## **P3s Can Play an Important Role in Infrastructure Development: Black & Veatch**

Welcome to our latest installment in Black & Veatch's Insights series on the water industry. This week we examine the public-private partnership (P3) project delivery model. Key attributes of the model can be overlooked. In a P3, the private entity may provide the capital, but the true benefits go well beyond financing alone.

[Learn how public-private partnerships help infrastructure development and contribute to a safe and reliable water supply.](#)
