improving the environment.
