Municipal Bond Data Firm Spline Data Launches Primary Market Analytics Platform.

Spline Data's third major data product produces machine-learning-derived new issue scales on demand

CHICAGO, Sept. 24, 2025 /PRNewswire/ — [Spline Data](#), a leading provider of quantitative U.S. municipal bond pricing data and analytics, today announced the launch of its real-time primary market pricing tool designed to bring greater efficiency, accuracy, and customization to the bond issuance process.

Spline's latest analytics tool provides dealers, advisors, issuers, and asset managers with next-generation modeling technology to generate predicted scales for hypothetical municipal bond deals across any range of call dates, coupons, and structures. Using traditional municipal trading intuition combined with scalable machine learning, Spline's new issue platform leverages swaths of otherwise ignored market data to generate meaningful insights, enable fine-tuned pricing power, and enhance negotiation capabilities.
