Kalotay Licenses Tax-Neutral Muni Bond Methodology to BlackRock.

NEW YORK, Oct. 25, 2016 (GLOBE NEWSWIRE) — Kalotay Analytics, a provider of high speed, high precision fixed income valuation software, announced the licensing of patent-pending tax-neutral municipal bond valuation and risk analysis methodology to BlackRock.

When interest rates rise, the prices of lower coupon bonds may drop much more precipitously than predicted by traditional risk calculations. The traditional approach fails to account for the tax payable at maturity on the discount when prices fall below par, which pushes prices further down.

“Incorporating tax effects is vital for the proper risk analysis and tax management of municipal bonds. We’re thrilled that BlackRock recognizes the benefits of our innovative methodology, and is implementing it across its existing platforms,” said Andy Kalotay, president of Kalotay Analytics.

Antonio Silva, the head of the Financial Modeling Group at BlackRock said, “We continually look for improvements to our analytics platform and are pleased to integrate the tax effects model into the new valuation methodology used for municipal bonds.”

About Kalotay Analytics

Kalotay Analytics has been providing fixed income valuation and risk measurement tools to major market participants since 1990. Applications of its patented, lightning-fast, technology include real-time pricing of bond ETF’s, risk management, tax management, and pre-trade analysis. The firm has unparalleled expertise in the valuation and risk analysis of callable municipal and agency bonds. Analytics coverage spans the global fixed income universe, including fixed rate bonds, floaters, MBS, and inflation-indexed structures. Kalotay technology drives the recently introduced live municipal yield curve distributed by the Associated Press.
