A Path to Transit and Transportation Project Success in the Wake of the Pandemic: Nossaman Webinar Replay

For those of you involved in the transportation sector, we invite you to join us on Wednesday, June 3rd for a discussion on planning, procurement and financing strategies that can be implemented now to support timely project delivery in the wake of the COVID-19 pandemic. We are planning a very interactive webinar where ample time will be set aside to answer questions received from attendees both prior to and during the event.

Topics that will be covered include:

- How to prepare now to efficiently and effectively move projects forward
- Procurement and contracting strategies that enable owners to access future funding and move projects forward despite short-term funding issues
- NEPA, CEQA and environmental permitting considerations in the era of social distancing and shelter-in-place orders
- Real estate and construction considerations such as delays/Temporary Construction Easement expirations and appraisal/site inspection issues
- The environmental litigation outlook under California and federal law (i.e., delays due to limited court activities/court closures)

Our interdisciplinary panel will provide practical and timely information to assist you in this ever-changing business climate. We look forward to having many of you attend and to addressing your concerns related to this extremely important sector of our economy.

[Listen to Webinar Replay.](#)
