

Orrick Advises New Hampshire on Historic First Bitcoin-backed Municipal Bond in U.S.

New Hampshire's Business Finance Authority has just approved the nation's first-ever municipal bond backed by Bitcoin, marking a historic milestone that opens the door for digital assets to enter the \$140 trillion global debt market.

Orrick is advising the BFA on the \$100 million conduit bond, whose issuance is still subject to Governor and Executive Council approval. If approved, it will allow borrowing against over-collateralized Bitcoin without exposing taxpayers or state funds to risk. Certain fees from the transaction and gains in the digital currency will be redirected into the Bitcoin Economic Development Fund and used to support entrepreneurship and business growth in New Hampshire.

Orrick was able to help our client innovate by combining 25 years of experience as the nation's no. 1 bond counsel (The Bond Buyer) with Chambers Band 1-ranked structured financing skills and a deep understanding of the crypto market.

OUR CLIENT

The New Hampshire Business Finance Authority is the state's business financing agency which was created in 1992 to foster economic development and create employment in New Hampshire. The BFA accomplishes these objectives by working with New Hampshire's banking, business, and economic development sectors to develop and implement programs that expand the availability of credit in the state.

THE IMPACT

This marks the first time cryptocurrency has been used as collateral in the U.S. municipal bond market and may open valuable new opportunities for municipalities and the businesses in their states to broaden their funding channels. This critical innovation could also bring investment opportunities to the state of New Hampshire, positioning them as a leader in digital finance.

THE TEAM

The team was led by Orion Mountainspring and included Elizabeth J. Elias, Tyler Dorf, Israel Lopez-Morillo, Lorraine McGowen, John Narducci, and James Larkin.

Willkie Represents JPMorgan in Largest Completed Municipal Bond Commodity Prepayment Transaction.

The firm represented the commodities business of JPMorgan Chase & Co. in the largest municipal bond commodity prepayment transaction ever completed. The transaction involved the issuance of

\$2.7 billion of municipal bonds by Southeast Energy Authority, a Cooperative District ("SEA"), the proceeds of which were used by SEA to prepay Pierpont Energy Prepay 2 for the delivery of natural gas over a 30-year period.

The transaction can be converted to a physical power transaction in the future. The gas delivered to SEA is sold to the Salt River Project Agricultural Improvement and Power District.

In connection with its delivery obligation over the 30-year period, Pierpont Energy Prepay 2 entered into natural gas swaps with BP Energy Company and Royal Bank of Canada, a funding agreement with J.P. Morgan Securities LLC, and a natural gas purchase, sale and service agreement J.P. Morgan Ventures Energy Corporation.

The municipal bonds were assigned a rating of Aa3 by Moody's. The transaction priced and closed in November.

The Willkie team was led by partner John R. Thomas with associate Kara Ryczek and law clerk Lisa Shakhnazaryan.

[Fitch: Further Cuts to Colorado River Water Use Could Increase Utility Costs](#)

Fitch Ratings-San Francisco/New York/Austin-20 November 2025: Fitch Ratings does not anticipate near-term credit pressure on its rated water utilities despite increased costs stemming from likely cuts to Colorado River water allocations, based on utilities' ability and willingness to pass on rate increases to customers and wholesalers' long-term contracts with strong credit-quality purchasers. However, over the next three to five years, an inability to secure or develop additional supply to meet ongoing demand would likely weaken some utilities' operating risk profiles, potentially negatively affecting credit quality.

Talks continue among seven western states around permanently reducing Colorado River water usage after they failed to reach an agreement by the Nov. 11 deadline set by the U.S. Bureau of Reclamation (USBR). Despite several years of negotiations, Arizona, California, Colorado, Nevada, New Mexico, Utah and Wyoming have thus far been unable to reach a consensus on new operating parameters beyond 2026. Several water management agreements governing the Colorado River operations are set to expire at the end of next year. Under federal law, the USBR has the responsibility for managing the water of the Colorado River's upper and lower basins and will determine water allocations if the states are unable to reach an agreement.

Higher per acre-foot costs for Colorado River water and new water supplies will increase operating cost burdens and capital spending. These costs may pressure margins over time if rate increases cannot keep pace while utilities navigate chronic water scarcity. For some water suppliers, particularly in Arizona, further mandatory cuts to existing water allocations could lead to rate or property tax increases to cover fixed costs and capital costs associated with development of new water supplies. Higher rate increases could eventually pressure rate affordability.

S&P: Texas Public Finance Authority Series 2026 General Obligation Bonds Rated 'AAA'; Outlook Stable

NEW YORK (S&P Global Ratings) Nov. 17, 2025—S&P Global Ratings today took the rating actions listed above.

Given Texas' location along the Gulf Coast, we consider the state to have a higher exposure to acute physical risks, including severe weather events, coastal flooding, and extreme heat, as well as exposure to chronic physical risks, including drought. Although severe weather events are temporary, their recurrence and the state's prolonged exposure to these events could pressure its economic development should it overlook inclusion of adaptation and mitigation initiatives in its long-term planning activities. In addition, Texas has a comparatively greater proportion of energy-related activities in the oil-and-gas sector, and this could lead to increasing regulatory challenges and associated costs as some sectors of the global economy focus on reducing greenhouse gas emissions through renewable energy.

The state's demographic trends generally contribute to lower social capital risk given that population growth during the past decade exceeded the national level, and this can provide for greater economic development potential than that of peers. However, we believe corresponding service demands and growth-related infrastructure needs might require the state to incorporate additional debt issuances and operating costs into its budget. We view Texas' governance risks as neutral, and we note its history of maintaining a strong management and policy framework to respond to developing risks. We believe the state's long-term capacity to evolve its resiliency efforts from responsive to preventative will be a key credit consideration.

The stable outlook reflects our expectation that Texas' financial forecasting and strong budgetary management will help guide executive and legislative actions to make timely adjustments that align expenditures and revenue. It also reflects our view that Texas will exhibit favorable economic and population growth that exceeds that of the U.S., further supporting our view of its long-term credit stability.

[The Guardrails of Governance: Why Mamdani's Spending Push Faces Limits](#)

Zohran Mamdani's recent victory in the New York City mayoral election has drawn significant attention from municipal investors. The mayor-elect has outlined ambitious plans to increase spending through a range of initiatives, funded by higher taxes and expanded bond issuance. Despite these proposals, New York City bond spreads have remained largely stable both before and after the election — a sign of the strong checks and balances that help safeguard the city against unsustainable spending and excessive debt issuance. In this piece, we examine which of Mamdani's policy priorities are most likely to gain traction and which may face greater implementation challenges.

Can New York's Munis Stay Strong In The Mamdani Era?

With a proud, new democratic socialist mayor-elect in New York City and the government shutdown appearing to draw to a close, investors are asking what's next for municipal bonds—and especially for New York City debt. Charles Schwab's chief fixed-income strategist, Kathy Jones, says the answer depends less on politics than on fundamentals right now.

"First of all, the muni bond market is in solid shape," Jones said during Schwab's November 11 Market Talk webcast. "It's underperformed other parts of the fixed-income market this year, but that's largely due to supply. Issuance really picked up this year after being held down for the last couple of years. We see that creating value."

That's particularly true in New York. The city and its related issuers are heavy players in the national muni market. In fiscal 2024, the city and its Transitional Finance Authority issued roughly \$12.6 billion in debt, accounting for about a quarter of all New York City's local government issuance and nearly 3% of all U.S. municipal bonds.

S&P Credit FAQ: Big Apple Checks And Balances: Governance Relationship Between New York City And New York State Could Provide Stability Amid Political Change

Zohran Mamdani was elected New York City's mayor on Nov. 4, 2025, and will take office on Jan. 1, 2026. Following an election at any level of government, S&P Global Ratings often receives questions about how political transitions might translate into actual policy changes, and the potential effect on the government's financial health and underlying credit quality.

We believe the evolution of the city-state governance relationship and budget development process that will take shape over the next several months will reveal more about how campaign proposals could translate into governing priorities and budgetary realities. In addition, New York State's relationship with the city includes constitutional and statutory structures, fiscal interdependencies, policy linkages, and oversight requirements that we believe influence the city's operations and financial position. Our base case reflects modest changes in New York City's day-to-day operations and our view that potential policy and budgetary changes will gradually evolve over time, resulting in no near-term impact to our general obligation rating on the city (AA/Stable).

This FAQ examines how the overarching governance framework in which New York City operates and financial management functions play a key role in the city's credit stability, even as political leadership changes, as well as what we are watching.

California Sued Over Bond Program that Sends More Money to Fix Facilities in Wealthy School Districts.

A public interest law firm [filed a lawsuit](#) Thursday against the state of California, charging that its program to subsidize school construction perpetuates vast inequalities for students in low-wealth communities.

Public school students on some districts' splendid campuses enjoy modern science labs, shaded outdoor spaces, and spacious auditoriums, while their peers in other districts attend rundown schools in deplorable conditions. At the heart of this issue is the state's reliance on local property taxes in districts with vastly different abilities to finance school facility renovations, the lawsuit said.

The losers — property-poor districts — disproportionately enroll low-income students, English learners, and Black, Hispanic and Native American students, the lawsuit said. And it added that the state's formula for contributing to districts' efforts has compounded that problem.

S&P Research Update: Cotuit Fire District, MA GO Bond Anticipation Notes Assigned 'SP-1+' Short-Term Rating

Overview

- S&P Global Ratings assigned its 'SP-1+' short-term rating to Cotuit Fire District, Mass.' estimated \$12.1 million general obligation (GO) bond anticipation notes (BANs).
- At the same time, we affirmed our 'AA+' rating on the district's debt outstanding.
- The outlook, where applicable, is stable.

Rationale

Security

The district's full-faith-and-credit pledge, subject to Proposition 2 1/2 limitations, secures the bonds and notes. We rate the limited-tax GO debt to be on par with our view of the district's general creditworthiness because the tax limitation imposed on the district's ability to raise revenue is already embedded in our analysis of its financial and economic conditions. The district maintains a separate tax levy from the town that provides additional flexibility outside of the constraints of Proposition 2 1/2.

The short-term rating reflects our criteria for evaluating and rating BANs. In our view, Cotuit Fire District maintains a strong capacity to pay principal and interest when the notes come due. In our view, the district has a low market risk profile because it has strong legal authority to issue long-term debt to take out the notes and is a frequent issuer that regularly provides ongoing disclosure to market participants.

Weyerhaeuser to Use \$102 Million From Municipal Bond Sale for Arkansas Project.

Weyerhaeuser will use \$102 million of proceeds from a municipal bond sale to help finance the

construction of solid waste disposal facilities at its engineered wood plant in Arkansas.

The Resource Recovery Revenue Bonds Series 2025 will be sold by the Arkansas Development Finance Authority, which will then lend the money to the timber and forest products company. The offering will be structured as a single term bond maturing in October 2067, according to the preliminary official statement posted Monday on MuniOS.

The bonds are special and limited revenue obligations of the issuer.

Weyerhaeuser will use the money to help finance a portion of the costs of the acquisition, construction, equipping and installation of solid waste disposal facilities at its TimberStrand plant under construction near the city of Monticello in Drew County. Proceeds will also be used to pay the costs of bond issuance.

TimberStrand is a brand name for a type of engineered wood product called laminated strand lumber and is manufactured by Weyerhaeuser. The new facility in Arkansas will have an annual production capacity of approximately 10 million cubic feet. The company hopes to start operations in 2027, according to a statement on Weyerhaeuser's website.

S&P Global Ratings and Moody's have rated the bonds BBB and Baa2, respectively.

Goldman Sachs and Carty, Harding & Hearn are lead managers on the offering.

[Booming Nashville Travel Prompts \\$1.3 Billion Airport Bond Sale.](#)

Nashville's airport authority plans to sell \$1.3 billion of debt in January to meet unprecedented growth — an offering that also bodes well for the broader market to see large deals next year.

The Metropolitan Nashville Airport Authority is proposing a municipal bond sale to help finance infrastructure improvements at its airports, which include Nashville International Airport, dubbed BNA, and to refund outstanding debt. The authority plans to issue a mix of bonds subject to the alternative-minimum tax and non-AMT debt, according to a Nov. 7 [securities filing](#).

US states and local governments have already sold a record amount of debt for the second year in a row, borrowing over \$500 billion in the municipal market in 2025, surpassing last year's tally of \$494 billion, according to data compiled by Bloomberg. Growing infrastructure needs as well as rising costs due to inflation and tariffs account for the increase.

Texas Leads \$16 Billion Slate of Bond Measures on Election Day.

State and local governments across the US are asking voters to approve at least \$15.7 billion of bond sales this year, showing pent-up demand for infrastructure at schools and in growing areas.

The measures would fund school renovations, enhancements to city transportation and the expansion of healthcare facilities, among other projects, according to a Bloomberg analysis of S&P Global Market Intelligence data. That tally included any referendum voted on by a school district, county, city or state valued at \$200 million or more and excluded any special districts. It's a much lighter slate than in 2024, which is unsurprising in an off-year election.

Texas leads the pack, with municipalities and school districts there seeking authorization for roughly \$7 billion in combined proposals, excluding special districts, the data show. If voters approve a nearly \$2 billion ask from Lamar Consolidated Independent School District on Tuesday, the district will use those funds to construct seven new elementary schools. The district serves part of Fort Bend County, a fast-growing county outside of Houston.

Mintz: Massachusetts Land Court Ruling Results in Green Light for Hyde Park Residential Project

In a case that will resonate with many developers, MQMF Hyde Park LLC secured court-ordered approval for a 204-unit apartment complex at 990 American Legion Highway in Boston's Hyde Park neighborhood following years of resistance by the Boston Planning and Development Agency (BPDA). The land, owned by Jubilee Christian Church International, sits in a zoning district that permits multi-family housing "as of right."

Nevertheless, the Boston Planning and Development Agency (BPDA) twice denied approval of the project, citing impact concerns and requesting a full redesign of the project. Following more than a year of unsuccessful negotiations with the BPDA, the developer sought relief from the Land Court, asking for a declaration that the BPDA must approve the project even though Article 80 of Boston's Zoning Code states that the BPDA can "disapprove" a project unless/until it incorporates the BPDA's requested changes.

The Land Court agreed with the developer and ruled that the BPDA cannot reject a zoning-compliant project or require design changes that would force the developer to seek zoning relief. The Court explained that BPDA's role under Article 80 is instead akin to site plan review - meaning that the BPDA may deny approval of a zoning-compliant project only if it presents an unsolvable problem that no form of reasonable conditions can address. Accordingly, the Court ordered the BPDA to complete its Article 80 review and issue approval of the project in an expeditious manner.

S&P U.S. Local Governments Credit Brief: California School Districts Means And Medians

Overview

California school districts available fund balances remain strong as a result of significant federal

stimulus funds received in the past several fiscal years. However, we expect school district finances will begin to meaningfully weaken in the medium term, as most districts across the state are projecting deficits and use of funds over the three-year period, spurred by expiration of stimulus funds, rising fixed costs, and the state's slower economic growth relative to recent years, which could pose a risk to per-pupil funding.

California school districts' median available reserves increased by 1% compared to our previous October 2024 report, but financial performance has weakened across our rated universe this year. We believe available reserve levels peaked as of fiscal 2025, with most available COVID-19 related state grants set to expire over the next two fiscal years. This has occurred as more school districts contend with rising fixed costs and declining enrollment-which will lead to reduced state aid for most-looming decisions about which stimulus-funded services and resources to continue offering students and staff, and an uncertain federal funding environment.

[The Shrinking Classroom: Changing Demographics Are A Growing Credit Risk For California School Districts And Charter Schools - S&P](#)

Key Takeaways

- S&P Global Ratings expects changing demographic trends will become a challenge for both school districts and charter schools in California, especially in the medium term, thanks to the state's slowing economy, which could negatively affect schools that rely on the state funding formula for operations.
- Average daily attendance (ADA) is the primary revenue driver for California public schools, and student population losses can cause budgetary pressures for institutions that fail to adequately adjust operations.
- Many school districts are experiencing significant enrollment declines, particularly in regions with high housing costs, and charter school competition is exacerbating negative trends in some areas of the state.
- Charter school enrollment is growing in the state overall but is not immune to demographic- and competition-driven demand declines in major metropolitan statistical areas.

Landry Urges Rejection of Bond Sale to Bail Out New Orleans, Begins Potential Fiscal Takeover.

NEW ORLEANS - The state of Louisiana has begun the process for a potential takeover of the city of New Orleans' finances. The news came Tuesday in an agenda posted for a meeting of the state's Fiscal Review Committee.

The little-known entity is responsible for reviewing and, on occasion, intervening in the financial stability of cities and parishes through the appointment of fiscal administrators, officials empowered to formulate local budgets, hire and fire personnel and approve contracts unilaterally, without the consent of elected officials.

The committee meeting, the first step in the process that could end with a fiscal administrator running Louisiana's largest city, will be held 4:30 p.m. Wednesday.

Alaska Cities and School Districts Scramble to Close Budget Gaps after State Cuts Bond Debt Payments.

The City of Dillingham and the Lake and Peninsula Borough government are two of 17 Alaska municipalities and school districts that are trying to close budget shortfalls after the state cut its payments for school construction and renovation projects by roughly 25-30% this year.

The payments are part of the state's School Bond Debt Reimbursement Program, which started in the 1970s. Local governments borrowed money to pay for new or improved school facilities, and the state committed to help repay the debt over time.

The proposed reduction to the bond reimbursement program originated in the Senate Finance Committee last session. Bristol Bay Representative and House Speaker Bryce Edgmon says the Legislature had to cut costs for several projects to balance the budget and avoid dipping into the state's savings account, the Constitutional Budget Reserve.

Chicago Bears Fumble Leaves \$3 Billion Stadium Dream in Limbo.

Takeaways by Bloomberg AI

The Chicago Bears will have to wait until 2026 for a chance to get support to build their suburban stadium.

The team needs state funds and support, but lawmakers are not backing the move due to the state's budget forecast and projected deficits.

The Bears may consider turning to private equity for funds or seek help from NFL Commissioner Roger Goodell to reach a public-private partnership for the stadium.

[Brightline Strikes Deal With Commuter-Bond Holders on Repayment.](#)

Brightline, the first new US private passenger railroad in 100 years, struck a deal with holders of \$985 million of municipal bonds to push off a buyback of the debt for eight months.

The Fortress Investment Group-backed railroad provided an additional pledge of security on the debt, which is backed by future commuter-rail access rights payable to Brightline by three South Florida counties. Brightline has until June 14 to buy back the 10% coupon bonds at a premium, according to a securities filing on Friday.

Bondholders received a junior claim on equity backing a \$775 million line of credit, after extending an Oct. 27 deadline to reach a deal on the added protection. Brightline offered the security as an incentive to roll over the bonds in August.

[World's Largest Retirement Community Taps Muni Market to Help Build More Homes.](#)

The largest retirement community in the world is expanding even further with a nearly \$130 million high-yield debt deal.

The Villages, a 57,000-acre Floridian megaplex, already part of the fastest-growing metropolitan area in the US and on Thursday plans to tap municipal-bond investors to help finance a new development with more than 2,800 new homes.

The expansion is part of broader two-decade plan to capitalize on the aging American population and the appeal of a resort-like community among the Baby Boomer generation. The Villages — which has been the subject of documentaries with titles like “The Bubble” and “Some Kind of Heaven” — expects to see the number of its residents boom by 60% to roughly 260,000 people by 2045.

Chicago Bears Leave Behind \$356 Million Stadium Debt as They Ditch City.

For Chicago, it was bad enough that the Bears are planning to abandon the town they've called home for more than a century.

But on top of that, the National Football League team's move will leave behind an unwanted legacy: \$356 million of debt left over from sprucing up Soldier Field, the 101-year-old stadium that the Bears' owners want to ditch for a new one in the suburbs about 30 miles away.

The debt for that rehab, which was finished in 2003, was supposed to be covered by a hotel-room tax placed on visitors. But since the pandemic dealt tourism a hit, the city has been forced to step in with its own revenue — creating a dynamic that's threatening to siphon off tens of millions of dollars as the payments spike until the last of the bonds come due in 2032, when the stadium's marquee tenant hopes to be long gone.

Development at the Ballot Box: Colorado Communities Push for Greater Control

In 2025, Colorado municipalities continue to see significant activity in ballot initiatives related to housing and land use, with many measures scheduled for the November election. While the last few

legislative sessions have seen a rising tension between state and local control of land use, these ballot measures signal another changing horizon—voters working to pull back zoning authority from their elected city leaders. From halting zoning changes to expanding development fees to requiring voter approval for larger projects, these proposals could significantly affect project timelines, feasibility and strategies for developers statewide.

Ballot measures addressing zoning and land use have grown steadily since 2020, peaking in 2023 with 11 initiatives statewide and still going strong in 2025 with several citizen-led measures on the ballot. Similarly, ballot questions targeting short-term rentals surged in 2022 (with 24 initiatives), declined in 2023-2024, and show renewed momentum in 2025, with the new focus being lodging tax or fee proposals being referred to voters by local governments.

S&P: Can Washington School Districts Turn The Tide Against Rising Costs And Credit Pressure As Pandemic-Era Funding Ends?

As one-time, pandemic-era stimulus funding rolls off the books, S&P Global Ratings believes Washington school districts face increased rating pressure from rising operating costs, declining enrollment that negatively affects operating revenue, and thinner operating reserves compared to their national peers. If these trends continue without plans to offset them, we expect Washington school districts will exhibit increased rating volatility during the next two years.

Key Takeaways

- Washington school district funding is based on full-time-equivalent enrollment, meaning declining enrollment often translates into increased revenue volatility.
- Operating expenditures have outpaced revenue growth, forcing districts to choose between short-term fiscal stability and service cuts.
- The state recently raised its per-pupil revenue cap for voter-approved local levies, potentially providing relief for districts whose levies were limited under the previous rules.
- Unlike their national peers that used the infusion of one-time stimulus aid to build stronger financial cushions, available reserves for Washington school districts have remained relatively flat, a notable deviation from the national credit trend.
- Given their lower reserves, we view these districts as having less operating flexibility as they face dual budget stressors in the form of rising costs and potentially increased revenue volatility.

[California State Public Works Board: Fitch New Issue Report](#)

The state of California's 'AA' Issuer Default Rating (IDR) incorporates its large and diverse economy, which supports strong, albeit cyclical, revenue growth prospects, a solid ability to manage expenses through the economic cycle and moderately low long-term liabilities. Strong fiscal management, institutionalized across administrations and demonstrated through the buildup of the budgetary stabilization account (BSA) and elimination of past budgetary borrowing, allows the state to better

withstand economic and revenue cyclicalities while maintaining adequate fundamental financial flexibility. The state's ability to actively eliminate budgetary liabilities in the next budget cycle and begin to rebuild its dedicated operating reserves following recent draws will be an important rating consideration going forward.

Texas Agency to Issue \$1.77 Billion in Bonds for Transportation.

The Texas Transportation Commission is seeking to raise \$1.77 billion through municipal bonds to fund state highway projects, while also refunding outstanding debt.

The General Obligation Mobility Fund and Refunding Bonds, Series 2025, will finance the construction, acquisition and expansion of state highway and public transportation projects, according to a preliminary statement published Thursday on MuniOs. The bonds are part of the state's Mobility Fund financing program.

The tax-exempt bonds mature between 2026 and 2044. Coupons and yields are yet to be set.

The bonds are backed by revenues deposited in the Mobility Fund on a first-lien basis. The Mobility Fund's dedicated revenues totaled \$528.8 million in fiscal 2024, derived primarily from driver license, vehicle inspection and certificate of title fees.

Pricing is preliminarily set for Oct. 21, with closing on Nov. 6.

The offering have been rated AAA by Fitch and Aaa by Moody's.

Loop Capital Markets and Jefferies are leading underwriters.

Chicago Lends Pension Cash to Stop Asset Sale From Tax Delay.

Takeaways by Bloomberg AI

- Chicago is lending cash to its underfunded pensions to avoid asset sales due to delayed property tax collections caused by a computer issue.
- The city has sent \$28 million to the Firemen's Annuity & Benefit Fund of Chicago and is monitoring the monthly cash needs of all four pensions.
- The delay in property tax collections is due to a glitch in Cook County's new computer system, which has delayed hundreds of millions of dollars in property tax earmarked for the pension funds.

Chicago is stepping in to lend cash to its underfunded pensions so they have enough money to avoid asset sales to cover retirement checks as they wait for property taxes to come in after a computer issue delayed collections.

The city's decision helps lessen the risk that its four pensions would need to sell assets from their portfolios, which include stocks, bonds, real estate and private equity, to raise cash after a glitch in setting up a new county computer system is delaying hundreds of millions of dollars in property tax earmarked for the funds.

Why Debt Restraints are Reshaping Fiscal Landscapes Across Wisconsin.

Wisconsin municipalities are holding the line on borrowing, even as rising property values expand their capacity to take on more debt.

Data from the Wisconsin Policy Forum’s 2025 MuniTool shows that general obligation (G.O.) debt across all cities and villages grew just 2.9% in 2023, the smallest annual increase in the past decade.

That modest rise pushed total G.O. debt statewide to \$8.8 billion, but most individual municipalities did not contribute to the increase. In fact, only 33.7% of cities and villages reported taking on more debt last year, while the majority held steady or reduced their liabilities. The trend reflects what researchers describe as cautious fiscal management despite rising construction costs, infrastructure demands, and inflation-driven budget pressure.

Compounding the trend is a decline in Wisconsin’s overall municipal debt burden relative to state-imposed limits. The state restricts how much debt a municipality can carry by tying the cap to a percentage of total equalized property value. In 2023, municipalities were using just 32.2% of their total allowable debt, down from 35.2% in 2022. A decade ago, that figure was above 40%.

Fitch Rates Minnesota's \$1.3B GO State Bonds 'AAA'; Outlook Stable

Fitch Ratings - San Francisco - 12 Sep 2025: Fitch Ratings has assigned a 'AAA' rating to the following state of Minnesota general obligation (GO) state bonds:

- \$550.415 million GO state various purpose bonds, series 2025A;
- \$294.915 million GO state trunk highway bonds, series 2025B;
- \$25.600 million GO taxable state various purpose bonds, series 2025C;
- \$236.195 million GO state various purpose refunding bonds, series 2025D;
- \$158.690 million GO state trunk highway refunding bonds, series 2025E.

Fitch has also affirmed the ratings assigned to the following state of Minnesota bonds and programs:

- Minnesota's Issuer Default Rating (IDR) at 'AAA';
- State GO bonds at 'AAA';
- State general fund appropriation bonds at 'AA+';
- Certificates of participation, series 2014 (legislative office facility project) at 'AA+';
- St. Paul Port Authority (State of Minnesota Office Building) lease revenue bonds at 'AA+';
- The 'AA+' rating assigned to the Minnesota School District Credit Enhancement Program.

The Rating Outlook is Stable.

Sports Park Promoters Get Prison for \$280 Million Bond Fraud.

Takeaways by Bloomberg AI

- A father and son were sentenced to years in prison for misleading firms about the prospects of an Arizona sports complex backed by \$280 million in municipal bonds.
- The pair pleaded guilty to using fabricated documents to claim their Legacy Park development had deals with professional sports organizations.
- Randy Miller was given six years behind bars and his son, Chad Miller, was given five years, with both agreeing to forfeit millions of dollars as part of their plea deal.

High-Yield Muni Deal for Catskills Casino Is Delayed Again.

A high-yield municipal bond transaction to fund the purchase of businesses related to a casino in upstate New York has been delayed [again](#).

The unrated \$561 million deal, managed by KeyBanc Capital Markets, was initially expected to price Aug. 27, but the transaction was postponed to hire legal counsel to advise investors on the transaction. The pricing was then moved to Sept. 11.

Now, KeyBank has “extended the timeline for the sale of the bonds to allow additional time to answer questions and educate investors about the credit,” a spokesperson for the firm said. The underwriter has seen “significant interest from the market in the offering,” the spokesperson said.

S&P U.S. Local Governments Credit Brief: Texas Municipal Utility Districts Means And Medians

Overview

Texas municipal utility districts (MUDs) demonstrated continued stability, as favorable property tax base growth, well-defined debt issuance oversight, and rapid population growth statewide supported improved direct debt metrics and high reserves. Texas MUDs have exhibited stable ratings performance despite economic and event cycles such as the Great Recession, Hurricane Harvey, and the pandemic—which supports our view of a stable outlook despite growing uncertainty with current economic conditions (see “Economic Outlook U.S. Q3 2025: Policy Uncertainty Limits Growth,” June 24, 2025). We think Texas benefits from economic growth that outpaces that of the nation, which will likely contribute to ratings stability over time.

S&P Global Ratings maintains general obligation ratings on 320 Texas MUDs. Currently, about 17% of the ratings are in the ‘BBB’ category, 72% are in the ‘A’ category, and 11% are in the ‘AA’ category. From January 2024 through August 2025, there were 20 upgrades (15 in 2024 and five from January 2025 through August 2025), a trend that continued despite substantial rating movement in 2023, when 145 MUD ratings were raised due to robust economic and tax base growth. There were no downgrades in 2024 or in 2025 so far. The continued upward rating movement is reflective of strong property tax base growth, stable finances, and moderating debt burdens as the MUDs continue to reach mature development status.

As Texas MUDs become largely or fully developed and their additional capital needs decrease, direct debt requirements and tax rates decline. MUDs typically exhibit strong credit fundamentals, including favorable tax base growth and maintenance of high reserves, usually above 100% of annual expenses, in operating and debt service funds, providing flexibility to cash-fund ongoing maintenance of infrastructure, particularly during periods when interest rates are high, as is currently the case.

Every State in the Nation has Some Form of a Budget in Place — Except Pennsylvania and Michigan

Just two states in the nation have been unable to pass some form of a budget for the 2025-26 fiscal year - and now, they're staring down significant consequences if their respective legislative bodies fail to act soon.

Pennsylvania has entered its third month without a new budget, while Michigan is just weeks away from a potential shutdown. Meanwhile, lawmakers in other states have figured out their spending plans - or contingencies. North Carolina, for example, has passed a "mini-budget" bill that prevents disruptions in state operations.

Aside from their current budget woes, the Rust Belt states mirror each other in some unique ways. Both are helmed by Democratic governors with presidential ambitions and national profiles to match in Josh Shapiro and Gretchen Whitmer. They are considered battleground states with recently redrawn legislative districts generally regarded as fairer - and that resulted in split legislatures, two of three nationally. Transportation funding has emerged as *the* sticking point in the disparate budget

negotiations, for very different reasons.

[A Small Wisconsin Town Bet Big on a Biodigester. Now the Project Is Defaulting on Its Loans.](#)

Pitched as a boon to small towns, the biodigester financed \$41.5 Million via the town of Gillett, promising jobs and future tax revenue.

Zahn's Farms LLC, an approximately 11,500-head dairy operation in Gillett, Wisconsin, is the site of WI RNG Hub North, a manure methane digester project funded using \$41.5 million worth of tax-exempt municipal bonds financed by the town. On June 1, the project, developed and run by Aerogy LLC, missed their \$1.7 million principal payment, raising questions about the fate of the project and its impact on Gillett.

Methane digesters, like the one at Zahn's Farms, are frequently pitched as climate-smart solutions to one of the biggest environmental critiques of animal farming: the emissions and pollution caused by manure. According to the non-profit World Resources Institute, manure from cows and pigs constitutes one percent of total U.S. greenhouse gas emissions. Biodigesters are a technology for processing the manure by allowing microbes to break down the organic material. The result is biogas, a mix of primarily methane and carbon dioxide, that is touted by the booming biogas industry as renewable energy.

Chicago Public Schools' Debt Has Hit Over \$28,000 per Student. Here's What That Means.

Chicago Public Schools' outstanding debt is roughly the same size as its annual budget: almost \$10 billion. The district owes more per student than it spends per pupil in many of its schools.

Its massive obligations appear even more sobering compared with other cities.

Among the 25 largest school districts by student enrollment, CPS has the third-most outstanding debt, according to a Chalkbeat analysis of U.S. Census Bureau data for fiscal year 2023, the most recent available. That data shows CPS owes more than \$28,000 per student, up from roughly \$17,000 in 2013.

High-Yield Muni Deal for Casino in Upstate New York Is Delayed.

A high-yield municipal bond transaction that would fund the purchase of businesses related to a casino in upstate New York has been delayed, people familiar with the matter said.

The unrated deal, managed by KeyBanc Capital Markets, was expected to price on Aug. 27, according to investor roadshow documents. The transaction has been postponed for the hiring of legal counsel to advise investors in the transaction, said the people, who were not authorized to speak publicly because the matter is private. The move is known in the market as the hiring of purchaser's counsel.

Proceeds of the sale are expected to fund the purchase of the non-gaming businesses at Genting Group's Resorts World Catskills in Sullivan County, New York. The bonds are issued by the Sullivan County Resort Facilities Local Development Corp., a not-for-profit organization created under New York's economic-development law.

Fitch Ratings Expects No Immediate Effect on State of Nevada Ratings from Cyberattack.

Fitch Ratings-New York/San Francisco-29 August 2025: Fitch Ratings does not currently anticipate any immediate effect on the state of Nevada's credit ratings from a recent cyberattack that continues to disrupt state operations, given the state's strong fiscal position and prudent management practices including a pre-existing cyber incident response plan. Nevada has been experiencing a ransomware-based cybersecurity attack since Sunday, August 24. However, with many details pending, Fitch will monitor the situation for material financial or operational developments.

Nevada's IT staff detected unusual activity on its network late Sunday night, which it later confirmed as a cyber breach. The attack, suspected to be a ransomware attack, has had a widespread effect on state operations. Upon detecting the breach, state officials immediately activated their established cybersecurity incident response plan, including containing the threat by isolating systems and taking them offline.

Many state offices have been closed since Sunday and systems remain offline. However, some agencies are beginning to resume operations to continue providing some service and benefits. The state notes that some data has been accessed and moved outside of the state's network but details on the type of data at risk are still being analyzed. Based on other entities' experience with cyber incidents, full resolution may take weeks.

Nevada's 'AA+' Issuer Default Rating (IDR) and GO rating reflect the state's well-managed and low liability position, strong revenue and expenditure frameworks, and historically responsive financial practices, as well as its success in managing rapid population growth and development. The Rating Outlook is Stable. Fitch anticipates Nevada will maintain financial resilience in the face of costs arising from the cyberattack.

Cyberattacks that cause system outages may disrupt operations, potentially challenging liquidity and resilience. Additionally, cyber breaches where information is stolen can elevate cost and litigation risk. Fitch currently views Nevada as well-positioned to mitigate these risks, though details of the extent of the cyber incident are still being investigated. Nevada is working with internal and external experts, as well as the appropriate federal authorities, to resolve the issue.

The cyberattack against Nevada highlights historic increases in the number, severity and frequency of cyber assaults for public sector issuers, as well as the increasing sophistication of threat actors. In rare cases, cyberattacks have led to downgrades for U.S. Public Finance issuers, often when those

issuers were already facing fiscal or management challenges.

Oklahoma Municipal Power Authority (OK): Fitch New Issue Report

Willkie Represents JPMorgan in Municipal Bond Commodity Prepayment Transaction.

Willkie represented the commodities business of JPMorgan Chase & Co. in its first municipal bond commodity prepayment transaction using a special purpose vehicle – Pierpont Energy Prepay 1.

The transaction involved the issuance of \$700 million of municipal bonds by The Black Belt Energy Gas District, the proceeds of which were used by Black Belt to prepay Pierpont Energy Prepay 1 for the delivery of natural gas over a 30 year period. The gas delivered to Black Belt is then sold to the Louisiana Community Development Utility Commission, which in turn sells the gas to BASF Intertrade Corporation.

In connection with its delivery obligation over the 30 year period, Pierpont Energy entered into a natural gas swap with BP Energy Company, a funding agreement with National Western Life Insurance Company, and a natural gas purchase, sale and service agreement with J.P. Morgan Ventures Energy Corporation. The municipal bonds were assigned a rating of A- by S&P. The transaction priced and closed in July.

The Willkie team was led by partner John R. Thomas and associate Kara Ryczek.

Florida Municipal Power Agency Closes \$208 Million Bond Transaction.

Home periodical article Florida Municipal Power Agency Closes \$208 Million Bond Transaction

Florida Municipal Power Agency has closed on the sale of \$208,830,000 in municipal bonds for its All-Requirements Project (ARP) to finance capital projects, refinance existing project debt and tender a portion of Series 2016A Bonds, FMPA said on Aug. 13.

The sale netted nearly \$13.1 million in gross savings.

The ARP, FMPA's largest power supply project, provides all the wholesale power needs of 13 Florida municipal electric utilities including Bushnell, Clewiston, Fort Meade, Fort Pierce, Green Cove Springs, Havana, Jacksonville Beach, Key West, Kissimmee, Leesburg, Newberry, Ocala and Starke. The savings will reduce future power costs for these cities.

The savings begin at approximately \$0.4 million in 2025, steadily rising to \$3.2 million in 2029 and 2030 and peaking at \$4.4 million in 2031. The final maturity date for the refunding bonds is the same as the original issues being refunded, with new money proceeds maturing in 2034 and 2035.

"Our team is dedicated to identifying and analyzing the best opportunities for savings for our ARP members, so they can best serve their residents and customers," said Rich Popp, FMPA's chief financial officer. "This tender transaction speaks to the team's dynamic thinking and is strategic to our mission of providing affordable and reliable power to the members we serve."

The bonds received strong credit ratings of AA- from Fitch Ratings and A2 from Moody's Investors

Service. Both rating agencies cited the All-Requirements Project's very strong financial profile, prudent financial management, and well-maintained and diverse portfolio of generating assets.

FMPA's All-Requirements rates have decreased over 20% since 2022, and for FY 2025, they will be the second lowest inflation-adjusted energy costs to ARP Members in FMPA's history.

The bonds' lead underwriter was JP Morgan in a negotiated sale.

[Tilting for Windmills: Illinois Court Reverses Village Ban on Wind Farm Construction - K&L Gates](#)

On 1 August 2025, the Illinois Appellate Court for the Third Circuit struck down a local ordinance purporting to ban construction of a wind farm as outside the village's statutory authority and contrary to Illinois public policy. Following up on a state law prohibiting county level bans on renewable resource facilities, this decision will significantly clarify the authority of towns and villages to regulate the construction of wind and solar farms. For developers of renewable resource facilities, this decision will provide an important guidepost when dealing with units of local government.

Hickory Winds, LLC (Hickory) planned to build a large wind farm in LaSalle County, Illinois. Several of the turbines were located on land within 1.5 miles of the boundaries of the Village of Cedar Point (Cedar Point), which were within the village's jurisdiction for zoning purposes. In response to the plans, Cedar Point adopted an ordinance prohibiting the construction of wind energy conversion structures or wind turbines, which would provide more than 120% of the electrical demand on the parcel on which they were constructed. To make the intent of its ordinance crystal clear, Cedar Point's ordinance incorporated a recital stating "it was to be in the best interests of the Village and its citizens, to prohibit wind farms, wind energy conversion systems or electric-generating wind devices" within Cedar Point's jurisdiction. Hickory sued Cedar Point but lost on summary judgment in the trial court.

In *Hickory Winds, LLC v. Village of Cedar Point et al*, the appellate court reversed the trial court and affirmed the summary judgment in favor of Hickory. The Court held that Cedar Point was a nonhome rule unit of government, meaning its powers were controlled by statute, and that the legislature expressly granted Cedar Point the power to regulate wind energy conversion systems within its jurisdiction. However, the Court emphasized that "regulation and prohibition are not the same thing." The Court held that the ordinance was a prohibition because the ordinance prohibited all wind farms, wind energy conversion systems, and electric-generating devices; and cited Illinois zoning law to hold that the power to regulate a legal use did not include the power to prohibit that use.

In addition, the Court noted Cedar Point's ordinance undermined the strong Illinois policy in favor of developing renewable resources and reducing carbon emissions, citing both the legislature's declaration to rapidly transition to 100% clean energy by 2050 and the legislature's statement that it is necessary to improve the process for procuring electricity to serve Illinois residents. As a result,

Cedar Point's ordinance was held to be an invalid exercise of its regulatory authority.

The Court's decision clearly requires local municipalities to exercise their zoning authority thoughtfully with respect to renewable-resource facilities. An Illinois law setting out requirements for counties to consider in exercising their zoning authority could provide useful guidance in evaluating municipal zoning decisions and procedures. Since the law in question did not apply to local units of government such as towns and villages, it was not directly relevant to all other units of government, but the decision still evidences both the state's commitment to the construction of renewable resources and the need for local municipalities to exercise caution when regulating renewable resource facilities through statutorily given authority. They must keep in mind the Court's direction that regulation is not the same thing as prohibition.

Los Angeles County to Sell \$826.3M of Bonds for Harbor-UCLA Medical Center.

The Los Angeles County Public Works Financing Authority plans to sell \$826.3 million of municipal bonds to help pay for new construction that is related Phase 2 of the Harbor-UCLA Medical Center in Torrance, Calif.

The Lease Revenue Bonds Series J are special obligations of the authority and are backed lease revenue pledged under a 2015 master sublease, according to documents posted on MuniOS.

Retail investors interested in buying the bonds can place their order on Aug. 19. Institutional pricing is scheduled for Aug. 20, and closing is set for Sept. 10.

The authority will offer serial and term bonds that mature starting later this year through 2054. Interest payments will be made starting on Dec. 1 and again on June 1.

Proceeds will be used to help pay for construction of a 346-bed, 465,000 square-foot inpatient tower facility for Harbor-UCLA, according to the roadshow document. The facility will also have 36 psychiatric beds, a psychiatric emergency room and a rooftop helistop.

Los Angeles County owns and operates the Harbor-UCLA Medical Center, a public teaching hospital and general acute-care facility. Once completed it will help to provide services to more than 700,000 residents in the southwestern part of the county, and act as teaching hospital for the David Geffen School of Medicine at UCLA.

S&P Global Ratings and Fitch Ratings both assigned the bonds a rating of "AA+."

BofA Securities and Ramirez & Co. are senior managers on the sale.

Built For This Moment: Why cashVest Matters More Than Ever

At a time when public leaders are being asked to do more with less, the ability to make every dollar go further is no longer optional, it's essential. Especially in light of mounting fiscal shifts, proactive liquidity management is more critical than ever.

It's no secret that the future of interest rates is once again a topic of nationwide conversation. With evolving leadership dynamics and mixed economic signals, speculation is swirling about the direction of monetary policy. While some brace for potential rate cuts, others prepare for further shifts in liquidity and inflation strategies.

But for public sector leaders, the real question isn't what the Fed might do next; it's whether your entity is ready to respond, no matter what happens.

That's where cashVest by three+one stands apart.

From its inception, cashVest was built on the belief that you don't have to predict the market to succeed in it. Instead of reacting to economic shifts, cashVest empowers public entities to plan, adapt, and optimize their resources with clarity and discipline.

Here's why that matters right now:

Federal support is shrinking, and local responsibilities are growing. A recent report from the National Association of Counties (NACo) highlights an alarming trend: counties are facing nearly \$1 trillion in increased costs over the next decade due to cuts in federal programs like Medicaid and SNAP, as well as key grant eliminations. As responsibilities shift to the local level, the financial burden is growing heavier.

You can read the full report here: [The Big Shift - NACo](#)

When rates move (up or down), timing is everything.

Waiting to act means leaving money on the table. cashVest users have the data and strategic foresight to adjust their cash positioning immediately, ensuring every available dollar is working harder for them.

Data makes the difference.

Entities using cashVest earn and save over 30% more on average than those without a data-driven liquidity strategy. That's because they're not just managing their funds, they're leveraging them as strategic assets.

Market cycles are inevitable. Being caught off guard shouldn't be.

Whether it's rising borrowing costs, flattening yields, or the shift of federal obligations to local governments, cashVest helps public finance teams stay one step ahead without adding burden to staff or sacrificing services.

It's not about high or low rates. It's all about smart decisions.

Some of the strongest cashVest results have occurred during periods of declining interest rates. The reason? Users were empowered with the data and tools to optimize timing, improve bank partnerships, and unlock new earnings even when benchmarks dipped.

At a time when public leaders are being asked to do more with less, the ability to make every dollar go further is no longer optional, it's essential. Especially in light of mounting fiscal shifts, proactive liquidity management has never been more critical.

cashVest doesn't just prepare you for what's coming. It ensures you're always in a position to act with confidence and clarity.

No guesswork. No gambling. Just smarter financial stewardship.

The City of New York Announces Successful Sale of \$1.8 Billion of General Obligation Bonds.

The City of New York (the “City”) announced the successful sale of approximately \$1.8 billion of General Obligation bonds, comprised of \$1.53 billion of tax-exempt fixed rate bonds and \$256 million of taxable fixed rate bonds. Proceeds from the sale will be used to fund capital projects and refund certain outstanding bonds for savings.

The refunding portion of the transaction achieves approximately \$35 million in total debt service savings, primarily spread evenly across Fiscal Years 2026 through 2029.

For the tax-exempt bonds, the City received approximately \$280 million of orders during the retail order period and \$3.6 billion of priority orders during the institutional order period, which in total represents 2.5x the bonds offered for sale.

Final yields on the tax-exempt bonds ranged from 2.42% in 2027 to 4.95% in 2053.

Additionally, the City received total indications of interest of approximately \$356 million for the taxable bonds, representing 1.4x the amount offered for sale.

Final yields on the taxable bonds were 4.06% in 2026 and 3.93% in 2027.

The bonds were underwritten through a syndicate led by book-running lead manager BofA Securities, with Jefferies, Ramirez & Co., Inc., RBC Capital Markets, and Siebert Williams Shank serving as co-senior managers.

[Vibrant Denver Bond Package Advances to Public Vote](#)

Denver City Council Approves Bond Proposal with Support

DENVER, CO — Mayor Mike Johnston was joined today by dozens of community members and members of Denver City Council to announce that the Vibrant Denver Bond package will appear on voters' November 4, 2025, ballot. The bond package, which was crafted and refined multiple times through months of community engagement, will build or repair approximately 60 needed infrastructure projects around Denver. Local bond funds are how Denver delivers high-quality infrastructure for its residents — without raising taxes.

"The Vibrant Denver Bond is about delivering real results for Denverites, including safer streets, better parks and stronger neighborhoods," said Mayor Mike Johnston. "Each project in this package reflects what Denver residents told us they want and need most. This is how we build a more vibrant, connected and inclusive city, together."

"The Vibrant Denver Bond will deliver transformative improvements from the parks where our kids play to the streets we walk, bike, and drive, along with the safety upgrades that make our neighborhoods feel secure. These investments aren't just for us but for the generations who will call Denver home long after we're gone," said City Council President Amanda P. Sandoval. "This bond reflects the voices of community, the parents, neighbors, and advocates who showed up and helped shape a vision for a stronger, safer, more connected Denver. We're not just building for today we're building for the next seven generations. And we're doing it without raising taxes. That's a powerful commitment to our shared future."

Transportation Secretary Announces \$3.89 Billion Loan to a Public-Private Partnership in Georgia to Get America Building Again.

The express lanes project along State Route 400 near Atlanta will reduce traffic, enhance safety, and improve connectivity.

WASHINGTON, D.C. – U.S. Transportation Secretary Sean P. Duffy today announced a loan of up to \$3.89 billion from the Build America Bureau to a public-private partnership between the Georgia Department of Transportation (GDOT), the State Road and Tollway Authority (SRTA), and SR 400 Peach Partners, LLC (Peach Partners). The funding, made possible by the Transportation Infrastructure Finance and Innovation Act (TIFIA), is the largest loan approved to a single borrower to date.

“This loan is another investment in getting America building again,” said U.S. Transportation Secretary Sean P. Duffy. “Through the improved TIFIA program and innovative partnerships like the SR 400 project, we’re reducing taxpayer waste, accelerating construction timelines, and helping people get where they want to go safer.”

The State Route 400 Express Lanes Project will add new lanes in both directions along a 16-mile section from the Metropolitan Atlanta Rapid Transit Authority (MARTA) North Springs Station to one mile north of McFarland Parkway. While facilitating current MARTA and XPress bus connections, Peach Partners will also provide \$75 million in future bus rapid transit (BRT) related improvements. MARTA will operate the future BRT system, which is expected to share the express lanes for approximately 12 miles.

“This partnership is a perfect example of how, when the public and private sectors work together, we can provide communities with the most effective and cost-efficient solutions while reducing the

need for public funding,” said Build America Bureau Executive Director Morteza Farajian, Ph.D. “Georgia’s innovative approach has allowed them to leverage our low-interest financing with the developer’s investments to provide more benefits for the Atlanta community through this project and other projects that will be funded because of this project. A win for everyone that would not be otherwise possible.”

The project calls for Peach Partners to provide a \$3.8 billion concession fee to GDOT that can help fund other roadway projects as part of the public-private partnership agreement to design, build, finance, operate, and maintain the express lanes.

“Securing TIFIA federal credit assistance is an essential milestone for the SR 400 Express Lanes project,” said SR 400 Peach Partners CEO Javier Gutierrez. “Thanks to this loan, this critical project will become a reality, improving safety and mobility in the greater Atlanta metro area for generations to come.”

“We are excited to celebrate Georgia being home to the largest public-private partnership in USDOT history,” said Georgia Governor Brian Kemp. “As the No. 1 state for business, Georgia’s logistics and transportation network is a major selling point to job creators, and this approved financing will both boost our competitive edge and make it easier for hardworking Georgians to commute. Thank you to the Trump administration and Secretary Duffy for their support of this vital project.”

Additional Information:

The USDOT previously allocated up to \$3.4 billion in Private Activity Bonds to this project, bringing the total investment to approximately \$7.5 billion.

The project is expected to reduce delays by over 19,000 hours each day, or about 15 minutes per traveler, due to less idling and traffic congestion. It will also enhance public safety through the construction of new bridges and other safety improvements, the replacement or widening of several existing bridges, and will reduce traffic incidents by an estimated eight percent. This project will offer travelers new choices. The new express lanes will be tolled using dynamic congestion pricing to manage demand and maintain reliable trip times, while current lanes will remain free.

###

The Build America Bureau accelerates investment in transportation infrastructure by lending Federal funds to qualified public and private borrowers; clearing roadblocks for creditworthy projects; providing technical assistance services and grants to build local and regional capacity and implement best practices and innovative solutions in project planning, funding and financing, delivery, and operations. The Bureau draws on expertise across DOT to serve as the point of coordination for states, municipalities, private partners, and other project sponsors seeking Federal financing.

[Florida Commission Selling \\$333.5 Million of Municipal Bonds for Retirement Community Project.](#)

The Florida Local Government Finance Commission will sell \$333.5 million of debt to help finance construction and development of a new continuing care retirement community in Duval County.

The Senior Living Revenue Bond offering consists of approximately \$173.5 million of Series 2025 A bonds, \$16 million of Series 2025B-1, \$22.3 million in Series 2025B-2 bonds and \$115 million in Series 2025B-3 bonds, which are all tax-exempt. The Commission is also issuing \$6.7 million in Series 2025C bonds that are taxable, according to the preliminary limited offering memorandum posted Monday on MuniOS.

Dates of pricing and delivery for the securities wasn't provided. Interest on the bonds will be payable starting on Nov. 15 and on May 15.

Proceeds of the bonds will be loaned to Ponte Vedra Pine Company and be used for the construction, development, and equipping of a new continuing care retirement community called Fleet Landing at Nocatee.

The securities are limited obligations of the commission, and are backed by payments from Ponte Vedra under a loan agreement between the two entities. Ponte Vedra will make payments with revenue it collects from entrance fees, monthly service fees, rentals and insurance proceeds.

Fleet Landing at Nocatee development will consist of an independent living tower, independent living flats, an assisted living/memory care building and a performing arts center on a 37-acre site.

The bonds will be sold without a rating, according to the memorandum.

[Infrastructure-Driven Municipal Bonds in the Pacific Northwest: Evaluating the Port of Seattle's Strategic Capital Transformation](#)

Overview

- The Port of Seattle issued a \$761M bond to fund \$5.9B in infrastructure upgrades, including Sea-Tac airport modernization and carbon reduction projects.
- AA- rated bonds (S&P/Fitch) leverage regional economic resilience, with Sea-Tac handling 26.3M passengers in 2024 and cargo volumes up 30% post-pandemic.
- Proceeds support 10% emissions cuts by 2030, aligning with \$5.6B in regional infrastructure investments and ESG-focused capital flows.
- Structured across three series, the bond offers diversified risk mitigation and tax advantages,

positioning as a strategic entry point for infrastructure portfolios.

Florida Borrower to Remarket \$985 Million of Brightline Rail Project Bonds.

The Florida Development Finance Corp. will remarket \$985 million of municipal bonds for the Brightline Florida passenger rail expansion project.

The securities being offered are the Series 2025 A revenue bonds that were sold under a previous indenture, and have been redesignated as Series 2025 B revenue bonds, according to a document posted on MuniOS.

Proceeds will be used to finance or refinance the project, and fund certain reserves related to the project and financing for the project. The bonds are special limited obligations, payable solely from and secured by a trust estate and collateral.

The securities are available for purchase only by qualified institutional investors, and reach their final maturity in 2057.

Interest on the Series 2025 B bonds is excluded from gross income for federal income taxation, and isn't an item of tax preference for purposes of the alternative minimum tax imposed on individuals.

The Florida Development Finance Corp. is a state authorized issuer of industrial revenue bonds and does not receive state appropriations. It supports economic development by assisting for-profit and not-for-profit businesses with access to capital for project financing.

Brightline Holdings builds and operates high-speed passenger rail systems in the U.S., including the South Florida Commuter Rail Project and the Orlando-Tampa Project. It is primarily owned, indirectly, by funds managed by an affiliate of Fortress Investment group.

Morgan Stanley is the remarketing agent.

S&P Warns Chicago That Pension Cost-Hike to Pressure Budget.

Takeaways:

- S&P Global Ratings warns that a new law aimed at raising pension benefits for some Chicago police and firefighters risks further straining the city's finances.
- The new law is expected to add more than \$11.6 billion to Chicago's long-term net pension liability, according to city estimates cited by S&P.
- S&P analysts state that the prognosis for Chicago's long-term fiscal health has weakened, and that substantial budget-balancing measures will be integral to the city's credit stability.

A new law aimed at raising pension benefits for some Chicago police and firefighters risks further straining the city's finances, according to S&P Global Ratings.

S&P's warning, issued on Monday, comes nearly seven months after the firm cut the city's credit rating by one notch to BBB with a stable outlook. The latest report, which did not include a rating or outlook change, follows new legislation that Illinois Governor JB Pritzker signed last week.

NJ's American Dream Mall Has Value Cut \$850 Million by Judge.

Takeaways

- A tax court judge cut the assessed value of New Jersey's American Dream mega mall by \$850 million, bringing the property's valuation down about 50% this year.
- The reduction brings the property's assessed value to about \$1.65 billion for the current tax year, down from the Borough of East Rutherford's assessment of \$2.5 billion.
- American Dream will be on the hook for roughly \$24 million in PILOTs annual to holders of the mall's municipal debt, less than half of the \$54.1 million in annual interest they're owed.

A tax court judge cut the assessed value of New Jersey's American Dream mega mall by \$850 million on Thursday, the latest reduction that brings the property's valuation down about 50% this year.

The reduction hands a win to the property's owners who sought to lower payments tied to the valuation, but deals a blow to bondholders who own the roughly \$800 million of debt backed by those payments, called payments in lieu of taxes, or PILOTs.

12 Years After Bankruptcy, a Changed Detroit Is Picking a Mayor.

Several candidates want to replace Mike Duggan, the only mayor the city has had since its financial crisis. Detroit's next challenge, residents say, will be reviving forgotten neighborhoods.

The last time Detroit voters chose a new mayor, the local government was largely controlled by the state, the population was in free-fall and the city was careening through the largest municipal bankruptcy in American history.

A dozen years later, Detroit is functional again. Local control of City Hall was long ago restored, the city's bond rating is on the upswing and the streetlights are back on. And after decades of hemorrhaging residents, the city has seen slight upticks in population in the last two years, according to Census Bureau estimates.

Now, with Mayor Mike Duggan not running for a fourth term, a large field of candidates wants to lead a changed Detroit, population 645,000. The candidates and their supporters broadly agree that Detroit is better off than it was, and that the city's downtown and Midtown were transformed in the Duggan years. At stake now, residents say, is Detroit's next chapter, and whether the renaissance in parts of the city will spread to still-struggling neighborhoods.

Texas School Districts Rush to Bond Market Ahead of Law Changes.

Takeaways

- Texas school districts borrowed more than \$9 billion of long-term bonds in July, according to data compiled by Bloomberg.
- The debt surge is fueled in part by new laws that increase Texas' homestead exemption, which reduces the amount of revenue school districts can borrow against, said Matt Boles, a managing director at RBC Capital Markets.
- Some districts are upsizing or accelerating their deals to take advantage of a hold-harmless provision that says the state will cover any funding shortfalls caused by the change until Sept. 1, said Boles.

Texas school districts are dashing to secure bond financings before legislative changes that take effect in September could choke debt sales.

Public schools in the state borrowed more than \$9 billion of long-term bonds in July, roughly six times more than the monthly average in the last five years, according to data compiled by Bloomberg. It also marks a 437% increase over the volume sold in July 2024.

[New York City Transitional Finance Authority Announces Successful Sale of \\$1.5 Billion Future Tax Secured Subordinate Bonds.](#)

The New York City Transitional Finance Authority ("TFA") announced the successful sale of \$1.5 billion of future tax secured subordinate bonds, comprised entirely of tax-exempt fixed rate bonds. Proceeds from the sale will be used to fund capital projects.

TFA received nearly \$479 million of orders during the retail order period and over \$4.8 billion of priority orders during the institutional order period, which in total represents 3.5x the amount offered for sale.

Due to investor demand, yields were reduced relative to the start of the institutional order period by 2 basis points in 2036, 2042 through 2045, and 2047; by 3 basis points in 2030, 2031, and 2035; by 4 basis points in 2027, 2028, 2046, and 2048; by 5 basis points in 2052 and 2054; and by 6 basis

points in 2050.

Final yields ranged from 2.47% to 5.02%.

The bonds were underwritten through a syndicate led by book-running lead manager Ramirez & Co., Inc., with BofA Securities, Jefferies, J.P. Morgan, Loop Capital Markets, RBC Capital Markets, Siebert Williams Shank, and Wells Fargo Securities serving as co-senior managers.

Lacking Ridership and Revenue, Florida's Lauded Private Rail Is Worrying Investors.

Takeaways

- Brightline’s ridership and revenue have lagged projections, creating financial hurdles for the company.
- Investors who hold the company’s \$5.5 billion in outstanding debt are trying to understand the extent of the stress the company is under, with some considering their options with law firms.
- Brightline still has cash reserves to cover some of its outstanding debt until at least 2027, but its latest monthly update showed that ridership and revenues are far below the projections the company offered to bond investors last year.

The Brightline train running from Miami to Orlando, lauded as an alternative vision for the future of

American rail travel, is making some investors anxious.

The concerns have amped up since Bloomberg [reported](#) earlier this month that Brightline was going to delay an interest payment on \$1.2 billion of bonds it issued through the municipal-bond market, one of several different types of debt issued by various arms of the company.

[Fitch Takes Various Actions on Houston CUS First Lien Rev Refunding Bonds Ser 2018C.](#)

Fitch Ratings – New York – 24 Jul 2025: Fitch Ratings has revised the basis of the long-term rating assigned to the City of Houston Combined Utility System First Lien Revenue Refunding Bond Series 2018C to ‘AA’ from ‘AAA’. Fitch has also upgraded the Short-Term rating to ‘F1+’ from ‘F1’. The rating actions are in connection with the issuance of a standby bond purchase agreement (SBPA) by Bank of America, N.A. (BofA; AA/F1+/Stable) in substitution of the current Barclays Bank, PLC letter of credit and mandatory tender of the bonds on July 24, 2025.

KEY RATING DRIVERS

The Long-Term rating will be based solely on the Long-Term rating assigned to the City of Houston’s Combined Utility System First Lien Revenue Refunding Bonds, Series 2018C. The ‘F1+’ Short-Term rating will be based on the liquidity support provided by BofA, in the form of a SBPA, which has a stated expiration date of July 23, 2029, unless extended or earlier terminated. The liquidity support is effective during the weekly interest rate mode only. The Rating Outlook for the Long-Term rating is Stable. For more information on the Long-Term rating, please see the report dated April 12, 2024, available at www.fitchratings.com.

The SBPA provides the payment of the principal component of purchase price, including an amount equal to 35 days of interest calculated at a 15 % maximum rate of. This is based on a 365-day year for tendered bonds during the weekly rate mode if the proceeds of a remarketing of the bonds are insufficient to pay the purchase price following an optional or mandatory tender. The SBPA expires on July 23, 2029, the stated expiration date, unless such date is extended, or upon conversion from the weekly rate mode.

[Public Finance Authority Selling \\$135 Million of Bonds for Planned Community In Texas.](#)

The Public Finance Authority plans to issue \$135 million of tax-exempt bonds to finance the

development of a planned community approximately 30 miles west of downtown Houston.

The Series 2025 Revenue Anticipation Capital Appreciation Bonds will be sold on behalf of the Texas Infrastructure Program, according to documents posted Monday on MuniOS. The total accreted value of the bonds is approximately \$418.4 million.

Pricing is scheduled for Aug. 6 and the securities will be available for delivery on or about Aug. 13.

Proceeds will be used to help fund the development of the master-planned community of Heritage Bend, located in Fort Bend County. The project will consist on 2,927 single-family residential units and various community amenities including open spaces and trails. The homebuilders anticipate beginning construction in the second quarter.

The bonds are limited obligations of the authority issued under, and secured by, pledges of a separate trust estate under the bond's indenture.

The debt will be issued as capital appreciation term bonds, and will not pay periodic interest. Instead, the bonds will accrue interest based on a 360-day year. Investors will be paid by maturity, with 50% development pace and 1% inflation, according to the roadshow document. At a 100% development pace the bonds require 1,792 units, or 61% of the total, to be built to pay prior to maturity.

The authority is a governmental entity established under Wisconsin statutes, and is authorized to issue tax-exempt, taxable, and tax credit bonds for public and private entities around the country. The authority was established to provide local governments in Wisconsin and around the country with a way to efficiently and reliably finance projects, according to the PFA website.

The bonds are not rated.

Piper Sandler is the underwriter.

[Salt Lake City Bets on Olympics to Spur Economic Overhaul.](#)

Also today: Florida's high-speed rail rattles investors, and how climate change is raising your grocery bill.

Salt Lake City is betting on the 2034 Winter Olympics to jumpstart a lasting economic transformation. Local governments and agencies issued more than \$4 billion of municipal bonds this year, fueling a surge of development across the city, including an overhaul of its sports and entertainment arena, the Delta Center, and the area surrounding it.

Some economists, however, question the long-term benefits of hosting the games, decrying potential gains as "exaggerated" or, worse, "nonexistent." While investment is rolling in to boost tourism,

Utah's housing shortage stands to constrain the region's economic growth. There are just 30 affordable and available homes for every 100 "extremely low-income" renter households statewide, and in Salt Lake City, the median home price has surpassed half a million dollars, putting homeownership out of reach for most residents, Arvelisse Bonilla Ramos reports.

Bowdoin College to Borrow From Muni Market for Campus Revamp.

Takeaways

- Bowdoin College is issuing \$42.4 million in revenue bonds to finance campus renovations, including student housing, an observatory, and classrooms.
- The college has a strong balance sheet, with a \$2.6 billion endowment, and has raised over \$542.8 million in a fundraising campaign launched in 2020.
- The bond issue is backed by the college's full faith and credit, and has received a high investment grade rating from Moody's, citing strong student demand and growing net tuition revenue.

Maine's Bowdoin College, a private liberal arts college that boasts Henry Wadsworth Longfellow and Stanley Druckenmiller among its alumni, is turning to the municipal bond market to spruce up its campus.

With an acceptance rate of roughly 7%, the highly selective Bowdoin plans to use the proceeds from the \$42.4 million in revenue bonds to finance the renovation and equipping of student housing facilities, restoring its 133-year-old observatory, as well as building new classrooms, according to preliminary offering documents. The offering via the Finance Authority of Maine will price as soon as this week.

Barclays Plc is underwriting the deal, which is backed by the more than 200-year-old institution's full faith and credit. After a successful fundraising campaign, launched in 2020 which raised more than \$542.8 million, the college with about 1,800 undergraduates had a \$2.6 billion endowment, as of June 2024.

RBC Reclaims No. 2 Municipal Underwriter Spot.

RBC Capital Markets has ridden the wave of record US state and local debt sales in the first half of this year to reclaim its position as the second-biggest municipal underwriter.

The Canadian bank's market share rose to about 10.5% of the \$278.5 billion total long-term muni sales for the first six months of 2025, according to data compiled by Bloomberg. It first reached the No. 2 rank in 2023 but ceded that spot to JPMorgan Chase & Co. last year and slipped to third place, according to first-half data going back to 2013. Bank of America Corp. continues to hold the top spot.

A JPMorgan spokesperson declined to comment on the shift in market share. Representatives for Bank of America didn't immediately respond to emails seeking comment.
