AWWA Report: Persistent, Growing Funding Gap to Test Customer Affordability.

A report released in March by the American Water Works Association (AWWA) finds that addressing U.S. drinking water infrastructure and other critical needs will require \$2.1 to \$2.4 trillion over the next 25 years.

The report is titled [*Beyond the Replacement Era: Balancing Compounding Infrastructure Needs with Household Affordability*](#). AWWA said it is the most comprehensive assessment to date of the investments needed to sustain safe, reliable drinking water service through 2050.

Developed in partnership with Raftelis and One Water Econ, the report concludes the persistent funding gap for water infrastructure will test the limits of affordability.
