Moody's Seminar: Financial Analysis of Local Governments

About This Seminar

This seminar provides an in-depth workshop on the financial statements seen in U.S. public finance. With real-world case studies, delegates will learn where to find information in an audit, what the line items mean, and key ratios and trend analysis used by Moody's analysts.

General Information

The $2.7 trillion public finance market has undergone unusual stress in the past year, as the weakened economy has impacted revenue streams securing public finance debt, the credit crisis has limited market access for some issuers, and the strength of most mono-line insurers has been diluted. As a result, investors have more reason than ever to keep abreast of their portfolios and analyze their holdings. This seminar is designed to provide attendees with the tools to analyze local government financial statements, with a focus on the unique accounting methods and credit concerns seen in public finance. The course makes use of real-world case studies and exercises to provide practical hands-on training.
