Seeing Green: Investing in Municipal Green Bonds to Support Local Climate Projects.

New York – Responsible investment vehicles seek to align investments with investors’ values through programs and projects that contribute to local communities in a positive way. Green municipal bonds offer investors the opportunity to support climate-aligned projects in such sectors as transportation, water and waste infrastructure, pollution control and renewable energy, which includes wind and solar power.

Green bond issuance

Green bonds are standard municipal bonds whose proceeds are used specifically to fund environmentally beneficial projects, as well as social and governance improvements.¹ These bonds can encompass not only climate-related issuers in public power, water and sewer, but also issuers in the education, health care and affordable housing sectors of the market.

Green-labeled issuance remains small. In 2017, there was \$12 billion of green bond issuance in the US municipal market, an increase of 85% over the \$6.5 billion of municipal green bond issuance in 2016.² Total par declined to \$4.9 billion in 2018 — a drop of 50% from 2017 and 33% less than was issued in 2016 — reflective of lower municipal issuance overall.
