Bridging the Gap Together: A New Model to Modernize U.S. Infrastructure.

We have an extraordinary opportunity in America—to confront the pressure being placed on our nation's roads, water systems, ports, airports, and energy grid with available private capital. This report establishes the framework to unite projects that need funding with private capital ready to invest in a transparent system that allocates risks and resources to the public's benefits.

America is a nation of innovators—we are inspiring new industries through interconnected devices, commercializing suborbital space flight, and advancing cures to life-threatening diseases. Yet if we hope to foster the next generation of entrepreneurs that can push our economy forward and maintain our quality of life, we must invest in our infrastructure. Wise infrastructure investments would create millions of jobs, maintain the health, safety, and security of our communities, and set our nation on track for decades of greater prosperity.

This is a choice between action and paralysis. Not making decisions today has serious consequences for tomorrow. We are already confronting prior mistakes as our infrastructure today is failing us. We are living at risk: driving every day on eroding roadways, questioning whether our water is really safe to drink, and sending our children off to schools built for our parents' generation. The problem is growing worse. It shouldn't be this way in a country that for so long has led and inspired the world.
