- Somewhat interesting case concerning school impact fees [here](#).
- [Anti-ESG Politicians Cost Their States and Cities Billions.](#)
- [GFOA Accounting for Capital Assets: eBook Now Available](#)
- And Finally, That Train Has Sailed is brought to us this week by [Save Our Fairgrounds v. Metropolitan Government of Nashville and Davidson County](#), in which the Court of Appeals spoke slowly and used small words when explaining why Save Our Fairground's challenge to the development of a sports stadium was well and truly moot. "Demolition has been completed. The stadium has been built. Soccer matches have been played." Sure, but has \$50 been paid to park on some random lawn in the general vicinity? Has a \$16 beer been spilled down your pants? Has a soccer player died operatically on the pitch before experiencing a miraculous recovery? You want the moot?!! You can't handle the moot!!
