- And finally, Please Let Us Be Wrong is brought to you this week by [Thompson v. City of Albuquerque](#), in which “Minor children brought loss of consortium action against city, police chief, and police officer who shot and killed children’s father.” It has always been our understanding that loss of consortium was available exclusively for spouses who had been deprived of the uh, affections, of the other spouse. We pray that we are wrong about that. Otherwise, someone should probably contact social services.
