Understanding Financing Options Used for Public Infrastructure

Report Cover Understanding Financing Options Used For Public Infrastructure (“the Primer”) provides an overview of tax-exempt bond and other financings used by state and local governments and entities.

The Primer covers numerous issue areas related to tax-exempt financings. These sections include:

- The fundamentals of tax-exempt bonds and other financing tools that are available to state and local governments and related entities;
- The role tax-exempt bonds play in infrastructure financings and as an investment product; and
- Congressional actions over the past fifty years related to this market.

This Primer was prepared in coordination with several members of the Public Finance Network (PFN). The PFN is a coalition of organizations interested in preserving the tax-exempt status of state and local government bonds.
