

## **Chicago Plans \$1.5 Billion Bond Refinancing in Early December.**

- **Interest rate savings of \$110 million expected with the deal**
- **Munis have been volatile this week because of US elections**

Chicago plans to tap the muni market for \$1.5 billion early next month to refinance its debt as it looks to capitalize on the Federal Reserve lowering interest rates.

The city will have \$850 million in general obligation bonds available to replace with new debt. The deal, which also includes a debt buyback process, is expected to generate \$110 million in savings.

“We are planning on pricing the first week of December,” Chicago Chief Financial Officer Jill Jaworski said in an email on Friday. “We do not have any comments on how day-to-day market movements impact the sale.”

## **Colorado Water Resources and Power Development Authority: Fitch New Issue Report**

The ‘AAA’ rating reflects the ability of the Colorado Water Resources and Power Development Authority’s combined clean water and drinking water state revolving fund bond programs’ (together, the program) financial structure to absorb hypothetical pool defaults in excess of Fitch Ratings’ ‘AAA’ liability stress hurdle without causing an interruption in bond payments. The program is above average in size at 299 obligors, which results in a pool that is less concentrated than its peers. The program’s cash flows are very strong, as projected minimum annual debt service coverage (DSC) is about 3.5x. Program management adheres to a formal underwriting policy that includes minimum DSC requirements for borrowers.

## [State of New Jersey \(New Jersey Educational Facilities Authority\): Fitch New Issue Report](#)

The 'A' ratings for the New Jersey Educational Facilities Authority capital improvement fund and higher education facilities trust fund refunding bonds are one notch below New Jersey's 'A+' Issuer Default Rating. New Jersey's revenue system is very diverse and sensitive to economic trends. Fitch expects natural growth in expenditures over time to be above revenue growth, driven by program spending demands. The long-term liability burden is elevated and higher than those of most U.S. states, reflecting considerable outstanding debt and a large net pension liability. Gap-closing capacity has strengthened significantly in recent years, with ending balances well above historical levels.

## [Muni Lender Preston Hollow Is Exploring a Sale.](#)

- **Firm is working with adviser to explore strategic options**
- **Preston Hollow has raised \$1.6 billion from investors over time**

Preston Hollow Community Capital, a municipal finance lender, is exploring strategic options including a sale, according to people with knowledge of the matter.

The Dallas-based company is working with an adviser to solicit interest from potential suitors, said the people, who requested anonymity to discuss confidential information. No final decisions have been made and a transaction isn't guaranteed.

Preston Hollow has invested more than \$5.2 billion in municipal bonds since its founding in 2014 and has raised \$1.6 billion from investors including Stone Point Capital, HarbourVest Partners and Nuveen LLC's TIAA, according to a September release.

## **[Florida Rail Brightline's Riskiest Munis Lure Investors on Expansion Bet.](#)**

- **Railroad's unrated muni bonds gain about 13% since April**
- **John Miller fills First Eagle's muni portfolio with the debt**

Bond investors are snapping up the riskiest chunk of Brightline's debt in a wager on the private railroad as it expands west across Florida.

Investors, drawn by a 12% coupon, have bid up Brightline's \$925 million of unrated-tax exempt bonds so much that they're valued at about 105 cents on the dollar. They've returned some 13% since April, when the Fortress Investment Group-backed company refinanced its debt with nearly \$4.5 billion in muni bonds and junk notes.

Among the reasons the unrated debt is appealing to investors: collateral. They're secured by a lien on current and future assets including design contracts, permits, and rights-of-way that are earmarked for Brightline's project to stretch its tracks from Orlando to Tampa.

## **[Bloomberg: University of Texas Launches New Center Focused on Muni Market.](#)**

- **Center to be housed within the public affairs graduate school**
- **Program to meet infrastructure needs due to climate, energy**

The University of Texas at Austin is launching a new center dedicated to the municipal bond market, ahead of an anticipated boom in infrastructure investments.

Dubbed the Center on Municipal Capital Markets, the new initiative will be housed under the institution's Lyndon B. Johnson School of Public Affairs. It's part of a broader push by university president Jay Hartzell to address extreme weather as a result of climate change and the energy grid's transition to renewable power.

"Our future as a growing, resilient society depends upon our ability to wisely invest in infrastructure, especially in the important energy sector," Hartzell said in an emailed statement. "Tomorrow's leaders need to understand the role of capital markets in making those investments possible."

A rush of public projects is anticipated after decades of infrastructure disinvestment and increasing needs driven by climate change, said Martin Luby, a professor of public affairs and the center's founding director.

"There's clearly a need for education, training and thought leadership in this area, and I think it's just even more acute given what we think is going to happen in terms of increased infrastructure investment in the future," Luby said in an interview. "When we think about capital financing it's all hands on deck and we're going to try to cover it as much as possible."

Municipal bond sales have already surged this year, totaling \$426 billion since the start of January, a 41% increase from the same period in 2023, according to data compiled by Bloomberg. Texas issuance is a major chunk of that deluge, with about \$60 billion of debt.

That comes as Texas' public finance market has been in flux for several years after state lawmakers passed two laws targeting Wall Street banks for their policies regarding fossil fuels and firearms — legislation that has reshuffled the muni underwriter rankings in the state.

The new center will train students on how to use the capital markets to strengthen communities and their infrastructure. Starting in September 2025, some students will conduct fellowships with municipal-finance firms including Moody's Corp. and Public Financial Management, Inc, according to Luby.

The center will also produce research and policy reports, as well as host an annual conference and outreach events for issuers. The first research report is slated for publication next year and examines the reserves needed for certain borrowers to absorb shocks related to natural disasters including wildfires, tornadoes, hurricanes and drought.

Continuing education courses for public finance professionals are expected to launch in the 2026-2027 academic year.

Luby said the center is looking to bring on a new hire with experiencing raising money in the muni market to focus on fundraising.

"Whether that's someone who's a former investment banker or CFO-type — that wants to transition into higher ed and help us build out this program," he said.

The center's advisory council includes industry professionals including Municipal Securities Rulemaking Board's chief executive Mark Kim.

### **[New Training and Research Center to Leverage Private Capital for Public Infrastructure Launches at University of Texas.](#)**

AUSTIN, Texas — One of the nation's only university-based centers to focus on capital market financing for public infrastructure projects will strengthen the ability of communities to build

schools, roads and hospitals and make critical infrastructure, including energy systems, more resilient. The [Center on Municipal Capital Markets](#) (CMCM), launched by the LBJ School of Public Affairs at The University of Texas at Austin, will provide specialized training and research so that government entities can effectively leverage private capital for these public needs.

The center will train graduate students and host programs to educate professionals about how to leverage markets to have sufficient funding for projects they are pursuing. The importance of leveraging government resources for infrastructure development and maintenance has grown as recent federal initiatives aim to revitalize infrastructure after years of disinvestment.

“Our future as a growing, resilient society depends upon our ability to wisely invest in infrastructure, especially in the important sectors of health care, transportation and energy. Tomorrow’s leaders need to understand the role of capital markets in making those investments possible,” said UT President Jay Hartzell. Hartzell holds degrees in economics and finance and has expertise in corporate finance. “The LBJ School will equip both governmental leaders and capital market participants with the expertise to think creatively to solve the financial challenges of infrastructure development and maintenance, and to ultimately change the world for generations to come.”

Municipal capital markets allow government entities to raise funds for essential public infrastructure projects — such as schools, highways, hospitals, water, wastewater and energy systems — by selling bonds to private investors. These investments enhance the quality of life in communities and promote long-term economic growth by ensuring access to vital services. They also improve community resilience by preparing public systems to withstand challenges such as extreme weather while ensuring sustainability and reliability over time. This makes municipal capital markets a crucial tool for financing large-scale infrastructure projects that would otherwise be unaffordable through traditional funding methods.

CMCM will focus on four key areas:

- Undergraduate, graduate and continuing education for emerging and seasoned public finance professionals.
- Hands-on training and experiential learning.
- Applied research.
- Public outreach.

The foundation for CMCM was built during an event in December 2023, where more than 100 leaders from various public finance organizations, convened by LBJ School professor and the center’s inaugural director, Martin Luby, in collaboration with the Bond Dealers of America, discussed innovative approaches to infrastructure finance.

“Developing the next generation of professionals and advancing research and dialogue on the municipal capital markets is especially salient given the huge infrastructure needs we have in the United States,” said Luby, who teaches public and municipal finance courses at UT. “The Center on Municipal Capital Markets will address how such capital investments affect the macroeconomy, the local economies of state and local governments, as well as the day-to-day lives of all citizens.”

Luby has published widely on innovative government financial instruments, federal financing techniques, regulation of the municipal securities market, and the role of financial intermediaries in state and local government financings. He also has extensive banking, consultant and advisory experience with many state and local governments, as well as with the federal government. In addition to his research and advising, Luby has been at the forefront of initiatives to cultivate talent

for the public finance sector, teaching more than 1,000 students and developing opportunities for research, education and experience in the public finance field.

CMCM has constituted a 16-member advisory council composed of national leaders in the municipal capital.

“I am honored to serve on the inaugural advisory council for the launch of the Center on Municipal Capital Markets at the LBJ School of Public Affairs,” said Mark Kim, CEO of the Municipal Securities Rulemaking Board. “I applaud CMCM’s dual mandate of teaching undergraduate and graduate students about the critical role of the municipal securities market in financing this nation’s public infrastructure, as well as empowering government finance professionals with a greater understanding of the capital markets through continuing education, training opportunities and academic research.”

CMCM has already introduced a Certificate in State and Local Finance for LBJ School students and is producing technical reports for clients on municipal finance.

“We are not only exploring solutions to the world’s most pressing problems but also developing innovative financing strategies for these solutions,” said LBJ School Dean JR DeShazo. “I am thrilled about the career opportunities this center will create and the impactful solutions our students will develop.”

## **[Arizona Town Ditches Illegal Attempt to Dump \\$70 Million Debt on Residents.](#)**

Taxpayers in Payson, Ariz., are no longer on the hook for a massive debt after the Goldwater Institute and local residents raised concerns about the legality of the town’s inclusion of a so-called “emergency clause” for the sale of \$70 million in bonds.

Payson officials had authorized the sale of \$70 million in municipal bonds in August, using an “emergency” clause to bypass the democratic process and deny residents the opportunity to put the controversial bond measure to a popular vote. The purported “emergency” was nothing more than the Town Council’s desire to secure a bond quickly, as officials speculated that interest rates might slightly increase in the coming months.

The Goldwater Institute [filed a lawsuit](#) challenging the sham “emergency” measure on behalf of a local resident, pointing out that the Arizona Constitution and state statute guarantee the right of referendum—that is, voters’ rights to refer a bill, ordinance, or resolution to the ballot and vote on it.

The case is currently on appeal, but in the meantime, Payson voters and taxpayers have already received some great news. Last week, the Town Council voted to repeal the problematic resolution, cancelling the “emergency” bond sale.

The court battle against governments’ abuse of emergency clauses isn’t over—indeed, local governments throughout the state routinely bypass democratic accountability using “emergency” clauses. We’re fighting back to ensure government can’t steamroll its own citizens and deny them rights afforded under Arizona’s constitution.

You can read more about the case [here](#).

### **Hollywood Alma Mater Harvard-Westlake Taps Munis for New Campus.**

- **Expanded grounds will house athletic facilities, public park**
- **\$88 million in bonds will bridge the project's fundraising gap**

Harvard-Westlake School, one of the country's most exclusive private schools famous for educating generations of Hollywood stars, is tapping the public debt markets for the first time.

The school plans to borrow nearly \$90 million of municipal bonds to finance a new athletic campus in Los Angeles' Studio City. The project, which is years in the making, will transform the former site of a neighborhood tennis and golf facility into a sprawling park that will house state-of-the-art spaces for Harvard-Westlake's 90 sports teams, according to bond documents. The undertaking — mostly funded through donations — will feature an Olympic-sized swimming pool, eight tennis courts, a club house and putting green.

"We're so limited with space on this campus," Beth Slattery, head of Harvard-Westlake's Upper School, told the school's student newspaper earlier this year. "This really frees us up to be able to do things and I'm excited about it."

## **[S&P U.S. Local Governments Credit Brief: California School Districts Means And Medians](#)**

### **Overview**

California school districts entered fiscal 2025 in a position of financial strength, partly as a result of record per pupil funding and unprecedented one-time state and federal stimulus through the years following the peak of the pandemic. These extraordinary fiscal supports have thus far helped mitigate the challenges of broad school-age population declines and rising fixed costs. However, in S&P Global Ratings' view, key challenges could lead to credit pressure over the near term, including the risk that state aid will fail to keep up with rising fixed costs and increased expenditures. We also expect California school districts' reserve positions will weaken over the next year as districts focus on aligning continuously growing expenditures with revenue in the absence of Elementary and Secondary School Emergency Relief (ESSER) funding.

S&P Global Ratings evaluates the ratings on 687 school districts across California, including school facilities improvement districts. In the period from Aug. 24, 2023, to Aug. 12, 2024, we raised ratings on 16 school districts (2% of the total) and lowered nine (1%). Furthermore, we revised the rating outlook on 15 districts (2%), putting six (1%) on positive and nine (1%) on negative. The rating outlooks on the remaining 672 districts (98%) remained stable during this period. Following the release of our "Methodology for Rating U.S. Governments," published Sept. 9, 2024, on RatingsDirect, we placed 63 California school district ratings under criteria observation (UCO), signaling that we could affirm the ratings or change them as a result of the application of new

criteria. For more information on the UCO designation and our plan for reviewing ratings under the new criteria, see the UCO list and “FAQ: A Closer Look At The New Methodology For Rating U.S. Governments,” published Sept. 9, 2024.

### **[State of Washington: Fitch New Issue Report](#)**

The State of Washington’s ‘AA+’ Long-Term IDR and GO bond ratings reflect its broad and growing economy, with solid long-term revenue growth prospects, and the state’s demonstrated commitment to maintaining fiscal balance. The ratings also reflect long-term liabilities that place a low burden on the economic resource base. The ‘AA+’ ratings also incorporate the state’s very strong financial resilience, which is supported by a statutory requirement for a balanced four-year budget and formulaic funding of the budget stabilization account (BSA); the latter has led to the accumulation of solid fiscal reserves. Education poses continued spending pressure for the state given steady

population growth and the state's role as the primary funding source for K-12 public schools.

## **ICE Launches Climate Transition Risk Solution for Municipal Bond, MBS, Real Estate Segments.**

Financial technology and data services provider and exchange operator Intercontinental Exchange (ICE), announced the launch of a new climate transition risk solution targeted at underserved segments of fixed income including municipals, securitized mortgage-backed securities (MBS) and real estate.

According to ICE, the new solution will provide emissions estimates and portfolio analytics across various fixed income asset classes, covering Scope 1, Scope 2 and Scope 3 emissions for municipal bonds, MBS, and real estate, expanding ICE's existing coverage of sovereign, corporate equity, and private companies to help enable clients to assess and benchmark financed emissions across a comprehensive range of fixed income asset classes in one integrated offering.

Larry Lawrence, Head of ICE Climate, said:

“Our clients increasingly need quality transition risk data for underserved segments, particularly mortgage-backed securities, where we have applied physics-based simulations with building energy models and ICE's data to provide emissions insights for RMBS and CMBS. Mortgages and mortgage securities can represent more than 20 percent of bank balance sheets, leading to a growing need for data to help meet regulatory disclosure and support stress testing to inform decision-making.”

ICE said that the new solution will “address gaps in emissions data by covering underserved sub-asset classes, such as residential mortgage-backed security, commercial mortgage-backed security, and private corporates,” as well as municipal bonds.

ICE's multi-asset class transition risk solution provides financed emissions data based on criteria of the Partnership for Carbon Accounting Financials, which provides financial institutions with data on compliance with aspects of the Paris Climate Agreement, encompassing over 110 million US properties and more than 4.2 million fixed income securities globally. ICE's methodologies, customized for each asset class, provide comprehensive emissions tracking, including Scope 1, 2, and 3 estimates, as well as carbon intensity metrics, which organizations need to meet climate regulatory reporting requirements, the company said.

## [Museum of Natural History Seeks Bond Buyers to Help Fund Rebound.](#)

- **\$85 million sale helps pay for Gilder Center, cuts debt costs**
- **Pandemic-era deficits get whittled as attendance on upswing**

The Covid-19 pandemic brought New York City's American Museum of Natural History, home to 30 million prized artifacts, its first deficits in decades. The institution plans to tap the municipal bond market for an \$85 million boost.

Proceeds from the debt sale will help the 155-year-old museum lower its interest expenses and recover costs from building the Gilder Center, a major 21st Century addition. The offering by the Trust for Cultural Resources of The City of New York is expected to price on Oct. 17, according to investor roadshow documents.

The sprawling landmark on the Upper West Side of Manhattan welcomed 5 million visitors last year, second only to the city's Metropolitan Museum of Art among US museums. But the pandemic had hit hard, forcing the venue's closure between March and September 2020, and cutting average annual paid attendance by 37% that year.

### **[Private Equity-Backed Texas Housing Development Taps Muni Market.](#)**

- **Muni authority seeking debt for residential development**
- **Developers are planning to build more than 1,000 homes**

In suburban Texas, a neighborhood complete with an amphitheater, dance hall and goat farm is scheduled to be erected 40 miles from Houston's downtown — providing municipal-bond investors a window to bet on one of the fastest-growing areas of the US.

In a transaction that priced this week, a municipal authority sold high-risk, tax-exempt bonds to finance infrastructure associated with a housing development dubbed Two Step Farm. The planned community stretches more than 2,000 acres in Houston's sprawling metropolis. The first phase will have more than 1,000 homes priced between \$350,000 and \$1 million, as well as parks and amenities.

The bonds are backed by future revenues generated by the project, meaning investors are wagering that the development will be built out and populated. Texas metros are seeing the most sustained population growth of all the nation's major cities this year, according to US Census Bureau data. Houston added nearly 140,000 people to its population this year, following closely behind Dallas. San Antonio and Austin also ranked in the top 10 of the largest increases in new residents.

## [From the Edge of Bankruptcy to a Decade of Surpluses - Wayne County, MI](#)

**Wayne County, Mich., nearly filed for bankruptcy in 2014. It just posted its tenth budget surplus in a row.**

### **In Brief:**

- Wayne County, Mich., adopted a \$2.23 billion budget last month, its tenth balanced budget in a row.
- The county was on the verge of bankruptcy in 2014, when its current county executive, Warren Evans, was elected.
- Renegotiated pension benefits and increases to property values have helped stabilize the county's finances.

In 2013, Detroit became the biggest city in the country ever to file for bankruptcy. A year later, it looked like Wayne County, Mich., the city's home county, was headed in the same direction.

The county had posted a string of annual budget deficits, with a structural deficit of about \$52 million, according to Warren Evans, the Wayne County executive who was elected in 2014. Its pension fund was only about 45 percent funded, threatening its ability to fulfill its commitment to retiring public workers. And its bond rating had been lowered to junk status, making it more difficult to borrow money for public infrastructure and other obligations.

## **[S&P: Florida State Finances And Insurance Mechanisms Help Absorb The Blow Of Another Major Storm](#)**

### **Key Takeaways**

- Hurricane Milton is the second major hurricane to make landfall in the State of Florida this year, with 51 counties placed under the pre-emptive disaster declaration that authorizes the Federal Emergency Management Agency to coordinate all disaster relief efforts and provide assistance to individuals in need.
- Florida (AAA/Stable) entered hurricane season with exceptionally high reserves totaling approximately 33.4% of operating revenue. In addition, it has a well-embedded emergency response apparatus to support short-term localized needs and enhance rebuilding efforts.
- The scale of damage remains highly uncertain from hurricanes Milton and Helene, but it could be substantial, leading to significant insured losses that are likely to place near-term pressure on the state’s statutorily created entities: Citizens Property Insurance Corp. (not rated), Florida Hurricane Catastrophe Fund (AA/Stable), and Florida Insurance Guaranty Assn. (A/Stable [FIGA]).
- We continue monitoring how these events will affect Florida’s general credit and insurance landscape, and if these entities will need to take additional measures (e.g., draws on pre-event bond proceeds, levying assessments, or new debt issuance) to help stabilize the property insurance market.

## **Chicago to Issue \$1.6 Billion of Municipal Bonds to Refinance O'Hare Airport Debt.**

The City of Chicago plans to sell \$1.6 billion of bonds to refinance outstanding debt sold to pay for improvements at O'Hare International Airport.

The issuance will be split into four tranches, according to roadshow material posted Tuesday on MuniOS.

The General Airport Senior Lien Revenue Refunding Bonds will be divided into \$515.7 million in Series 2024 C and \$840.1 million in Series 2024 D. The General Airport Senior Lien Revenue Bonds will include \$158.4 million in Series 2024 E and \$61.3 million in Series 2024 F debt. Series C and Series E are subject to the alternative minimum tax, while Series D and Series E are exempt.

Preliminary pricing information wasn't available. Pricing is scheduled for Oct. 17 and closing on Oct. 30, with both of those subject to change.

The Series 2024 C and 2024 D bonds will mature between 2025 and 2046. The Series 2024 E and 2024 F mature between 2025 and 2032.

Proceeds will be used to refund outstanding obligations, among other expenses. The bonds are backed by a pledge of revenue earned from airport's operations. Most of that money comes from the rental payments, fees and charges collected under airline use and lease agreements, according to the preliminary official statement posted to MuniOS. Series E and Series F debt is also backed by a subordinate pledge of revenue collected from a passenger facility charge.

About 36.6 million people boarded flights at O'Hare in 2023, up 7.3% from the prior year, with 82% of those passengers boarding domestic flights. The total number of people boarding flights was up 9.2% this year through Aug. 31. O'Hare was the fifth-largest airport in the country for both originations and destinations and total connecting passengers.

The debt is expected to receive a rating from S&P Global Ratings. Fitch Ratings has assigned the bonds a rating of A+.

"The rating reflects the strong air trade service area, Chicago's strategic location as a hub and the demonstrated importance of the airport to both United Airlines, Inc. and American Airlines, Inc.," Fitch said in a report Wednesday. "The rating also reflects risks related to the very sizable capital programs with overall escalated costs estimated at \$12 billion over the next decade requiring around \$9 billion of bond funding, including the recent series 2024A&B bonds."

J.P. Morgan and Jefferies are lead underwriters on the sale.

**Alabama College Reaches Deal With Nuveen After Bond Stress.**

- **Deal requires Spring Hill to raise \$5 million by Oct. 31**
- **Leadership is evaluating options to divest noncore real estate**

Spring Hill College, the oldest Catholic educational institution in the southeast of the US, has struck a deal with its biggest creditor Nuveen that gives it more time to shore up its finances and overcome a default.

The Mobile, Alabama-based college entered into what's known as a forbearance agreement with UMB Bank — the trustee for bondholders like Nuveen — after breaching a covenant, according to an Oct. 1 regulatory filing.

As part of such agreements, bondholders can agree to hold off on steps like lawsuits to give distressed borrowers more time to right their finances.

## **[Columbia Is the Latest Ivy League School to Tap Muni Debt Market.](#)**

- **Ivy League schools have borrowed \$2.8 billion so far this year**
- **Colleges are rushing to sell bonds to spruce up campuses**

Columbia University is expected to tap investors to borrow \$500 million of debt, joining a boom of elite colleges that have issued in the capital markets this year.

The Ivy League university is poised to sell both tax-exempt and taxable securities this week to raise money for projects across its campus in Manhattan. A portion of the bond proceeds will be used to pay for improvements to multiple dorms, the addition of chemistry and quantum physics lab-space in academic buildings, furnishing the law school's library and upgrades to the college's medical center campus.

The deal marks one of the latest debt offerings from a US college, which have surged this year as the direction of interest rates stabilized and investor demand increased. Universities broadly have sold \$24 billion of municipal debt so far in 2024, with sales from Ivy League schools climbing to nearly \$3 billion, an increase of more than 650% from the same period a year ago, according to data compiled by Bloomberg.

## [Private Equity-Backed Texas Housing Development Taps Muni Market.](#)

- **Muni authority seeking debt for residential development**
- **Developers are planning to build more than 1,000 homes**

In suburban Texas, a neighborhood complete with an amphitheater, dance hall and goat farm is scheduled to be erected 40 miles from Houston's downtown — providing municipal-bond investors a window to bet on one of the fastest-growing areas of the US.

In a transaction that priced this week, a municipal authority sold high-risk, tax-exempt bonds to finance infrastructure associated with a housing development dubbed Two Step Farm. The planned community stretches more than 2,000 acres in Houston's sprawling metropolis. Once built out, the development will have more than 1,000 homes priced between \$350,000 and \$1 million, as well as parks and amenities.

The bonds are backed by future revenues generated by the project, meaning investors are wagering that the development will be built out and populated. Texas metros are seeing the most sustained population growth of all the nation's major cities this year, according to US Census Bureau data. Houston added nearly 140,000 people to its population this year, following closely behind Dallas. San Antonio and Austin also ranked in the top 10 of the largest increases in new residents.

## [S&P: California Utilities Enter Period Of Significant Capital Spending That May Strain Water And Sewer Rate Affordability](#)

### **Key Takeaways**

- Rising costs and affordability risks will be increasingly meaningful to municipal utility credit quality in California, particularly as they adapt to more extreme weather patterns, bolster supply resiliency, and invest in storage, which we expect will raise debt levels but reduce operating risks.
- California utilities' capital plans and needs far exceed those of its national peers, given their outsized exposure to water contaminants, strict wastewater discharge requirements, and substantial renewal and replacement costs.
- Rating downgrades in California outpaced upgrades in 2024, a trend we expect will continue through 2025, consistent with our negative sector outlook.

## [\*\*ICE Launches Physical Climate Risk Municipal Indices.\*\*](#)

### **Five new indices to track performance of securities of obligors exposed to climate risk, uses ICE Climate Risk Scores**

Intercontinental Exchange, a leading global provider of technology and data, announced that it has launched a new suite of climate risk municipal indices, using the ICE Climate Risk Score, aimed at tracking the performance of securities selected based on exposure to acute climate risks.

The new suite of climate risk municipal indices is a collaboration between ICE's Climate and Index teams. The indices, using ICE Climate Risk data, track the performance of securities issued by obligors with different projected vulnerability to a range of climate risks, including hurricanes, wildfires and floods.

The new index family includes:

- ICE US High Physical Climate Risk Municipal Index (MUNIHICR)
- ICE US Low Physical Climate Risk Municipal Index (MUNILOCR)
- ICE US High Physical Wildfire Risk Municipal Index (MUNIWFCR)
- ICE US High Physical Flood Risk Municipal Index (MUNIFLCR)
- ICE US High Physical Hurricane Risk Municipal Index (MUNIHRCR)

"ICE indices have helped market participants capture exposure to some of the most dynamic trends that shape the global economy, and climate risk has increasingly become an important factor in the investment decision-making process," said Preston Peacock, Head of ICE Data Indices, administrator of the new indices. "This new suite of climate indices will be an effective tool to track advancements in the repricing of climate risk in bond markets for researchers and investors."

The ICE Climate Risk Score serves as a singular assessment, ranging from 0.0 to 5.0, amalgamating all the ICE Sustainable Finance Platform's climate hazard models. It provides a comprehensive, relative measure of estimated total property risk stemming from physical climate hazards for a specific location, or a collection of locations related to the obligor.

"ICE research shows that, despite accelerating economic damages from severe weather, physical climate risk is not yet being priced into municipal bonds," said Evan Kodra, Head of Climate R&D at ICE. "That lack of pricing signal could obscure the true risk and perpetuate complacency around climate in the market. We are pleased to assist in the launch of new indices that can help address this, giving investors a consistent pulse on the climate-yield relationship and a benchmark for managing portfolio risk."

These new climate risk municipal indices join ICE's fixed income index offering, which includes approximately 6,000 standard indices tracking more than \$100 trillion in debt spanning the global bond markets, with debt represented across 51 currencies.

## [\*\*Massachusetts Spurs Transit Projects With \\$500 Million Muni Deal.\*\*](#)

- **The cash-strapped MBTA is breaking ground on repairs, projects**
- **The South Coast Rail will boost access to Boston for residents**

The commonwealth of Massachusetts is seeking \$490.7 million in municipal debt to help fund improvements for its commuter rail and other transportation projects throughout the state.

The deal, according to preliminary bond documents, is comprised of three series: \$150 million revenue bond series to fund the rail enhancement program, \$125 million sustainability bonds and \$215.7 million in revenue refunding bonds.

The sustainability bonds will finance construction for the Massachusetts Bay Transportation Authority's South Coast Rail Project, which will restore commuter rail service between Boston and southeastern Massachusetts — a region that historically hasn't had commuter rail access to the heart of the city.

### **[Commonwealth of Virginia: Fitch New Issue Report](#)**

The 'AA+' rating on the Virginia Commonwealth Transportation Board's Federal Transportation Grant Anticipation Revenue Notes (GARVEES), one notch below the commonwealth's 'AAA' Long-Term Issuer Default Rating (IDR), reflects the appropriation commitment on the part of Virginia's general assembly to pay debt service using all legally available funds, including funds derived from the commonwealth's general fund, should this be necessary. The one notch rating differential reflects the slightly elevated risk associated with non-appropriation. Virginia's 'AAA' Long-Term IDR and GO ratings reflect the commonwealth's substantial fiscal resources, careful management of fiscal operations and debt, and exceptional gap-closing capacity. The commonwealth's strong economic profile provides a stable revenue base and solid growth prospects for tax revenues. Virginia also maintains a low long-term liability burden relative to its economic resource base.

## [\*\*Fitch: Florida \(Re\)Insurers', Citizens' Ratings Unlikely Affected by Hurricane Helene\*\*](#)

Fitch Ratings-New York/Chicago-27 September 2024: Hurricane Helene, while resulting in the tragic loss of life and significant economic losses in affected areas, is not likely to affect credit ratings for property/casualty (P/C) (re)insurers, Citizens Property Insurance (Citizens; AA) or the Florida Hurricane Catastrophe Fund (FHCF; AA), Fitch Ratings says. This assessment is based on our initial estimate of an insured loss range from \$5 billion to \$10 billion, with anticipated individual insured losses that should remain within ratings sensitivities, ample capital levels and insurers' ability to increase premium rates.

Hurricane Helene, which made landfall in the sparsely populated Big Bend region of Florida as a Category 4 hurricane and moved through the southeast U.S. as a tropical storm, is expected to generate considerable economic and insured losses. Florida will be meaningfully affected by heavy rainfall, storm surge, flooding and high winds. However, Georgia's losses may exceed Florida's due to strong sustained winds across highly populated areas. The Carolinas, Tennessee and Kentucky are also likely to experience losses.

Standard homeowners' insurance does not typically cover flood damage. Private market flood insurance has grown, but remains less than 1% of industry direct premiums written, with the relatively small exposure limiting industrywide potential for loss. Fewer than 15% of homeowners buying insurance purchase primary flood insurance, with even lower take-up rates away from the coasts with less historical flooding. However, mortgage lenders require flood insurance if a homeowner has a federally backed mortgage and lives in a Federal Emergency Management Agency (FEMA) high-risk flood zone or if they have received prior FEMA compensation for flood damage.

## [\*\*Buffalo Bills Fans Snap Up Stadium Bonds in Tax-Shy New York.\*\*](#)

- **About 100 retail investors purchased the stadium bonds**
- **High-tax states tend to have stronger muni retail interest**

Buffalo Bills fans, fresh off a blowout win against the Jacksonville Jaguars, just scored another victory — this time in the municipal bond market.

Roughly 100 retail buyers placed orders for debt sold this week which will help finance the construction of a new \$1.7 billion stadium for the National Football League team in Orchard Park, New York. Fans in the highest-tax bracket would need to find a taxable security yielding about 7% to compete with the payout on the offering's 20-year bond. Treasuries would need to offer a yield of 5.83%.

That's because the debt is exempt from state and federal income taxes, a valuable haven in a state with one of the highest levies in the US.

## **[More Than \\$1 Billion in Low-Interest Loans Help Michigan Communities](#)**

## [Upgrade Water Infrastructure, Protect Health, Environment.](#)

Critical water system upgrades are in the works in dozens of Michigan communities thanks to \$1.05 billion in low-interest loans from the state revolving funds. The Michigan Department of Environment, Great Lakes, and Energy (EGLE) issued financing agreements to 72 projects in the Drinking Water and Clean Water state revolving funds across the state in fiscal year 2024.

These projects ensure safe drinking water is available for residents and reduce the risk of contaminants entering surface water and ground water. Funds for these low interest financing programs come from the Drinking Water State Revolving Fund and the Clean Water State Revolving Fund - mixes of federal and state dollars dedicated to financing community water infrastructure projects.

Requests for loan dollars were overwhelming, as cities, villages, and towns across Michigan struggle to maintain deteriorating water infrastructure. Properly functioning water systems are crucial to Michiganders' quality of life - from the water flowing from taps to the numerous lakes and streams that provide amazing recreational opportunities and flood control. Infrastructure is often taken for granted until it fails, impacting the well-being of people and the environment.

State Revolving Fund (SRF) interest rates are well below market rate and occasionally provide the opportunity for communities to secure principal forgiveness - a portion of the loan that does not have to be repaid. In fiscal year 2024, \$147.3 million in loan dollars were forgiven for communities with financial hardships.

Demand has outpaced available funds, however, with community requests for project financing totaling nearly three times available funding.

"These long-term, low-interest loans help protect public health and the environment, reduce pressure on communities to raise funds quickly for essential upgrades, and minimize the need for large user rate increases," said Paul McDonald, EGLE's chief financial officer. "We've seen historic demand for assistance from the state revolving funds. While we've been unable to meet the entire demand, it is gratifying to see projects come to life in communities large and small."

"The state revolving funds have provided financing for communities undertaking water infrastructure improvements over the past 30 plus years," said Kelly Green, administrator of EGLE's SRF programs. "It's a proven program with long term financing options at very low interest rates that help communities and infrastructure users meet their needs and set the table for long-term success."

Detailed information on the low-interest loans issued to communities this year can be found by accessing the SRF visual dashboard. The dashboard also contains information on every loan issued under the SRF programs.

Those interested in hearing more about EGLE grants and loans may subscribe to "EGLE grant and loan opportunities" communications and others at EGLE's email update sign-up webpage.

### **Descriptions of funding sources**

**Drinking Water State Revolving Fund (DWSRF):** Low-interest loan program to help public water systems finance the costs of replacement and repair of drinking water infrastructure to protect public health and achieve or maintain compliance with federal Safe Drinking Water Act requirements. As water systems repay their loans, the repayments and interest flow back into the

DWSRF to support new loans.

**Clean Water State Revolving Fund (CWSRF):** Used by local municipalities to finance construction of water pollution control projects. These projects include wastewater treatment plant upgrades and expansions, combined or sanitary sewer overflow abatement, new sewers designed to reduce existing sources of pollution, and other publicly owned wastewater treatment efforts that improve water quality. The CWSRF can also finance stormwater infrastructure projects to reduce nonpoint sources of water pollution caused by runoff to lakes, streams, and wetlands.

## **[Kansas Development Finance Authority \(State Revolving Fund\): Fitch New Issue Report](#)**

The loan portfolio is large, with 307 obligors, but concentrated, with the top 10 obligors accounting for about 59% of the portfolio total. The top two obligors, the city of Wichita and Johnson County, make up 23.1% and 9.5% of the portfolio, respectively. Acting in conjunction with the Kansas Department of Health and Environment, the authority provides below-market financing to municipalities in the state of Kansas for water supply and wastewater projects. Bond proceeds are combined with recycled funds from prior loans, federal grants and an EPA requirement for the state to provide matching funds for such projects. In aggregate, the top 10 obligors represent about 59% of the pool, generally in line with Fitch's 'AAA' median level of 57%. The city of Wichita's water system (water and sewer revenue bonds not rated by Fitch but assessed to be of very strong credit quality) is the largest obligor, approximating 23% of the total pool. Johnson County (GO bonds rated 'AAA' by Fitch) and the city of Salina (bonds not rated by Fitch but assessed to be of very strong quality) are the next two largest participants, accounting for 9.5% and 4.4% of the pool, respectively.

## **[Loop Taps Former Barclays, Ramirez Muni Bankers in Northeast.](#)**

- **Hires come during broad talent shift in municipal-bond market**
- **Scranton joins as head of surface transportation deals**

Loop Capital Markets has hired three public finance bankers as the Chicago-based investment bank expands in the Northeast amid a rebound in municipal-bond sales this year.

Jaimie Scranton joined Loop in Boston this month as a managing director and head of surface transportation deals, according to a statement from the bank. She most recently served as a senior banker at Barclays Plc.

Doug Adams joined in July to open a new office for Loop in Philadelphia. As a vice president, he will focus on higher education and transportation. He previously worked at Echo Financial Products, an advisory firm. Christopher Dinno joined Loop as an investment banking associate last month in New York. He previously worked for Ramirez & Co.

Representatives of Barclays, Ramirez and Echo didn't respond to emails seeking comment about the departures.

"We are looking to grow nationally, emphasizing Texas and the Northeast," Bo Daniels, Loop's head of public finance, said in the statement. "This new group of bankers further underscores that strategy, especially in the Northeast. The market is strong right now, and we expect that to continue into next year."

The hires come during a broader talent shift in the market after Citigroup Inc. and UBS Group AG largely exited the muni market. Loop is among a series of smaller banks now hiring from other competitors still active in the market, after recruiting earlier this year from the exiting firms.

In March, Loop announced it had hired three former Citigroup bankers and one from UBS to expand in Boston, Houston and San Antonio, according to a [statement](#).

In Thursday's statement, Loop Chairman and Chief Executive Officer Jim Reynolds said the firm sees "tremendous growth opportunities" in the market.

## **ICE: Municipal Bonds - Reliable Pricing for a Fragmented Market**

### **ICE's rules-based, transaction-driven approach provides a transparent representation of municipal market movement.**

The complex and fragmented municipal bond market - comprised of around one million securities and 50,000-plus issuers - has long been a challenge to price. Data can be scarce, dated, and not standardized. ICE has been working to address this challenge over the past few years, drawing on our expertise in evaluations and depth of our pricing data. Today, our expanded range of Municipal Coupon & Callability Curves cover four ratings buckets (AAA, AA, A, BBB) three coupon rates (3%, 4%, 5%) and nine call structures (from 10 to 2 years to first call). The curves are mid yield, yield to worst (YTW) curves, with a methodology that is rules-based, transaction-driven, and updates based on certain round lot trades reported to the MSRB's Real-time Transaction Reporting System (RTRS).

To appreciate what distinguishes our methodology, it's important to understand how municipal bonds are priced for trading in the secondary market, where a market participant typically refers to recent trades for the price paid in conjunction with other factors such as the size of the trade and spread to the municipal bond (or "muni") reference curve. The typical muni reference curve is a AAA 5% coupon with a 10-year par call which has traditionally been the most common new issuance borrowing structure of municipalities. If no recent trades are available or market conditions have changed so the last trade price is no longer relevant, other sources are consulted - such as trades involving bonds with similar characteristics. That's where yield curves have a part to play in collating market color. Many participants are turning to ICE's AAA Municipal Yield Curve as the key reference curve in both primary and secondary markets due to its rules-based, transaction-driven framework. This provides a more transparent representation of municipal market movement than traditional methods of curve construction, which typically use a consensus approach.

Following the launch of ICE's AAA Municipal Yield Curve, its live pricing could be applied to as much as 80% of the one million active municipal bond securities universe. Yet ICE's municipal bond team recognised its limitations: not every bond has a 5% ten-year par call structure throughout its life. Using the AAA curve as a base, they built lower-level coupon and call curves from observed trades that met certain criteria. As criteria-acceptable trades are applied to the model, the curves are updated to reflect changes in current market conditions. This means the impact of any curve movements can be applied to a large swathe of bonds quickly- a more effective way to pass through market color to a larger set of comparable bonds. A survey-based approach would struggle to reflect market conditions in this manner.

The spreads from ICE's expanded curve set can update several times a day - but no less frequently than daily - and ICE's team aims to track and reflect the institutional mid yield of each maturity point of the curves. Trades fitting the selection criteria are each associated with a curve and its interpolated tenor yield. Several checks are included to maintain curve consistency across rating, coupon, call and curve shape, while a proprietary optimizer solves for the best suite of curves that minimizes total trade to curve spread differences. The curves are fitted through the middle of the selected trades for a particular curve, so each curve represents the average, or mean credit. ICE's evaluators are also on hand to provide oversight on curve behavior. Importantly, these curves are used daily to apply intraday and end-of-day market moves to most of the investment grade municipal bond universe evaluated by ICE. Intraday updates to the curves support ICE's Continuous Evaluated

Pricing™ while the end-of-day curves are used to support ICE end-of-day municipal evaluation.

The development of ICE's expanded municipal curve offering was well underway when the most recent rate hike cycle began in March 2022. These rate hikes – unprecedented in their pace and magnitude – contributed to a market sell-off amid fears of a potential recession. This saw a growing number of outstanding municipal bonds fall into de minimis territory, with ICE estimating a third of tax-exempt munis were affected at the height of the sell-off. In addition, December 2022 saw the ICE Municipal AAA yield curve invert for the first time in history; a dynamic that persists with the two- to -10-year segment of the municipal yield curve. These factors – a drastic rate hike cycle, muni yield curve inversion, and thousands of bonds breaching de minimis – upended recent pricing relationships, underscoring the need for a broader set of municipal bond curves for use in evaluated pricing. These curves can be a valuable input for firms looking to partially or fully automate their trading on municipal securities. While ICE's evaluations take in and apply more market data than just the curves, the curve suite is now one of the main drivers of evaluation movement.

## **[SOLVE Debuts AI-Driven Predictive Pricing Platform for the Municipal Bond Market.](#)**

NEW YORK, Sept. 17, 2024 (GLOBE NEWSWIRE) — SOLVE, the leading provider of pre-trade data and predictive pricing for fixed income securities markets, is debuting SOLVE Px™, the firm's proprietary, AI-driven predictive price data for the municipal bond market. SOLVE Px will provide SOLVE's buy and sell-side customers with unprecedented visibility into "next-trade" pricing data on over 900,000 municipal bonds.

SOLVE's platforms—including SOLVE Quotes™, which provide price transparency data on over 20 million daily quotes and more than 1,250,000 securities across different asset classes—are already being used by investment, trading, and valuation experts across the fixed income market. SOLVE Px is the newest addition to a slate of products designed to give the fixed income investment ecosystem access to insights that enable better trading decisions, including for municipal bonds that are infrequently quoted and traded.

"One of the unique challenges in the municipal bond market is the sheer number of outstanding CUSIPs and the lack of pricing transparency on the vast majority of them. This makes valuing specific munis very time-consuming and market participants do not have the confidence that they have all the relevant information to make sound relative value decisions," said SOLVE founder and CEO Eugene Grinberg. "By tapping into our unparalleled quotes data and leveraging AI's ability to see in many dimensions, SOLVE Px lets front-office municipal bond professionals price munis with confidence and identify investment opportunities."

SOLVE Px leverages data from the extensive SOLVE Quotes database and is based on an AI Prediction Model powered by nearly 300 feature inputs. This Prediction Model is re-trained daily to adjust dynamically to constantly evolving market conditions. SOLVE Px incorporates real-time Quotes, trades, and reference data to produce predictive prices in real time.

"We leveraged our deep muni market relationships as we developed our predictive pricing platform,

sought industry feedback, and performed rigorous back-testing to ensure Px meets the high standards of our diverse client base. Our output, Px, is a unique platform that delivers predictive prices for the buy and sell sides and at the trade size that makes sense to our clients,” said Gregg Bienstock, Group Head of Municipal Markets. “This is just the beginning as we move to expand this offering with tools for relative value and as we move to other asset classes.”

SOLVE Px has proven highly accurate over its year-long testing period and will bring many competitive advantages to SOLVE’s customers.

Key Benefits Include:

- Unmatched predictive accuracy – SOLVE Px is a highly accurate prediction model that enables sell-side and buy-side investors to execute trades with better and more informed data. SOLVE Px’s median absolute yield error of just 5-6 bps significantly improves trading outcomes.
- Relative Value – SOLVE Px, by accurately pricing virtually every security in the municipal asset class, is uniquely suited for various Relative Value exercises, including rich/cheap bond vs. bond, bond vs. cohort, or cohort vs. cohort analyses and visualizations.
- Breadth of coverage – Access to the largest suite of price transparency-driven data and analytics – Including Quotes that come from parsing a client’s own messages with AI, Quotes that come from other contributing clients, and tools to identify comparisons and generate representative pricing.

SOLVE Px is available now and predicts the next trade price for over 900,000 fixed coupon bonds, representing 99% of all fixed coupon bonds and over 93% of the entire universe of live municipal bonds.

To learn more about SOLVE Px, please visit <https://solvefixedincome.com/solve-px>.

About SOLVE

SOLVE is the leading market data platform provider for fixed-income securities, trusted by sophisticated buy-side and sell-side firms worldwide. Founded in 2011, SOLVE leverages its proprietary Deep Market Insight™ to offer unparalleled transparency into markets, reduce risk, and save hundreds of hours across front-office workflows. With the largest real-time datasets for Securitized Products, Municipal Bonds, Corporate Bonds, Syndicated Bank Loans, Convertible Bonds, CDS, and Private Credit, SOLVE empowers clients to transform the way they bring new securities to market, trade on secondary markets, and value highly illiquid securities. Headquartered in New York, with offices across the globe, SOLVE is the definitive source for market pricing in fixed-income markets. For more information, visit <https://solvefixedincome.com>.

\*SOLVE Px does not constitute Investment Advice and does not seek to value any security and does not purport to meet the objectives or needs of specific individuals or accounts.\*

## **[California Community Choice Aggregator Issues Third Pre-Pay Green Bond.](#)**

Clean Power Alliance on Sept. 12 said it has issued its third municipal non-recourse Clean Energy Project Revenue Bond through the California Community Choice Financing Authority.

The \$1.524 billion bond issuance is expected to reduce CPA's renewable energy costs by an estimated \$93 million over the initial eight-year period of the bond, or an average of \$11.6 million annually.

The savings from this prepay transaction are locked in until 2032, at which time the bond will be repriced.

Founded in 2017, Clean Power Alliance is the locally operated not-for-profit electricity provider for 33 cities across Los Angeles County and Ventura County, as well as the unincorporated areas of both counties.

The bond received an investment-grade A1 rating from Moody's and a 'Green Bonds' designation by Kestrel Verifiers.

CPA issued its first two Clean Energy Project Revenue bonds in February 2023 and April 2023, respectively. The three bond issuances are expected to generate total annual savings of approximately \$25.3 million.

Energy prepayment bonds are long-term financial transactions available to public agencies like CPA to provide power procurement cost savings.

A Clean Energy Project Revenue Bond is a form of wholesale electricity prepayment that requires three key parties: a tax-exempt public electricity retailer (CPA in this transaction), a taxable energy supplier (J Aron & Company, LLC in this transaction), and a municipal bond issuer (CCCFA in this transaction)

The three parties then enter into long-term power supply agreements for zero-emission clean electricity sources such as solar, wind, geothermal, and hydropower. The municipal bond issuer issues tax-exempt bonds (underwritten by Goldman Sachs in this transaction) to fund a prepayment of energy that will be delivered over 30 years.

The energy supplier provides a discount to the tax-exempt public electricity retailer in exchange for the prepayment of power purchases funded by the bond proceeds.

CPA has assigned three solar-plus-storage power purchase agreements to this prepay transaction. The bond will be utilized to prepay the purchase of a combined capacity of 854.5 megawatts of renewable energy.

For the bond, CPA was advised by municipal financial advisor Municipal Capital Markets Group and by the law firm Chapman & Cutler.

**[Orrick: Portland International Airport Opens Main Terminal After \\$2 Billion+ Renovation](#)**

Passengers at Portland international Airport are coming and going through a new terminal, part of a broader renovation that also includes enhancements to parking and rental-car areas.

Orrick has served as bond and/or disclosure counsel for the Port of Portland in five financings totaling \$2.2 billion since 2019. Those financings provided funding for the renovation work, including a \$589.9 million financing that closed around the same time as the new terminal opened August 14.

#### THE COMPANIES

The Port of Portland operates Portland International Airport and two other airports as well as four marine terminals and five business parks.

With hundreds of employees, the Port is an economic engine for transforming the region into a place where everyone is welcome, empowered, and connected to the opportunity to find a good job or grow their business.

#### THE IMPACT

Built and designed by more than 30,000 local craftspeople, the terminal offers more places to eat, drink and shop. It has “double the capacity but keeps the heart and character of the airport that consistently ranks among travelers’ favorites,” the Port said.

“Our focus throughout this entire project was: How do we reflect the pride and love we all have for the region in the new PDX?” said Curtis Robinhold, executive director for the Port of Portland. “It was a lot of local love for the Pacific Northwest that made it all happen.”

The terminal includes new airline check-in areas, a public space with stadium seating and a mezzanine restaurant, a streamlined security process and 11 local shops and restaurants.

Work from now until 2026 will add more shops and restaurants, more escalators and elevators to the arrivals level, shorter walks to and from airline gates and new airline VIP lounges, among other things.

#### THE TEAM

Greg Blonde and Christine Reynolds led the Orrick teams that have advised the Port of Portland on five financings since 2019. The teams also included John Stanley, Mayling Leong, Leslie Conrad Krusen IV, Alexandra Bartos-O’Neill and Angie Gardner.

### **[State of Illinois: Fitch New Issue Report](#)**

The State of Illinois’ ‘A-’ Long-Term IDR reflects solid operating performance that nonetheless remains weaker than that of most other states. Illinois has a long record of structural imbalance primarily related to pension underfunding, offset by continued progress toward more sustainable budgeting practices. The rating also reflects the state’s elevated long-term liability position and resulting spending pressure. Illinois’ deep and diverse economy is growing slowly, but still provides a strong fundamental context for its credit profile.

## **[Phillips Academy Andover Prepares \\$54 Million Muni Bond Sale.](#)**

- **Andover plans to use proceeds to refinance existing debt**
- **School's endowment was valued at \$1.4 billion in June**

Phillips Academy Andover, a top prep school that counts two former US presidents among its alumni, is tapping the municipal bond market to pay off existing debt.

Andover is slated to issue \$53.7 million of bonds through the Massachusetts Development Finance Agency on Thursday, preliminary documents show. Proceeds of the offering will be used for refinancing and terminating an interest-rate swap, as well as paying for issuance costs, according to the prospectus.

The alma mater of both Presidents George H. W. Bush and George W. Bush, Andover joins a smattering of private schools that have come to the state and local debt market of late. Earlier this summer, St. Ignatius College Preparatory sold muni bonds in California to revamp its campus, while Massachusetts' the Wheeler School raised debt in April.

## **[NY's JFK Airport Developer Preps \\$1.5 Billion Muni Bond Sale.](#)**

- **Borrower targets tax-exempt muni sale for Oct. 8 at earliest**
- **The airport is in the midst of a large renovation project**

The developer behind a major renovation of John F. Kennedy International Airport is preparing a \$1.5 billion municipal bond sale next month.

JFK Millennium Partners is considering tapping the market with a tax-exempt issue to refinance outstanding obligations issued in 2022, according to a regulatory filing posted this week to the Municipal Securities Rulemaking Board's EMMA website. That debt includes bank loans and an initial series of bonds issued with the Royal Bank of Canada.

The group behind the public-private partnership is in the process of developing the airport's new Terminal 6, which is expected to be 1.2 million square feet and cost \$4.2 billion. The first gates at the terminal are expected to open in 2026 with the project finishing two years later.

Construction began on the terminal in February 2023. The new terminal, which is set to have food offerings like Italian-sandwich shop Alidoro and Momofuku founder David Chang's Fuku, is part of a larger \$19 billion overhaul of the airport in Queens. The new terminal will also include features like touchless check-in technology and a taxi plaza.

The municipal bonds would be sold though the New York Transportation Development Corporation

and could be priced as early as Oct. 8. The sale would be underwritten by a group led by Goldman Sachs and Siebert Williams Shank, according to the filing.

### **[Philadelphia College Files Bankruptcy After Shock Closure.](#)**

- **University of the Arts bond trustee sought accelerated payment**
- **School abruptly closed its doors in June, shocking students**

The University of the Arts, a private college in Philadelphia that abruptly closed its doors in June, filed bankruptcy Friday, two weeks after it faced a demand by its bondholders for immediate repayment of more than \$50 million in debt.

The school listed assets and liabilities of \$50 million to \$100 million, in a petition for Chapter 7 liquidation filed in the US Bankruptcy Court in Delaware. The school's board of trustees held a special meeting on Sept. 5 to approve the filing. It was subsequently approved by 17 of 18 board members.

The closing of the school came as a shock to students, parents and staff who were only given a week's notice. The action spurred protests at its campus as well as multiple legal actions.

### **[Orrick: The Largest Energy-as-a-Service Health Care Transaction in U.S. History: Adventist Health and Bernhard Enter Into 30-Year Lease and Concession](#)**

Adventist Health, a faith-based nonprofit health system across the West Coast and Hawaii, has entered into a 30-year energy-as-a-service concession and lease with Bernhard.

Orrick advised Adventist and served as bond counsel. The project involves a \$457 million tax-exempt project financing and investment in energy-related infrastructure systemwide.

Bernhard will support Adventist as a long-term developer to optimally and most efficiently operate and maintain the new and existing energy assets, including renewable energy assets and central utility plants.

The guaranteed utility cost savings as a result of the improvements are structured to offset the design, construction, financing and operations and maintenance costs for the project. This tax-exempt financing structure was novel in that it used a special purpose not-for-profit entity formed by the broader Adventist organization to support this transaction. It also included multiple bond issuers to finance improvements in three different states.

## **California Munis in Trouble.**

California's [high-yield municipal bonds](#), intended to fund housing for essential workers like police officers and teachers, are under financial stress. The state issued between \$8 billion and \$10 billion in speculative municipal bonds to convert existing apartments into affordable housing for middle-income families, but these projects are now struggling due to rising interest rates and declining occupancy.

Local agencies often borrowed beyond the purchase price, assuming high occupancy would cover expenses, but that assumption has proven risky as the economic landscape shifts. The bonds, many of which were sold when interest rates were historically low, now face significant challenges as financial conditions tighten.

Experts are increasingly doubtful about the sustainability of this workforce-housing model, which has not yet been tested across different economic cycles.

## **Metropolitan Water District of Southern California: Fitch New Issue Report**

The 'AA+' ratings reflect MWD's very low leverage, measured as net adjusted debt to adjusted funds available for debt service (FADS), within the context of the district's very strong revenue defensibility and operating risk profiles, both assessed at 'aa'. Between fiscal 2018 (FYE June 30) and 2022, leverage, measured as net adjusted debt to adjusted FADS, ranged between 5.4x and 6.5x. However, lower demand due to drought conservation measures weakened FADS and overall performance in fiscal 2023 and drove leverage up to 8.2x. Based on estimated actual performance in fiscal 2024, leverage could increase further, potentially approaching 12.0x, largely the result of sustained lower demand as purchasers utilized more of their respective local supplies rather than purchasing from MWD. Positively, action taken by MWD's board of directors (the board) in adopting its current biennial 2025 and 2026 budget increased both water rates and property tax rates. The increases are expected to drive improved margins and performance beginning in fiscal 2025, which should bring performance and leverage back in line with the current rating. Fitch's Analytical Stress Test (FAST) also points to declining leverage thereafter, supportive of the current rating and

Outlook.

## **Texas Officials Sued Over Anti-ESG Law Targeting Wall Street.**

- **American Sustainable Business Council sues state officials**
- **Lawsuit argues the Texas legislation is unconstitutional**

The American Sustainable Business Council sued Texas officials in an effort to block a law that restricts state investments with certain financial firms because of their energy policies.

The lawsuit filed Thursday in federal court in Austin, argues the 2021 state law is unconstitutional and it seeks to “coerce and punish” businesses seeking to reduce reliance on fossil fuels.

The group — a nonprofit that represents thousands of businesses and advocates for environmentally-friendly policies — sued Texas Comptroller Glenn Hegar and the state’s Attorney General Ken Paxton, who have been vocal supporters of the measure. In the lawsuit, it argued that the law overstepped and went against the First Amendment.

## **San Antonio (TX): Fitch New Issue Report**

The ‘AA’ bond ratings along with the ‘aa’ Standalone Credit Profile (SCP) reflect SAWS’ combined water and sewer system’s (the system) very strong revenue defensibility assessment of ‘aa’, supported by its fundamental role as the sole water and sewer service provider to a broad service area with very favorable demographic trends. Its very strong operating risk assessment of ‘aa’ incorporates ample and diversified water supplies, a very low operating cost burden and strong levels of capital investment. The system’s leverage, measured as net adjusted debt to adjusted funds available for debt service (FADS), measured 6.0x in fiscal 2023 (FYE Dec. 31), up slightly from the prior year’s level of 5.9x. The increase was the result of a residential rate decrease, which was mostly revenue neutral (less than 2% decline from year prior) because of offsetting rate increases to other customer classes, in conjunction with an increased debt burden. The revision of the Outlook to Stable from Positive reflects an updated view on the system’s leverage, which is now expected to modestly exceed 7.0x in upcoming years. After the residential rate decrease in fiscal 2023, rates were further held flat in fiscal 2024 compared to previous expectations that incremental adjustments would be implemented beyond fiscal 2023.

### **Texas Water Development Board: Fitch New Issue Report**

The 'AAA' rating reflects the ability of the SWIRFT program's (the program) financial structure, and funding mechanisms, to absorb hypothetical pool defaults in excess of Fitch's 'AAA' stress scenario without causing an interruption in bond payment. Aggregate pool credit risk is measured using Fitch's Portfolio Stress Model (PSM), and the strength of the program's financial structure is measured using Fitch's Cash Flow Model (CFM). The PSM's liability stress hurdle is measured against the CFM's breakeven default tolerance rate to produce a model-implied rating. A positive net difference (the default tolerance less the hurdle) in the calculation suggests a passing model output at a given rating stress. Additionally, given the nonstandard investments of the program, Fitch also applied stress to its approximately \$1.8 billion in outstanding investments to create a Fitch-modelled investment stress scenario, as per Fitch's criteria.

---

### **Arizona Water Infrastructure Finance Authority: Fitch New Issue Report**

The 'AAA' rating reflects the ability of the Water Authority Infrastructure Authority of Arizona's (WIFA or the authority) Master Trust Indenture (MTI) program's (the program) financial structure to absorb hypothetical pool defaults in excess of Fitch's 'AAA' stress scenario without causing an interruption in bond payments. Aggregate pool credit risk is measured using Fitch's Portfolio Stress Model (PSM), and the strength of the program's financial structure is measured using Fitch's Cash Flow Model. The loans pledged are made by the authority pursuant to state legislation from the authority's Clean Water Revolving Fund and the Drinking Water Revolving Fund (together, the SRF pledged pool). The SRF pledge pool produces a 'AAA' liability stress hurdle of 40.0% in the PSM. On an annual basis, Fitch's cash flow modeling demonstrates the program can continue to pay bond debt service with a default tolerance rate of 100% through the anticipated October 2027 maturity of the series 2024 bonds without an interruption in debt service. As the default tolerance exceeds the 'AAA' stress hurdle, this implies a passing result under Fitch's criteria.

### **[Florida Boomtown Borrows Millions to Help Fix Bursting Jail.](#)**

- **Pasco County had seen a large population gain in 2023**
- **Bond sale priced on Thursday in a negotiated transaction**

A county close to Tampa, Florida, is one of the fastest growing in the US and the influx of new residents is causing a problem — its local jail is bursting.

Pasco County — located on Florida's Gulf Coast — borrowed \$65 million from municipal bond investors this week to help finance capital projects including an expansion of its local correctional facility to add about 500 new beds, according to bond documents. A portion of proceeds will also be used to fund improvements to local parks including athletic fields and a recreation complex.

The new Pasco County Corrections Center broke ground last year and construction is expected to be completed in the spring of 2026. The project comes after surging population growth in the area. The county saw a 27% increase in residents over the past decade, with growth accelerating the last several years after slew of office relocations and sports facilities made it a regional center for jobs.

### **[Why Miami Struggled to Sell its First Forever Bonds.](#)**

Larry Spring has overseen the sale of hundreds of millions of dollars of government bonds during his career. But his roughest day was mid-June when the city of Miami first sold its Forever Bond to investors.

“It was a tough day,” Miami’s Chief Financial Officer reflected several weeks later. “I’ve been affiliated with the city for 20 years and it was actually my worst day in the market ever.”

The city was borrowing its first Miami Forever Bond. That is the name of a borrowing plan approved by voters in 2017. The plan calls for borrowing \$400 million to spend on five areas: floodwater protection, roads, parks, public safety and affordable housing.

The city started spending the money a year after the vote. But it didn’t actually borrow the money until this summer when the city went looking for investors to lend it its first \$179 million dollars. That was in June.

### **Texas Drought Forces Small Town to Default on Water System Debt.**

- **Clyde, Texas, missed its Aug. 1 municipal bond payment**
- **The action caused S&P to drop debt rating from A- to D**

A persistent drought in Texas is hurting the finances of a small town, making it unable to pay bondholders in a rare instance of climate-related default.

The city of Clyde, located roughly halfway between Dallas and Midland, informed investors it couldn't make a debt payment due in August, according to a securities filing. Instead, its bond insurers — Assured Guaranty and Build America Mutual — were asked to cover the payment, illustrating the financial strain facing the city.

“Such draw is unscheduled and reflects financial difficulties of the issuer, including without limitation financial difficulties resulting from increased costs related to operations and maintenance of the issuer’s waterworks and sewer system,” the filing dated Aug. 15 read. The bonds were sold to support the city’s water and wastewater system.

That caused S&P Global Ratings to drop the grade on the bonds to D from A-, a whopping 15-notch downgrade, according to a report from the company late Friday. It also cost the city its A- credit rating, as S&P downgraded Clyde’s general-obligation debt to B, which is below investment-grade.

Analysts led by Misty Newland wrote that “a lack of willingness to pay an unconditional debt obligation results in a rating cap.”

Clyde is a commuter community near Abilene, and is home to about 4,000 residents. Roughly one-third of Callahan County, where it’s located, is facing a moderate drought. The city has been implementing a drought-contingency plan for several years, which includes double-digit water reductions. Following the restrictions, the town’s water sales decreased — which hit revenues.

On Aug. 1, the day the bond payment was due — Clyde issued a “water emergency” notice, outlining “severe water shortage” conditions with the intention of reducing usage by 30%.

Local government bond defaults are incredibly rare, with those caused by climate-related events all but unprecedented. While bondholders will be made whole because the debt is insured, Clyde’s financial challenges are a stark reminder that the \$4 trillion municipal bond market isn’t without risk and extreme weather can pose a threat.

Texas is the epicenter of such weather events in the US, and has faced multiple disasters this year. Hurricane Beryl knocked out power in Houston for days in July. A May derecho punched windows out of skyscrapers in the city and a storm that month dropped hailstones the size of DVDs near Lubbock. The largest wildfire in state history burned more than 1 million acres in the panhandle in February and March.

Currently, more than 30% of Texas is experiencing drought conditions, according to the US Drought Monitor. The most extreme issues are in western part of the state, but almost all of North Texas is facing dryness. Governor Greg Abbott has issued a drought disaster proclamation for the state.

To help reduce water usage, officials in Clyde have prohibited the use of water for cleaning sidewalks and driveways. Only new lawns at residents' homes can be watered, not existing ones.

The drought has affected life in other ways. Some residents were unhappy that a splash pad — which is a playground of sprinklers used by children — wasn't working, according to local news station KTXS.com.

"Would you rather have your splash pad running so your kid can spend two hours a day in the water there, or do you wanna be able to bathe your kid with water at your house?," the mayor told KTXS.com.

Michael Stanton, head of strategy and communications at Build America Mutual, said in an emailed statement that the company's insurance protected investors. "Although this is a small exposure, our team is in contact with city officials and their professional advisors and will continue to represent bondholders' interests in those discussions," the statement read.

Robert Tucker, senior managing director of investor relations and communications at Assured Guaranty, said in a statement that bondholders would be protected. "The type of situation Clyde, Texas, encountered - unexpected conditions leading to the non-payment of debt service - is exactly what our bond insurance is designed for," he said.

## **[Houston Schools Propose Largest Debt and Property Tax Increase in Texas History.](#)**

**Voters would have to approve a \$4.4 billion bond package in November, to be financed by property tax increases over 33 years. Including interest, the package would cost \$11 billion.**

The Houston Independent School District board voted last week to pass a \$4.4 billion bond proposal. This total excludes the interest on the principal. When included, it brings the total debt obligation to nearly \$11 billion.

To pay for it, the board will authorize levying new, additional property taxes over 33 years, if voters approve the proposal in November. Taxpayers would be saddled with additional debt and taxes through 2058, according to the bond certificate filed by the district.

This is the largest debt and property tax increase proposal in state history.

## **[Peace River Manasota Regional Water Supply Authority \(FL\): Fitch New Issue Report](#)**

The 'AA' rating on the revenue bonds and 'AA' Issuer Default Rating (IDR) reflect Peace River Manasota Regional Water Supply Authority's 'Very Strong' financial profile in the context of its 'Very Strong' revenue defensibility and operating risk profile, as well as the very strong credit quality of the authority's two largest wholesale customers — Sarasota County, FL (utility system rated 'AA+') and Charlotte County, FL. The authority's revenue defensibility is supported by strong contract provisions with the ability to reallocate costs, limiting bondholder exposure to individual members. The purchasers' obligation to make payments to the authority is unconditional and payable as an operating and maintenance expense of their respective utilities based on proportional water use. The authority's operating risk assessment reflects a very low operating cost burden and moderate life cycle investment needs. The revision of the outlook to Negative from Stable reflects the authority's projected increases in leverage, measured as net adjusted debt to adjusted funds available for debt service (FADS), as it works through a capital-intensive period driven by surface water expansion projects to meet growing demand. Leverage registered 6.1x in fiscal 2023 and is expected to grow substantially to 17.8x in fiscal 2025 in Fitch's rating case scenario.

## **[McKinsey: Will Mortgages and Markets Stay Afloat in Florida?](#)**

**Flood risk is rising in Florida due to climate change. How exposed is residential real estate—both directly and indirectly—and what can be done to manage the risks?**

Located in a tropical cyclone zone with low elevation and an expansive coastline, Florida faces numerous climate hazards, including exposure to storm surge and tidal flooding that are worsened by sea level rise, and heat stress due to rising temperatures and changes in humidity. Other unique features include the state's porous limestone foundation which can exacerbate flooding as water seeps into properties from the ground below and also causes saltwater intrusion into water aquifers, and makes adaptation challenging.

Much of Florida's physical and human capital is located along its vulnerable coast. Two-thirds of the state's population lives near the coastline, exposing many of them to tidal flooding, and almost 10 percent is less than 1.5 meters within sea level. At the same time, Florida's economy depends heavily on real estate. In 2018, real estate accounted for 22 percent of state GDP. Real estate also represents an important part of household wealth for the 65 percent of Floridians who are home owners: primary residences represent 42 percent of median home owner wealth in the United States.

In this case study, we focus on residential property in Florida exposed to flooding from storm surges and to tidal flooding and assess the likely impact both in terms of direct and knock-on effects, for example through housing price adjustments (See sidebar: An overview of the case study analysis).

## **[Sixth Circuit Considering Whether Placing a Water Lien on a Property Could Violate the Fair Housing Act.](#)**

In 1968, the Federal Fair Housing Act (FHA) was enacted to protect individuals from discrimination based on certain protected characteristics when they are renting or buying a home, getting a mortgage, seeking housing assistance, or engaging in other housing-related activities. However, a recent class action lawsuit—which is currently on appeal before the federal Sixth Circuit—seeks to stretch one provision of the FHA further than any other case before it, with significant consequences to municipalities.

Under 42 U.S.C. § 3604(a), which codified Section 804 of the FHA, it is unlawful to “make [housing] unavailable” to individuals based on those protected characteristics. Actions such as redlining, discriminatory pricing, racial steering, and discriminatory appraisals have all been held to violate § 3604(a).

But in 2019, a group of individuals filed a class action against the City of Cleveland, Ohio, under § 3604(a). See *Picket et al. v. City of Cleveland*, Case No. 19-cv-2911 (N.D. Ohio). Their claim? That Cleveland makes housing unavailable when it certifies a tax lien against a property when the owner or tenant has let their water bill become seriously delinquent. (State law allows cities to certify liens in that circumstance, and the plaintiffs do not challenge that authorization.)

## **[NJ Lines Up \\$2.4 Billion Muni Bond Sale for Transportation Fixes.](#)**

- **A state trust fund will invest billions to modernize transit**
- **The bonds were assigned an ‘A’ rating by Fitch Ratings**

New Jersey is poised to sell \$2.4 billion of bonds for its transportation infrastructure, according to a report from Fitch Ratings.

The New Jersey Transportation Trust Fund Authority is expected to issue \$1.3 billion of transportation system bonds and roughly \$1.1 billion of transportation program bonds through a negotiated sale in October, the Fitch report said.

The fund is charged with modernizing statewide transportation infrastructure like highways and bridges as well as providing additional capital funding for NJ Transit — New Jersey’s public transit agency. The state is expected to extend as much as \$8.8 billion in bonding authorization to the authority over the next five years, or approximately \$1.76 billion annually, according to a March press release.

### **Casino Reinvestment Development Authority, New Jersey: Fitch New Issue Report**

Future growth is likely to resemble pre-pandemic trends, with longer-term growth prospects limited, supporting a ‘bbb’ assessment. Factors potentially affecting long-term growth include the effects of competing regional gaming options, online gambling and sports betting. The sharp rebound in pledged revenue following pandemic-related shutdowns in 2020 has rebuilt the structure’s cushion against volatility relative to recent years. Additional leverage in the current sale modestly reduces the structure’s cushion against future revenue volatility, but resilience remains consistent with an ‘a’ assessment. The Casino Reinvestment Development Authority is an instrumentality of the State of New Jersey, which is the collection agent for luxury taxes. The brief deposit of these revenues in the state’s general fund caps the rating at New Jersey’s Issuer Default Rating (IDR) of ‘A+’/Stable; this is not currently a rating factor for the bonds given that the bond rating is four notches below the state’s IDR. Pledged revenues are separate from the financial operations of the city of Atlantic City.

### **Penn State Will Likely Take On Up to \$700M in Debt for Beaver Stadium Upgrades. How Will It Pay It Back?**

STATE COLLEGE — Penn State is prepared to take on up to \$700 million in debt to renovate Beaver Stadium, a price tag drawing scrutiny at a time when the university is implementing steep budget cuts and offering buyouts to some employees.

The school has emphasized that the athletics department, which has a self-sustaining budget, will pay back the debt and interest incurred through the renovation process. Students’ tuition and taxpayer dollars will not fund the project, the university has said.

However, Penn State University is likely to take on the necessary debt rather than the athletics department. One expert told Spotlight PA this setup is typical for universities and allows an organization like Penn State to secure better financing costs.

Penn State generally uses its standing as a public university with tens of thousands of tuition-paying students to secure bonds and provide financial backing for debt, according to a review of bond documents. For example, last year Penn State sold \$204 million in bonds under the university's authority. That sale was used in part to finance "replacements to and renovations of Beaver Stadium," though the university said at the time the bonds would be repaid by athletics.

Penn State declined to make an official available for an interview for this story. A university spokesperson wrote in an email that the university's support for the project "is a signal of the commitment to bettering our student-athletes' experience and as a land-grant university, elevating Beaver Stadium's significance in driving local and state economies."

Christopher Collins, vice president and senior municipal credit analyst at Moody's Ratings, told Spotlight PA that although universities could have specific departments take out debt — perhaps as a way to increase accountability — issuing bonds through the entire university lowers financing costs. A university generally has a better credit rating, and a wider source of possible repayment, than a specific department, said Collins, who has analyzed Penn State's credit rating.

Some university trustees questioned what would happen if Penn State defaults on the debt. Penn State's athletic department reported \$126,000 in profit off of a \$202 million total budget in fiscal year 2023.

## **[Buffalo's Home County to Issue 'Bills Bonds' for NFL Stadium.](#)**

When it comes to the construction of the Buffalo Bills' \$1.7 billion new stadium, local officials are taking the concept of "public financing" to a new level.

On Sept. 24, Erie County in western New York will offer fans the opportunity to buy "Bills bonds" toward the development of the new facility being built next door to Highmark Stadium. The county is issuing \$125 million in bonds to pay half of its portion toward construction.

The county is offering the bonds to individuals for a single day before it offers them to outside investors.

"This is a once-in-a-generation opportunity," county comptroller Kevin Hardwick said in a radio interview on Monday, "and there might be some average Bills fans out there who normally do not invest in municipal bonds, who might be interested in saying to themselves or telling their grandchildren that I had a hand in helping construct that stadium."

The minimum investment for the bond is \$5,000. The website for the bond offering indicated that "the Series 2024B Bonds are general obligations of the County and are not an obligation of the Buffalo Bills."

Sportico has reached out to the Erie County's comptroller office as well as the Bills, but has not heard back.

Construction of the new Highmark Stadium is being funded largely by taxpayers in one of the most controversial stadium financing deals in recent memory. In March 2022, New York Gov. Kathy Hochul, herself a Buffalo native, announced a deal between the Bills, the state and county to develop

the 62,000-seat, open-air stadium in Orchard Park next door to the team's current home.

Of the \$1.4 billion in financing, the state will contribute \$600 million while Erie County will put in \$250 million. The NFL will loan \$200 million to the Bills, and the team itself will add \$350 million. The \$850 million in state and county contributions are the largest public subsidy ever committed to the development of an NFL stadium. The team will have a 30-year lease for the new field, which will officially be owned by the state.

Healthcare insurer Highmark Blue Cross Blue Shield of Western New York is carrying on its naming rights deal from the current building, which originally opened as Rich Stadium in 1973, to the new stadium. The current Highmark Stadium was also known as Ralph Wilson Stadium after the late founding owner, and New Era Field until the insurer took the rights in 2021.

In April, the Pegula family retained Allen & Company to facilitate the sale of a non-controlling minority stake in the Bills, with a reported "working figure" of 25% to be offered. The Bills are worth \$5.03 billion, according to Sportico's latest NFL franchise valuations, published last week. Buffalo ranks 23rd among all 32 teams, jumping three spots compared to one year ago, as the price tag rose by 23%.

## **[New York City, New York: Fitch New Issue Report](#)**

New York City's 'AA' Long-Term IDR and GO bond ratings reflect New York City's exceptionally strong budget monitoring and controls, supporting Fitch Ratings' 'aa' financial resilience assessment given the city's 'high' revenue control, 'mid-range' expenditure control and Fitch's expectation that the city will maintain reserves at or above 7.5% of spending. For the purposes of this calculation, Fitch includes unrestricted general fund reserves (the sum of committed, assigned and unassigned), the available balance in the retirees' health benefits trust (RHBT) and the fiscal year-end budget stabilization and discretionary transfers of surplus for prepayment of certain of the following year's operating expenditures. The available balance as of fiscal year-end 2023 was \$12.8 billion, equal to 11.8% of expenditures and transfers out.

## **[The City of New York Announces Successful Sale of \\$1.8 Billion of General Obligation Bonds.](#)**

The City of New York (the "City") announced the successful sale of \$1.8 billion of General Obligation bonds, comprised of \$1.5 billion of tax-exempt fixed rate bonds and \$300 million of taxable fixed rate bonds. Proceeds from the sale will be used to fund capital projects.

The City received over \$327 million of orders during the retail order period and \$4.9 billion of priority orders during the institutional order period, which in total represents approximately 3.5x the tax-exempt bonds offered for sale.

Due to investor demand for the tax-exempt bonds, yields were reduced relative to the start of the institutional order period by 2 basis points in 2028, 2029, and 2042; by 3 basis points in 2027 and 2052; by 4 basis points in 2041, 2047, and 2048; by 5 basis points in 2030, 2043, and 2044; by 6 basis points in 2050; and by 8 basis points in 2031.

Final yields ranged from 2.62% in 2026 to 4.19% in 2052.

The tax-exempt bonds were underwritten through a syndicate led by book-running lead manager Loop Capital Markets, with BofA Securities, J.P. Morgan, Jefferies, Ramirez & Co., Inc., RBC Capital Markets, Siebert Williams Shank, and Wells Fargo Securities serving as co-senior managers.

The City also sold \$300 million of taxable fixed rate bonds via competitive bid. The bid attracted 8 bidders, with J.P. Morgan winning at a true interest cost of 4.617%.

## **[NYC Drama School Faces 14.5% Interest Rate on Muni-Bond Breach.](#)**

- **American Musical and Dramatic Academy borrowed money in 2023**
- **School faces penalty for covenant default related to cash pile**

A drama and arts school with campuses in New York City and Los Angeles is facing an interest rate as high as 14.5% as a penalty for breaching an agreement with its municipal bondholders.

The American Musical and Dramatic Academy didn't maintain a cash pile that would last three months, breaking an agreement with holders led by Preston Hollow Community Capital. The school had 67 days of cash on hand as of June 30, while it was supposed to maintain 90 days, a regulatory filing shows. Such a breach is known as a covenant default.

Now, the academy will have to pay jacked-up interest rates between 12.25% and 14.5% on two series of debt, according to letters sent to the school this month by Preston Hollow. The correspondence was included in a securities filing posted Thursday. The two series of bonds priced with already-high coupons of 7.25% and 9.5%, according to data compiled by Bloomberg.

Such a move by bondholders is rare in the municipal market. It's more common for investors to enter into forbearance agreements with struggling borrowers — meaning holders pledge not to take actions such as demanding immediate repayment on debt even if they have that right. For colleges, these agreements provide a runway to fix their finances while often requiring them to disclose more regular information or hire a consultant to offer suggestions.

The right to charge higher interest rates if a borrower defaults is a common protection that corporate and real estate lenders write into their credit documents. In practice, the ability to charge default interest often becomes a key element of negotiations between the parties on how to resolve the borrower's financial challenges.

Such penalties risk worsening distressed borrowers' financial situation, said Eric Kazatsky, senior

US municipals strategist for Bloomberg Intelligence.

A spokesperson for Preston Hollow declined to comment. John Galgano, AMDA's chief operating officer, didn't reply to phone calls or email messages seeking comment. David Silverman, the school's chief financial officer, didn't respond to an emailed request for comment.

## **Campus Real Estate**

The American Musical and Dramatic Academy opened in 1964 and is a prominent performing arts institute with about 3,000 students stretched across two campuses, on Manhattan's Upper West Side and in Hollywood. Its alumni includes Modern Family star Jesse Tyler Ferguson and pop star Jason Derulo.

This isn't the college's first brush with distress. The financings last year were meant to provide relief to the academy after it went into covenant default on prior obligations.

In 2023, the school sold \$91.6 million of bonds in two separate deals. The borrowing, which refinanced old debt and also included funds for campus projects, was originated by Preston Hollow and the firm purchased \$51.65 million of the securities, according to a November statement from the company. The deal "gives AMDA the flexibility to build out exciting new initiatives as they continue to pursue their important mission," Ron Van Den Handel, a former managing director at Preston Hollow, said in the statement at the time.

Like other small US colleges, the school has struggled in recent years. Its performing-arts focus has also brought unique challenges, especially after Broadway performances closed during the pandemic. Total enrollment has been falling, dropping from 4,098 in 2018-19 to a projected 3,219 in 2023-24, according to the 2023 bond documents.

The letters from Preston Hollow say the school also needs to begin "real estate monetization procedures" as a result of the covenant breach. The 2023 bond documents noted that if the borrower couldn't satisfy certain financial covenants, it could be required to sell real estate.

The academy has several buildings in New York City and its main facility is located at 211 West 61st Street, close to Lincoln Center. It has an Art-Deco tower in Los Angeles blocks from the Hollywood Walk of Fame, along with other campus buildings.

### **[Illinois Senior-Living Default Spurs Bondholders to Hire Adviser.](#)**

- **FTI hired as adviser for holders of \$150 million of munis**
- **Lutheran Life Communities owns three facilities in Illinois**

Investors holding about \$150 million of municipal bonds issued to refinance debt of an Illinois senior-living operator hired a financial adviser after the non-profit defaulted on a separate series of obligations.

Majority holders of the non-rated debt sold in 2019 on behalf of Lutheran Life Communities hired FTI Consulting, Inc. to advise on a potential long-term forbearance or debt restructuring, according to a securities filing Wednesday. Lutheran Life operates three continuing care communities in Illinois and one in Indiana.

The hiring came after the non-profit failed to make an Aug. 1 payment on about \$25 million of floating-rate debt that was also sold in 2019. A May filing shows that First Midwest Bank, which merged with Old National Bancorp. in 2022, held that portion as of March 31. Kathy Schoettlin, a spokesperson for Old National, didn't respond to a request for comment.

## **[New York Sells \\$144.6 Million of Municipal Bonds on Behalf of Pace University.](#)**

The Dormitory Authority of the State of New York sold \$144.6 million of tax exempt revenue bonds on behalf of Pace University to refund existing debt.

The sale includes \$84.6 million of Series 2024B municipal bonds with maturities ranging from 2025 through 2042, according to an official statement posted Tuesday on MuniOS. Bonds due in 2034 have an interest rate of 5%, yield 3.54% and priced at 111.864.

The \$60 million of Series 2024C bonds are variable rate securities. The interest rate payable to investors who hold the debt will be set on a weekly basis. The bonds can be redeemed starting in 2037 and reach final maturity in 2044. Pace has the option to convert the bonds to bear interest at a daily, commercial paper, term or fixed rates, among others.

The first floating rate determination date is scheduled for Sept. 5.

Proceeds will be used to refund bonds sold on Pace's behalf in 2013 and 2014 by the authority and the Westchester County Local Development Corp.

Pace had operating revenue of \$434.8 million in fiscal year 2023, according to the school's website.

Founded in 1906 as a school for accounting, Pace had total enrollment of 14,092 undergraduate and graduate students for the 2023-24 academic year, and operates three campuses in New York City and Westchester County. The school had about \$306.7 million of debt outstanding as of July 30.

The bonds are rated BBB- by S&P Global Ratings and Baa3 by Moody's Investors Service.

BofA Securities was the underwriter.

## **[New Jersey Appellate Division Invalidates Municipal Ordinance Regulating Ownership of Age-Restricted Residences: Day Pitney](#)**

In the recent appellate case *New Jersey Realtors v. Township of Berkeley*, the Superior Court of New Jersey, Appellate Division, invalidated a municipal ordinance that restricted property ownership in certain senior housing communities to individuals aged fifty-five or older. This decision, rendered on

July 31, 2024, highlights the legal limits of municipal authority in enacting land use regulations that impact property rights and underscores the protection against discrimination based on familial status under the federal Fair Housing Act (FHA) and the New Jersey Law Against Discrimination (NJLAD).

The dispute arose when Berkeley Township enacted Ordinance No. 22-13-OA (the Ordinance), amending its land use provisions to mandate that **ownership** in specific senior housing communities be limited to those aged fifty-five or older. New Jersey Realtors (NJR) challenged the Ordinance, claiming it violated the FHA and the NJLAD by discriminating based on familial status and failing to comport with the exemption for age-restricted housing. NJR argued that the FHA and the NJLAD only require that age-restricted housing be **occupied** by an individual fifty-five or older.

The core issue here was whether Berkeley Township's Ordinance, which required that age-restricted units be purchased or owned by individuals aged fifty-five or older, contravened the anti-discrimination provisions of the FHA and the NJLAD, which prohibit discrimination on the sale or lease of property based on familial status. Answering affirmatively, the Appellate Division provided three key reasons to support its holdings.

## **[NYC's Transit System Plans to Sell Debt Backed by Mansion Tax Revenue.](#)**

- **MTA plans to sell real estate bonds later this year or in 2025**
- **New credit expected to provide \$2 billion for transit upgrades**

New York City's transit system plans to borrow against real estate taxes it receives to help raise \$2 billion for infrastructure upgrades, creating a new borrowing mechanism that's separate from its traditional farebox credit.

The Metropolitan Transportation Authority, the nation's largest mass-transit network, is slated to start selling debt backed by real estate transfer tax receipts — a so-called mansion tax — later this year or in early 2025, according to Kevin Willens, the MTA's chief financial officer.

The state began allocating the mansion tax revenue, along with state and city sales tax receipts, to the MTA in 2019 to help fund necessary capital projects and service improvements. The transit agency collected \$345 million of real estate transfer tax revenue in 2023 and anticipates receiving a similar amount each year through 2028, per the MTA's latest financial plan.

The strong demand for housing in New York City means the levy will provide the MTA with a reliable source of revenue, even as some wealthier residents have decamped for Florida or Texas, according to Matt Fabian, a partner at Municipal Markets Analytics.

New York City is "the most established real estate market in America," Fabian said. "The risk with a transfer tax is that properties stop transferring because demand for properties goes away. But that has never been the case in New York, even now. Even in the financial crisis, it was never an existential crisis for this tax base."

The \$2 billion of mansion tax bonds will help fund the MTA's \$51.5 billion 2020-2024 capital program, which will upgrade subway stations, finance flood-protection projects and renovate a 130-year-old rail bridge that links New York City to its northern suburbs.

The MTA had \$47.4 billion of debt outstanding as of July 24, including \$18.3 billion of transportation revenue bonds that are repaid with transit fares, according to MTA data. Adding another borrowing tool provides some relief to its operating budget and offers bondholders a way to invest in the MTA while avoiding ridership fluctuation as transit usage has yet to match pre-pandemic levels.

The mansion tax is a supplemental levy on the transfer of residential properties of at least \$2 million. The revenue flows into MTA's capital lockbox — rather than its operating budget — with that pot of money being reserved for infrastructure needs. Keeping the revenue separate from the operating budget should enhance the new real estate credit, Willens said.

"Our expectation is that it's going to be a high quality credit," Willens added.

The MTA has sold other bonds that are repaid from a different revenue source than farebox receipts and bridge and tunnel tolls. The transit provider has issued payroll mobility tax debt, bonds backed by New York City sales tax revenue and also securities repaid with a combination of motor fuel taxes, petroleum business taxes and mortgage recording levies.

While the MTA and state lawmakers have found ways to raise money for the transit system, Fabian says investors need to remember that an MTA bond repaid with money other than farebox revenue is still an obligation of a more than 100-year-old system that already has a high debt level and must modernize and fortify itself from extreme weather events.

"They may not be the same revenue stream," Fabian said, "but they're sisters."

### **[Florida Boomtown Borrows to Fix Pier Wiped Out by Hurricane.](#)**

- **Naples, Florida, is selling \$21 million of bonds on Tuesday**
- **Part of proceeds will rebuild pier destroyed by 2022 hurricane**

Naples, Florida, is turning to the municipal bond market to rebuild its famous pier ravaged by Hurricane Ian, marking its at least its fifth reconstruction because of extreme weather damage.

Tuesday's deal comes just days after rain from Tropical Storm Debby inundated the city. About \$11 million of proceeds raised from a \$21 million bond issuance will be used to reconstruct the Naples Pier, which was destroyed by Hurricane Ian in 2022. The new pier — which will stretch an estimated 1,000 feet into the Gulf of Mexico — will be designed to be more resilient to future storms, the city told investors in preliminary bond documents.

The upcoming reconstruction will be at least the fifth time the iconic pier has been rebuilt. The city replaced it following hurricanes in 1910, 1926, 1944 and 1960. In 2015, it underwent a major \$2.7 million renovation. Two years later, Hurricane Irma wrought about \$244,000 in damages before Ian

dealt a death blow of “catastrophic” damage, according to city officials.

### **Bankers Reap \$15 Billion of Muni Deals From Florida Growth Boom.**

- **Muni bond sales in the state grow at fastest pace in a decade**
- **FMSBonds expects record underwriting volume for dirt deals**

Florida’s transformation into the Wall Street South is fueling a surge in newcomers, wearing on infrastructure across the state and forcing municipalities to borrow at the fastest pace in over a decade.

The state’s municipal borrowers have already sold roughly \$15 billion of bonds in 2024, outpacing a national surge in supply. While overall muni sales have increased by about one-third, Florida’s issuance has more than doubled, up 132% since the same period last year. That’s the fastest pace of borrowing since at least 2013, according to data compiled by Bloomberg.

The surge is emblematic of a larger shift, showing how governments are flooding the debt markets with sales to accommodate the infrastructure needs of growing populations. A migration South exaggerated by the pandemic has fueled investments in new schools, roads, bridges, highways and airports — shifting the muni market’s center of gravity. So-called Southern states make up about 35% of muni bond sales this year, up 10 percentage points from 2004.

### **Chicago Delays \$643 Million Bond Deal Due to Market Volatility.**

- **City had planned tax-exempt general obligation deal Wednesday**
- **‘We did not like the volatility in the market’: CFO Jaworski**

Chicago is delaying its \$643 million bond sale that was expected to price on Wednesday amid volatility in the \$4 trillion market for state and local bonds.

“We are not selling today as we did not like the volatility in the market and are waiting for more stable market conditions,” Chicago Chief Financial Officer Jill Jaworski said in an emailed statement.

Chicago had planned to come to market during what was expected to be a busy week for municipal bond sales. Those new transactions are building on a surge of deals that has caused issuance to jump about 38% so far this year, compared to the same period in 2023, data compiled by Bloomberg show.

### **[Tennessee Hospital Delays \\$316 Million Deal on Weak Demand.](#)**

Erlanger Health — a hospital system based in Chattanooga, Tennessee — has delayed a \$316 million municipal bond sale that was scheduled to price Thursday after yields surged the last several days.

The deal was marketed to investors on Thursday morning at spreads ranging from 58 to 70 basis points over the benchmark, according to a pricing wire seen by Bloomberg. The deal was moved to day-to-day status following inadequate demand from investors, according to people familiar with the matter.

Chicago also paused a bond sale that was scheduled to price Wednesday. Municipal bonds slid on Wednesday in a rout that drove yields on 15-year benchmark debt to surge the most in nearly a year. Prices continued to drop on Thursday.

Erlanger Health — a teaching hospital affiliated with the University of Tennessee — was planning to refinance outstanding debt with some of the proceeds of the debt sale. So-called refunding deals are sensitive to large swings in interest rates because it determines how much savings the borrower can secure. The Health, Educational and Housing Facility Board of the City of Chattanooga, Tennessee, is planning to issue the debt on behalf of Erlanger.

“Due to recent market volatility and yield expectations falling short of our target, we have decided to pause the transaction,” Lynn DeJaco, the system’s chief financial officer, said in an emailed statement. “We will continue to monitor market conditions and reapproach the market next week.”

A spokesperson for Morgan Stanley declined to comment.

### **[Texas and Oklahoma Anti-ESG Laws Defended Amid Attacks.](#)**

The wagons are circling around anti-environmental, social, and governance laws enacted in Texas

and Oklahoma amid a flurry of studies on their financial impact and congressional scrutiny.

The two states were early enactors of laws that led to the blacklisting of more than 20 financial firms, including municipal bond underwriters, for “boycotting” or “discriminating” against the fossil fuel or firearm industries. The laws call for divestment of public pension and other assets and prohibit governmental contracts worth \$100,000 or more with banned firms.

The passage of a wide-variety of anti-ESG bills slowed dramatically this year with Pleiades Strategy, a research and advisory firm, reporting just six becoming law, compared to 23 in 2023. Louisiana in June enacted a law aimed at punishing banks and others unfriendly to the gun industry.

Studies pointing to adverse financial and economic impacts from the Texas and Oklahoma laws are piling up, attracting attention from Democratic members of the U.S. House Judiciary Committee who requested information on their financial effects.

“A growing body of evidence demonstrates that these policies threaten public employees’ retirement savings and leave taxpayers on the hook for higher fees and increased borrowing costs,” Reps. Jerrold Nadler, D-N.Y., and J. Luis Correa, D-Calif., said in a May 20 letter to Texas officials.

They cited a study by researchers at The Wharton School and Chicago Federal Reserve that was the first to examine the fallout from diminished underwriter competition under two Texas laws. It found bond issuers in the Lone Star State will incur \$300 million to \$500 million in additional interest on \$31.8 billion of debt sold during the first eight months after the laws took effect Sept. 1, 2021.

A more recent study conducted for the Texas Association of Business Chambers of Commerce Foundation that showed a spike in average underwriting spreads per \$1,000 of bonds issued by Texas local governments since the laws’ effective date was also cited in the inquiry.

Texas Comptroller Glenn Hegar called the studies “erroneous and fundamentally flawed” in his June 7 response to the federal lawmakers, which also highlighted the more than \$9 billion in oil and natural gas production tax revenue that flowed into the state’s coffers in fiscal 2023.

“Because there is a myriad of factors that affect these (issuance and borrowing) costs, including the size, type, credit quality, liquidity and structure of each municipal bond transaction, not to mention general economic conditions such as a significantly higher interest rate environment, it is impossible to accurately conclude that any transitory adjustments or disruptions on the municipal bond market in Texas are solely or even partially attributable to the change in statute,” he wrote.

Justin Marlowe, director of the Center for Municipal Finance at the University of Chicago’s Harris School of Public Policy, said while it’s good to see some evidence on actual financial impacts making its way into the debate over anti-ESG state laws, more and better data is required.

“We need more updated data to not necessarily prove the point, I think the Wharton study and others do a pretty good job of showing that there was an impact,” he said. “The question is whether the negative financial impacts for borrowers in the state have sustained? whether that’s been an ongoing phenomenon or whether it was just a more immediate response to the passage of that law in Texas and Oklahoma and elsewhere.”

The Texas-based American Energy Institute pointed to faulty findings in the March Texas Association of Business study conducted by Austin-based economic analysis and public policy consulting firm TXP, Inc., using Texas Bond Review Board data for 2023 and 2022 that was restated by the board in May.

“When corrected data from the Texas Bond Review Board was applied, it showed that the costs of bond issuance in 2022 and 2023 remained consistent with historical averages, debunking the report’s claims,” an institute opinion piece stated.

The Texas Association of Business said a note was added to the study to clarify the analysis was based on the bond review board’s original annual report.

“This does not change the fact that a tightening of the competitive bond market in Texas limits local governments’ access to financing for taxpayer-approved bonds, which ultimately results in more debt shouldered by taxpayers and Texas businesses, as multiple other economic analyses have similarly shown,” it said in a statement.

Bond issuers in Texas have said the laws’ reach has extended beyond underwriting to other governmental services provided by banks such as letters of credit.

The American Energy Institute also pushed back against a study that found a 2022 Oklahoma law banning state and local government contracts with investment banks that “boycott” the fossil fuel industry boosted municipalities’ borrowing costs by 59 basis points on average.

The study, conducted by the University of Central Oklahoma’s Economics Department and released by the Oklahoma Rural Association in April, has methodological flaws that included cherry-picked data and comparisons, according to the institute.

“It’s clear that the Energy Discrimination Elimination Act of 2022 is crucial for safeguarding Oklahoma’s economic interests and ensuring sound fiduciary practices,” Institute CEO Jason Isaac said in a statement. “Our research debunks the flawed claims against the (act), highlighting its role in protecting vital energy sectors and promoting financial stability for the state.”

Using the average yield to worst real-time measure of market borrowing rates for the S&P Municipal Bond Oklahoma Index since 2022, Paul Tice, a senior fellow at think tank National Center for Energy Analytics, reported that average yield measurement for issuers in the state tightened by 14 basis points since Oct. 31, 2022.

“Almost all of the yield volatility over the past 19 months has been driven by movements in underlying interest rates as seen by the lockstep trading between Oklahoma and its municipal peers and the U.S. Treasury Bond Index,” he wrote in a June 13 piece posted on the RealClear Energy website.

There are additional studies, including one released in April by Texas-based economic analysis firm Perryman Group, which said the state’s banning of municipal bond underwriters or restricting public pension funds’ investment options could lead to “notable” economic harm.

A 2023 study by Econsult Solutions Inc. looked at the impact if bills, similar to the Texas laws, were enacted in six other states, including Oklahoma, finding that state would have incurred an estimated \$49 million in additional interest costs for bonds issued over a 12-month period.

Oklahoma Treasurer Todd Russ, who has blacklisted seven companies, including Barclays, Bank of America (BAC), JP Morgan, and Wells Fargo (WFC), defended the importance of the oil and gas industry to the state and pointed to a commercial banking sector trend toward “de-banking companies that do not align with certain ESG criteria.”

“This practice can have severe consequences for Oklahoma industries, limiting their access to capital and financial services,” he said in a June 28 statement. “By resisting policies that lead to de-

banking, Oklahoma can safeguard its key industries from financial exclusion and ensure that businesses have the necessary resources to thrive.”

Enforcement of the Energy Discrimination Elimination Act was permanently halted last month by an Oklahoma County District Court judge, who found it violated the state constitution. The Oklahoma Supreme Court is expected to issue a procedural ruling soon related to the state attorney general’s appeal of the injunction.

The pro-ESG movement is fighting back.

Unlocking America’s Future, a nonprofit advocacy group that works to counter attacks against ESG, launched a Texas campaign in May that includes a six-figure digital ad campaign “to set the record straight about the economic costs of Texas’ extreme positions on a range of issues including responsible investing.”

As part of its 2024-25 platform and resolutions, the National Association of Counties noted “special interest groups are actively collaborating on a nationwide campaign to restrict and eliminate local authority regarding pensions, municipal bonds, and government funds by passing legislation and resolutions at both the national and state levels that oppose local control and free-market principles.”

The group adopted a policy in July urging “Congress and the administration to support policies that provide for local governments’ ability to invest and borrow as they self-determine, which must include continued access to free capital and credit markets.”

## [\*\*S&P, KBRA and Moody’s Announce Assured Guaranty’s Financial Strength Is Unchanged Following Merger of Principal Subsidiaries; Assured Guaranty Municipal Bonds Now Carry Assured Guaranty Inc.’s Ratings.\*\*](#)

### **S&P, KBRA and Moody’s Announce Assured Guaranty’s Financial Strength Is Unchanged Following Merger of Principal Subsidiaries; Assured Guaranty Municipal Bonds Now Carry Assured Guaranty Inc.’s Ratings**

Assured Guaranty Ltd. (NYSE: AGO) (AGL, together with its subsidiaries, Assured Guaranty) announced today that S&P Global Ratings (S&P), Kroll Bond Rating Agency (KBRA) and Moody’s Ratings (Moody’s) have indicated that they see no change to Assured Guaranty’s financial strength as a result of the August 1, 2024 merger of Assured Guaranty Municipal Corp. (AGM) into Assured Guaranty Inc. (AG).

#### **S&P**

S&P, which assigns a AA (stable) financial strength rating to AG, released a report on August 1, 2024, stating “there are no changes to the ratings of any of the S&P Global rated entities in the AGL group hierarchy.” Additionally, they wrote: “We expect no change in the company’s business strategy or approach to risk management. When evaluating capital adequacy for the companies, we run a consolidated capital adequacy model and already considered the business being assumed by

AG in our analysis.”

This followed a July 9, 2024 S&P bulletin stating that the merger “won’t change its assessment of the Assured Guaranty group’s business risk or financial risk positions.”

## **KBRA**

KBRA issued a press release on August 1, 2024 about Assured Guaranty’s insurance financial strength ratings (IFSRs) after the merger was completed, in which it wrote: “The IFSRs of AG (AA+/Stable), AGUK (AA+/Stable), AGE (AA+/Stable), as well as the Issuer Rating (A+/Stable) and all outstanding Debt Ratings for Assured Guaranty US Holdings Inc., remain unchanged.”

KBRA had previously written, on July 8, 2024, that “there will be no rating changes to any KBRA-rated insured obligations currently insured by AGM, AGUK or AGE as a result of the merger,” adding that it “views the merger and the resultant simplification of the overall organizational structure as creating capital, operational, and regulatory efficiencies, as well as enhancing Assured Guaranty Ltd.’s overall global platform and scale as management continues to position its business to optimize its market position and future growth opportunities.”

## **Moody’s**

A Moody’s press release issued on August 2, 2024, noted that “by operation of law, all securities that had been insured by Assured Guaranty Municipal Corp. are now guaranteed obligations of Assured Guaranty Inc.” and that the insurance financial strength (IFS) rating of AG is A1 (stable).

Previously, on July 10, 2024 in response to the announcement of the planned merger, Moody’s issued a press release affirming the A1 (stable) IFS ratings of AG, AGM and Assured Guaranty UK Limited, as well as the Baa1 (stable) senior debt ratings of Assured Guaranty US Holdings Inc., the Baa2(hyb) (stable) junior subordinated debt rating of Assured Guaranty Municipal Holdings Inc. and the Baa1 (stable) long-term issuer rating of AGL.

Moody’s wrote that its affirmation reflects the Assured Guaranty group’s “strong capital profile, conservative underwriting of US municipal, international infrastructure and structured finance risks and leading market position in the financial guaranty insurance sector.” They added that “Assured Guaranty’s ability to organically generate significant capital through premium and investment earnings make the credit profile of its operating subsidiaries resilient to a broad range of stress scenarios.” Moody’s stated that it believes the merger “results in a moderate strengthening of the combined entity’s credit profile relative to the current overall credit profiles of AGM and AG.”

Additionally, in Moody’s view, “The larger insured portfolio and claims paying resources of post-merger AG enhances risk diversification and reduces the size of large single risk exposures relative to capital. Despite the planned extraction of \$300 million of capital through a special dividend following the merger, AG’s pro forma risk-adjusted capital adequacy will be stronger than AGM’s current capital adequacy.”

## **Procedural Rating Agency Merger Action**

As AG is the surviving company of the merger, all three rating agencies withdrew their ratings of AGM, and bonds that had been insured by AGM now carry AG’s ratings.

Any forward-looking statements made in this press release, including those regarding growth opportunities for Assured Guaranty, demand for its product, and sustained economic conditions for increased new business, reflect Assured Guaranty’s current views with respect to future events and

are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties that may cause actual results to differ materially from those set forth in these statements. These risks and uncertainties include, but are not limited to, difficulties executing Assured Guaranty's business strategy; those risks and uncertainties resulting from changes in rating agency models or opinions; Assured Guaranty's continued capital adequacy; adverse credit developments in Assured Guaranty's insured portfolio and the impact of those developments on rating agency models and opinions; other risks and uncertainties that have not been identified at this time, management's response to these factors, and other risk factors identified in Assured Guaranty's filings with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which are made as of August 5, 2024. Assured Guaranty undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

### **About Assured Guaranty Ltd.**

Assured Guaranty Ltd. is a publicly traded (NYSE: AGO), Bermuda-based holding company. Through its subsidiaries, Assured Guaranty provides credit enhancement products to the U.S. and non-U.S. public finance, infrastructure and structured finance markets. Assured Guaranty also participates in the asset management business through its ownership interest in Sound Point Capital Management, LP and certain of its investment management affiliates. ## **[ICE Bonds and MarketAxess Connect Liquidity Networks to Bring Greater Efficiency to Municipal and Corporate Bond Markets.](#)**

### **Connectivity to provide access to deeper liquidity in the fixed income markets**

NEW YORK-(BUSINESS WIRE)-ICE Bonds, part of Intercontinental Exchange (NYSE: ICE), a leading global provider of technology and data, and MarketAxess Holdings Inc. (Nasdaq: MKTX), the operator of leading electronic trading platforms for fixed-income securities, today announced plans to connect their respective liquidity networks to bring greater efficiency and access to deeper liquidity in fixed income markets to the institutional and wealth management spaces.

With this announcement, ICE Bonds and MarketAxess plan to establish unique connectivity to their respective protocols and liquidity pools. This will enable ICE Bonds' automated trading system (ATS), ICE TMC, and MarketAxess' Open Trading network to communicate with each other, expanding the depth and reach for their respective global user bases.

"This collaboration connects two mature liquidity networks in fixed income markets to offer new trading and risk management solutions for clients," said Pete Borstelmann, President of ICE Bonds. "By combining our complementary strengths, we aim to offer users expanded opportunities to access liquidity in corporate and municipal bonds, enhancing market efficiency and benefiting participants across both platforms."

By leveraging ICE Bonds' established retail brokerage and wealth management presence alongside

MarketAxess' leadership in institutional trading, the interaction between liquidity pools aims to enhance price transparency, best execution, and overall market liquidity for all participants.

"We look forward to delivering enhanced value and innovation to our clients through this collaboration," said Rich Schiffman, Global Head of Trading Solutions at MarketAxess. "Our joint efforts are focused on providing access to deeper liquidity across municipal and corporate bonds and diversifying trading options for participants in our marketplace."

### **About MarketAxess**

MarketAxess (Nasdaq: MKTX) operates a leading electronic trading platform that delivers greater trading efficiency, a diversified pool of liquidity and significant cost savings to institutional investors and broker-dealers across the global fixed-income markets. Over 2,000 firms leverage MarketAxess' patented technology to efficiently trade fixed-income securities. MarketAxess' award-winning Open Trading® marketplace is widely regarded as the preferred all-to-all trading solution in the global credit markets. Founded in 2000, MarketAxess connects a robust network of market participants through an advanced full trading lifecycle solution that includes automated trading solutions, intelligent data and index products and a range of post-trade services. Learn more at [www.marketaxess.com](http://www.marketaxess.com) and on X @MarketAxess.

The press release may contain forward-looking statements, including statements within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 with respect to the proposed collaboration, including statements regarding the connection of liquidity networks and the anticipated benefits of such connection. These and other statements that relate to future events are based on MarketAxess' current expectations. The Company undertakes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise. More information about the factors affecting MarketAxess' business and prospects are contained in MarketAxess' periodic filings with the Securities and Exchange Commission and can be accessed at [www.marketaxess.com](http://www.marketaxess.com).

### **About Intercontinental Exchange**

Intercontinental Exchange, Inc. (NYSE: ICE) is a Fortune 500 company that designs, builds, and operates digital networks that connect people to opportunity. We provide financial technology and data services across major asset classes helping our customers access mission-critical workflow tools that increase transparency and efficiency. ICE's futures, equity, and options exchanges — including the New York Stock Exchange — and clearing houses help people invest, raise capital and manage risk. We offer some of the world's largest markets to trade and clear energy and environmental products. Our fixed income, data services and execution capabilities provide information, analytics and platforms that help our customers streamline processes and capitalize on opportunities. At ICE Mortgage Technology, we are transforming U.S. housing finance, from initial consumer engagement through loan production, closing, registration and the long-term servicing relationship. Together, ICE transforms, streamlines, and automates industries to connect our customers to opportunity.

Trademarks of ICE and/or its affiliates include Intercontinental Exchange, ICE, ICE block design, NYSE and New York Stock Exchange. Information regarding additional trademarks and intellectual property rights of Intercontinental Exchange, Inc. and/or its affiliates is located here. ## **[The Wyoming State Treasurer’s Office Modernizes Its Loan Management Practices with DebtBook.](#)**

### **The Wyoming State Treasurer’s Office Modernizes Its Loan Management Practices with DebtBook**

DebtBook, a leading provider of cloud software for treasury and accounting teams in the public finance industry, today announced that the Wyoming State Treasurer’s Office (Wyoming STO) has selected the firm’s Debt Management solution to centralize and unify its loan data, processes, and reporting.

The Wyoming State Treasurer’s Office is a constitutional office responsible for agency

administration, banking and cash management, distributions, investment of state funds, and the unclaimed property program.

Using DebtBook as its centralized loan management platform, the Wyoming State Treasurer's Office will increase operational efficiencies and enable organization-wide knowledge capture. With DebtBook, the Wyoming STO team will be able to track their entire loan portfolio by borrower, prepare year-end financial disclosures, and easily share all loan-related information with accounting and financial reporting teams, as well as with external stakeholders.

DebtBook provides a single-source debt management and accounting platform that helps power the organizations that improve our communities. The configurable solution is purpose-built to help treasurers and accountants in public finance streamline their debt management processes, including, data management, payments, accounting and financial reporting, disclosure, tax compliance, and proceed spend-down management. With greater data integrity, productivity, and visibility, DebtBook customers deliver better financial outcomes while reducing risk for their organizations.

### **About DebtBook**

DebtBook offers modern treasury and accounting software designed to help state and local government, higher education, healthcare, and others go from operational overload to strategic leadership.

Our Debt and Cash Management solutions empower strategic treasury and improve financial outcomes by automating operational work and allowing teams to more easily analyze their data and extract valuable insights. Our Lease and Subscription Management solutions give accounting teams hours back to their day by automating GASB 87 and 96 compliance workflows. Visit [debtbook.com](https://debtbook.com) to see why more than 2,100 organizations nationwide work with DebtBook.

### **[Miami-Dade County Sells \\$235 Million In Bonds for New Government Facility.](#)**

Florida's Miami-Dade County sold \$235 million in municipal bonds to fund the development of a new government center.

The Series 2024A Capital Asset Acquisition Special Obligation Bonds have maturities ranging from 2027 to 2054, according to a filing Tuesday on MuniOS. Bonds due in 2034 have an interest rate of 5% and a yield of 3.120%.

Jefferies won the bonds in competitive bidding on July 30.

Miami-Dade plans to use the proceeds from the tax exempt bonds to fund the acquisition, construction, improvement and renovation related to the West Dade Government Center. The facility would be aimed at providing a one-stop hub to get permitting paperwork approved, according to the Miami Herald.

The county also plans to use proceeds from the bonds to fund capitalized interest through Oct. 1,

2026.

Total costs for the projects related to the complex are listed as \$238.8 million in the official statement posted on MuniOS.

The bonds have been assigned ratings of Aa2 by Moody's Investors Service and AA by S&P Global Ratings.

**[Atlanta Development Authority to Sell \\$200 Million in Bonds for Downtown Development.](#)**

The Atlanta Development Authority plans to issue \$200 million in municipal bonds to fund the Centennial Yards downtown development project.

The issue will be split into the \$55 million in Series 2024A-1 senior revenue bonds, and \$145 million in Series 2024A-2 senior revenue bonds, with maturities starting in 2029. Details about maturities, coupons and yields weren't available in a preliminary official statement posted Monday on MuniOS.

The project includes the redevelopment of approximately 50 acres of land in downtown Atlanta, known as the Gulch, into a pedestrian-friendly area with residential, retail and commercial space to be marketed as Centennial Yards.

J.P. Morgan Securities is the lead underwriter.

## **[Seattle Issues \\$817.9 Million In Bonds To Upgrade Airport.](#)**

The Port of Seattle sold \$817.9 million in municipal bonds to finance improvements in the Seattle-Tacoma airport, Washington state's largest.

The agency sold \$648.94 million in series 2024B, taxable bonds and \$168.98 million in non-taxable series 2024A bonds, according to a document posted on MuniOs.

Maturities on the non-AMT portion ranged from 2025 to 2040, with a 5% coupon. The 10-year yield is 3.05%.

Maturities on the AMT tranche ranged from 2025 to 2044, with a 5% coupon on maturities up to 2038 and 5.25% for the remaining bonds. The 10-year yield is 3.76%.

A \$183.4 million term bond due July 1 2049 is part of the issuance. It carries a 5.25% interest rate and a 4.3% yield.

Besides funding improvements to the airport, the proceeds will also refund certain Port of Seattle obligations, making deposits to reserve accounts and cover other financial costs.

Bonds are payable from the Port's revenues. BofA Securities was the lead manager.

Moody's Investors Service assigned a A1 rating to the bonds. Both S&P Global Ratings and Fitch Ratings have rated the bonds as AA-.

## **[Mayor Brandon Johnson Announces the Upgrade of Chicago's Ratings by Fitch Ratings, Inc.](#)**

CHICAGO — Mayor Brandon Johnson announced Fitch Ratings, Inc. has upgraded the City of Chicago's General Obligation (GO) rating to 'A-' from 'BBB+', and Chicago's Sales Tax Securitization Corporation's (STSC) senior lien bonds to 'AAA' from 'AA+'. The ratings agency has also maintained its outlook for both STSC and GO at Stable.

"We are appreciative that Fitch Ratings has increased the City's rating on our bonds, which we use to fund needed investments in our infrastructure. These rating upgrades recognize our commitment

to responsible fiscal management and the economic strength and vitality of Chicago,” Mayor Brandon Johnson said. “It reflects the vibrancy of our economy and will lower our borrowing costs, supporting the hard work and dedication of our administration to build a stronger, more resilient Chicago for all residents.”

The upgrades reflect the implementation of Fitch’s new U.S. Public Finance Local Government Rating Criteria. Fitch cites the City’s adherence to sound fiscal practices, as well as a commitment to solving budget gaps through structural solutions as contributing factors. The ratings agency noted that the City’s demographic and economic profile remain an asset, and that Chicago’s population in 2022 was of sufficient size and the economy was sufficiently diversified to qualify for Fitch’s highest overall size/diversification category.

“For years, we have believed that rating agencies undervalue the strength and potential of Chicago,” Chief Financial Officer Jill Jaworski said. “A big driver of this rating increase is the fact that the new criteria afford due recognition of Chicago’s financial resilience and resources deriving from our large and diversified local economy.”

Improved ratings lead to lower borrowing costs and broaden the pool of investors in the City’s bonds. The savings, resulting from the upgrade, makes funds available to further invest in the City’s programs. With a stronger financial position, the City of Chicago can enhance services such as education, public safety, and infrastructure, thereby improving the overall quality of life for all its residents.

## **[US Soccer to Sell \\$200 Million of Debt for New Atlanta-Area Base.](#)**

- **The tax-free bonds are expected to price Aug. 1, are rated BBB**
- **Plan is to open new headquarters before 2026 men’s World Cup**

The US Soccer Federation is set to borrow \$200 million this week through a sale of municipal debt that will help the organization finance the construction of a new national training center and headquarters in the Atlanta area.

A municipal development agency for Fayette County outside Atlanta is set to issue the tax-exempt bonds on Aug. 1 on USSF’s behalf to fund the roughly \$225 million project, which will draw on support from a package of state and local tax incentives and donations. The contributions include \$50 million from Arthur Blank, a co-founder of Home Depot Inc. and owner of the National Football League’s Atlanta Falcons and Major League Soccer’s Atlanta United FC.

The venue in Fayette County will feature over a dozen soccer fields and 200,000 square feet of office space. US Soccer will shift there after more than three decades in Chicago. The debt will be secured by the deed on the training facility and a lien on gross revenue from the federation’s sponsorship and media contracts, ticket sales and game-day revenue. The bonds are rated BBB by Fitch Ratings, two steps above speculative grade.

### **[Miami Borrows \\$234 Million of Debt for Troubled Office Space.](#)**

- **County estimates \$862 million in savings over three decades**
- **Plan to purchase office building draws some criticism**

Miami has become so pricey for renters that even the county wants to become its own landlord. It's selling \$234 million of municipal debt to do just that.

Florida's most-populous county plans to use the proceeds of this week's bond sale to purchase a mostly vacant, half-century old office building for several government departments. The move will allow the county to own its real estate rather than leasing, but some local officials see it as too high of a price for a building that was in financial trouble and sits about 13 miles west of downtown Miami.

"It's better to own than to rent if you can afford it," said Jimmy Morales, chief operations officer for the county. "Let's invest. We're not going away. It's not like we're going to relocate our headquarters."

### **[Williams College Joins Higher Ed Bond Boom Amid Investor Demand.](#)**

- **Massachusetts school's \$108 million debt sale gets Aa1 rating**
- **Proceeds will go toward a new art museum, recreation center**

Williams College, the liberal arts school sprawled across 450 acres of the Berkshire highlands in Massachusetts, is out to show municipal bond investors the greater value of some higher education debt.

The alma mater of former President James Garfield and current US Rugby Olympian Kristi Kirshe plans to sell \$108 million of bonds next week to help fund a new art museum and a multipurpose recreation center, according to bond documents. The Massachusetts Development Finance Agency will serve as issuer and Goldman Sachs Group Inc. as lead underwriter.

At least 50 universities and colleges have flooded the market this year with more than \$10 billion in securities to address project funding and refinancing needs, according to data compiled by Bloomberg. That's more than double the amount for the same period in 2023.

### **[New York City, New York: Fitch New Issue Report](#)**

The affirmation of New York City's 'AA' Long-Term IDR and GO bond ratings incorporates Fitch Ratings' analysis using its new "U.S. Public Finance Local Government Rating Criteria." The ratings reflect New York City's exceptionally strong budget monitoring and controls, supporting Fitch's 'aa' financial resilience assessment given the city's 'high' revenue control, 'mid-range' expenditure control and Fitch's expectation that the city will maintain reserves at or above 7.5% of spending. For the purposes of this calculation, Fitch includes unrestricted general fund reserves (the sum of committed, assigned and unassigned), the available balance in the retirees' health benefits trust (RHBT) and the fiscal year-end budget stabilization and discretionary transfers of surplus for prepayment of certain of the following year's operating expenditures. The available balance as of fiscal year end 2023 was \$12.8 billion, equal to 11.8% of expenditures and transfers out.

### **[California's Largest Swath of Private Land Taps Municipal Bond Market.](#)**

- **Bonds will fund developments on Tejon's commerce center**
- **Tejon Ranch projects have fueled debate on fires, urban sprawl**

Tejon Ranch, the largest stretch of private land in California, is tapping the municipal bond market for \$61.6 million bond deal to expand the commercial center roughly 83 miles north of downtown Los Angeles.

Encompassing roughly 270,000 acres, or about 420 square miles, the mixed-use property owned by the publicly traded Tejon Ranch Co. has long been at the center of a debate over wildfires and urban sprawl. The latest financing is for a project that would more than double the size of the Tejon Ranch Commerce Center, a complex that currently houses distribution centers for IKEA, Caterpillar, L'Oreal and other retail giants.

Tejon Ranch Public Facilities Financing Authority is expected to issue the bonds for the center on Thursday. Proceeds will be used for what's anticipated to be a 20 million-square-foot development, according to bond documents. Construction is already underway on an apartment community slated to add 228 housing units by next year.

## **Connecticut Sells \$214.2 Million of General Obligation Refunding Bonds**

Connecticut has sold \$214.2 million in municipal bonds to refinance outstanding debt.

The general obligation refunding bonds include Series E-1 2024 bonds for \$27.5 million, and 2024 Series E-2 bonds totaling \$186.7 million.

The bonds mature starting in September 2025 through September 2034. The debt maturing next year will pay investors an interest rate of 5.00% and yield 2.90%. The 2034 maturities also pay interest at a rate of 5.00% and yield 2.93%. The securities aren't subject to mandatory redemption prior to maturity, according to an official statement posted Thursday on MuniOS.

All of the bonds sold are backed by a pledge of revenue from the state.

The securities were issued to refund all or parts of the state's 2014 Series D and Series E general obligation bonds.

The bonds were sold by the state in a competitive sale to WellsFargo.

Moody's Investors Service rated the bonds Aa3, S&P Global Ratings and Fitch Ratings both have the debt rated at AA-.

## **San Antonio, Texas: Fitch New Issue Report**

San Antonio's 'AA+' Long-Term IDR and bond ratings reflect Fitch Ratings' strongest assessment for financial resilience, 'aaa', based on the city's low-midrange budgetary flexibility and Fitch's expectation that available reserves will remain at or above 20% of spending. The ratings also reflect strong population growth and a population and economy of sufficient size and diversification, respectively, balanced against weak demographic and economic metrics and an elevated liability burden.

## [ACCESS REPORT](#)

Tue 30 Jul, 2024 - 4:47 PM ET

### **[Minnesota School District Credit Enhancement Program \(MN\): Fitch New Issue Report](#)**

Minnesota's 'AAA' IDR and GO bond ratings reflect the state's steadily growing and broad-based economy, highly educated workforce, expanding population and a revenue structure well designed to capture economic growth. The ratings also reflect a low long-term liability burden and historically strong control over revenue and spending that, in conjunction with a sophisticated approach to reserve funding, leaves Minnesota well positioned to manage through economic cycles while maintaining a high level of financial flexibility. The 'AA+' ratings on the general fund appropriation bonds, COPs and lease revenue bonds, one notch below the state's IDR, reflect the slightly higher degree of optionality associated with payments subject to annual appropriation. The 'AA+' programmatic rating on the Minnesota School District Credit Enhancement Program reflects both supportive structural factors and the state's commitment to make timely debt service payments if a participating district is unable to, which Fitch views as similar to an annual appropriation debt security.

### **[Oklahoma Water Resources Board \(OK\): Fitch New Issue Report](#)**

**Key Rating Drivers Portfolio Credit Risk** Approximately 62% of OWRB's loan pool consists of borrowers exhibiting investment-grade ratings. This translates to an implied pool quality, measured by aggregate rating and loan term, of 'BBB-'. The pool consists of 163 obligors, with the top 10 obligors comprising about 66.8% of the loan portfolio. Obligor security is solid, with nearly all of the pool backed by water or sewer revenue pledges. **Financial Structure** The program's cash flows are adequate with projected minimum annual DSC of about 1.4x. Fitch's cash flow modeling demonstrates that program resources are sufficient to withstand hypothetical pool defaults in excess of Fitch's 'AAA' liability rating stress hurdle, as derived using the PSM, without causing an interruption in bond payments. **Program Management** Management has demonstrated strength and capability in its underwriting and monitoring processes, as evidenced by the fact that the program has never experienced a pledged loan default.

## [ACCESS REPORT](#)

Wed 17 Jul, 2024

---

**[Baltimore County \(MD\): Fitch New Issue Report](#)**

The rating incorporates the county's 'aaa' financial resilience, which is based on its high midrange budgetary flexibility and an expectation for available reserves to be maintained equal to at least 10% of spending, compared to the current level of 27%. The economic and demographic strength composite, which incorporates the county's unemployment rate relative to the nation, educational attainment and median household income (MHI) as a percentage of the portfolio median, is 'Strong' but offset by a 'Weak' population trend metric. Population size and economic diversification are neutral to the rating. The rating also incorporates the county's 'Midrange' long-term liability burden composite. The rating additionally reflects the application of one positive analytical factor that recognizes the county's role as the center of an important and growing MSA that contributes significantly to the national economy.

[ACCESS REPORT](#)

Thu 18 Jul, 2024

---

**[South Carolina Public Service Authority \(Santee Cooper\) \(SC\): Fitch New Issue Report](#)**

The 'A-' rating reflects South Carolina Public Service Authority's (Santee Cooper or the authority) financial profile and leverage ratio, measured as net adjusted debt to adjusted funds available for debt service (FADS), which improved to 10.4x in 2023, but remains elevated. The Outlook revision to Stable reflects Fitch Rating's expectation that Santee Cooper's financial flexibility and revenue defensibility will improve following the expiration of its agreement to lock rates through January 16, 2025. The agreement was reached as part of a legal settlement to resolve significant litigation challenging the authority's ability to recover costs related to the V.C. Summer nuclear project (the Cook Settlement). The improved flexibility should allow the authority to support higher leverage. Moreover, with the expiration of the rate lock approaching, the effect of previously deferred costs appears to be manageable, even if these costs cannot be recovered in the future.

## [\*\*A's Exec Tells Las Vegas Officials the Club Plans to Leave \\$30 million in Public Money on the Table.\*\*](#)

LAS VEGAS — Oakland Athletics executive Sandy Dean told the Las Vegas Stadium Authority on Thursday that the club does not expect to spend the entire \$380 million in public money allocated to build a new stadium in Las Vegas.

Dean said the A's plan to spend \$350 million of those funds, leaving \$30 million on the table. He also told the authority that the club plans to finance \$300 million of the stadium cost, but no lenders have been secured.

"We've had strong interest from a number of companies that want to participate in that portion of the project," Dean said.

The other \$850 million needed to build the \$1.5 billion stadium would come from private equity.

## [Oakland Counts on Coliseum Sale to Close \\$117 Million Budget Gap.](#)

- **City faces a \$117 million budget shortfall this year**
- **Development group plans to build on old stadium site**

Oakland, California, risks having to slash spending and stall capital projects if officials are unable to close the sale of the city's soon-to-be defunct pro-sports arena in the next six weeks.

The Bay-Area city is facing a \$117 million budget gap this fiscal year and a \$175 million shortfall for the next. It's relying on cash from the sale of the Oakland-Alameda County Coliseum, where Major League Baseball's Athletics are playing their final season. Yet that deal is far from finalized.

To avoid cuts to city services, Oakland needs cash from the sale to come through by Sept. 1. There isn't a written purchase and sale agreement and the African American Sports and Entertainment Group — which plans to buy the facility — hasn't given the city a good faith deposit, according to city council member Janani Ramachandran, who voted against the plan to adjust Oakland's budget with those funds.

## [San Francisco To Sell \\$1.15 Billion In Bonds To Help Fund Sewer Projects.](#)

San Francisco is planning to sell \$1.15 billion in municipal bonds to help pay for improvements to its sewer system.

The Public Utilities Commission of the City and County of San Francisco will issue \$432.3 million 2024 Series A bonds, \$85.8 million 2024 Series B bonds, \$547.8 million 2024 Series C bonds and \$86.3 million 2024 Series D bonds to help finance capital projects benefiting wastewater treatment

including its Sewer System Improvement Program, as well as retiring tax-exempt commercial paper notes and other purposes.

The 2024A and 2024C bonds have been designated as green bonds, meeting the Water Climate Bond Standard. The 2024A and 2024B notes are federally taxable, according to a document posted Monday on MuniOS.

Officials say the sewer program is aimed at helping maximize system flexibility, improving operational and seismic reliability, as well as promoting current and future regulatory compliance. San Francisco's combined sewage and stormwater system handles an average of about 40 billion gallons a year.

The interest rate and yield on the debt have yet to be determined. The bonds are expected to price on July 17 and 18 and the transaction has a preliminary closing date of July 31.

The bonds are secured by a pledge of net revenues from the Wastewater Enterprise under the utilities commission.

Moody's Ratings assigned Aa2 to all of the bonds. S&P Global Ratings assigned AA to the 2024B, 2024C and 2024D bonds but hasn't assigned a rating to the 2024A note.

BofA Securities and Morgan Stanley are the lead underwriters.

## **[Baltimore County to Sell \\$386.9 Million of Municipal Bonds.](#)**

Maryland's Baltimore County plans to sell \$386.9 million of general obligation bonds, including \$160 million of construction bonds and \$227 million of refunding bonds, according to a preliminary offering statement posted Monday on MuniOS.

The county will sell \$115 million of Baltimore County Consolidated Public Improvement Bonds, and \$45 million of Baltimore Country Metropolitan District Bonds. The refunding bonds consist of \$124.2 million of Baltimore County Consolidated Public Improvement Bonds and \$102.6 million of Baltimore County Metropolitan District Bonds.

The securities will be sold in a competitive bidding process on Tuesday. Public Resources Advisory Group is advising on the sale.

Money to repay buyers of the public improvement bonds will come from the general revenues of the county, including property and income taxes. The primary source of repayment for the metropolitan district bonds are special assessments and charges levied against property in the area.

Money raised from the sale of the improvement bonds will be used for public works, land preservation, and education. Proceeds from the construction bonds will be used for designing,

building and acquiring water supply, sewerage and drainage systems for the county.

Moody's Ratings has rated the bonds Aaa. S&P Global Ratings and Fitch Ratings have rated the securities at AAA.

## **[State of Connecticut: Fitch New Issue Report](#)**

Absent tax policy changes, Fitch expects Connecticut's underlying revenues to grow only modestly over time, consistent with the state's wealthy and diverse, but slow-growing, economic profile. Connecticut's natural pace of spending growth is expected to marginally outpace revenue growth despite recently extending robust budget controls for the next decade. The state has consistently demonstrated the ability to cover its comparatively high fixed costs with more than a decade of full actuarial contributions to pensions supplemented by statutory additional pension payments from

excess revenues. The state's long-term liability burden is elevated and among the highest for U.S. states but still moderate relative to personal income. Connecticut's robust fiscal resilience is bolstered by statutory mechanisms supporting accumulation of reserves, including setting aside in the budget reserve fund volatile revenue collections over specific thresholds and a required excess margin of revenues over budgeted spending.

### **Fitch to Take Actions on Triborough Bridge and Tunnel Auth, NY Series 2003B-2 General Rev VR Bonds.**

Fitch Ratings-New York-11 July 2024: On the effective date of July 18, 2024, Fitch Ratings will revise the long-term rating to 'AA+' from 'AA-' and assign a short-term 'F1+' rating to the Triborough Bridge and Tunnel Authority, NY's general revenue variable rate bonds subseries 2003B-2. The Rating Outlook will be Stable for the long-term rating.

The rating action will be in connection with (1) the mandatory tender of the subseries 2003B-2 bonds,(2) the addition of an irrevocable direct-pay letter of credit (LOC) to be issued by TD Bank, N.A. (TD Bank, rated AA-/F1+/Negative), which will provide support for the subseries 2003B-2 bonds; (3) the remarketing of the subseries 2003B-2 bonds as VRDBs in the daily rate mode; and (4) the amendment and restatement of the certificate of determination for the bonds, which will take place on July 18, 2024.

#### KEY RATING DRIVERS

The long-term 'AA+' rating will be determined using Fitch's dual-party pay criteria and will be based jointly on the underlying long-term rating assigned to the subseries 2003B-2 bonds by Fitch (AA-/Stable), and the long-term rating assigned by Fitch to TD Bank (AA-/Negative), which will provide a LOC to support the subseries 2003B-2 bonds. The short-term 'F1+' rating will be based solely on the short-term rating of the bank providing the LOC. For information about the underlying credit rating see Fitch's rating action commentary dated Jan. 31, 2024 at 'www.fitchratings.com'.

Fitch's dual-party pay criteria considers the likelihood of the failure of both a rated obligor and a bank LOC provider. The methodology results in a long-term rating that is up to two notches higher than the stronger of the two credits if the following conditions are met: (1) both entities have a rating of 'A' or higher; (2) the transaction is structured such that payments from both the municipal issuer and the bank are in the flow of funds and both entities would have to fail to perform before the bonds defaulted; and (3) the interest rate modes to be covered by Fitch's rating provide for either a mandatory purchase at the end of each interest rate period, or a purchase demand option. A one- or two-notch uplift will apply to the long-term rating depending on the frequency of the purchase demand option or the duration of the interest rate period which concludes with a mandatory tender.

The bonds will provide holders with a same day tender option while in the daily rate mode and an option to tender bonds upon seven-days notice while the bonds bear interest in the weekly interest rate mode; both daily and weekly modes will be rated by Fitch. Fitch will apply a two-notch uplift, which will result in a long-term rating of 'AA+' for the bonds.

TD Bank will be obligated to make regularly scheduled payments of principal and interest on the bonds in addition to payments upon maturity, acceleration and redemption, as well as purchase price for tendered bonds. The LOC will have a stated expiration date of July 18, 2029, unless extended or earlier terminated, and will provide full and sufficient coverage of principal plus an amount equal to 53 days of interest at a maximum rate of 9% based on a year of 365 days and purchase price for tendered bonds, while in the daily and weekly rate modes. TD Securities (USA) LLC will be the remarketing agent for the bonds.

The subseries 2003B-2 bonds will initially bear interest at a daily rate but may be converted to a weekly, commercial paper, term or fixed interest rate. While the bonds are in the daily or weekly rate modes interest payments will be on the first business day of each month starting on Aug. 1, 2024. The trustee will be obligated to make timely draws on the LOC to pay principal, interest, and purchase price. Funds drawn under the LOC are held uninvested, and are free from any lien prior to that of the bondholders.

Holder may tender their bonds on any business day, provided the tender agent and remarketing agent are given the requisite prior notice of the purchase. The bonds are subject to mandatory tender: (1) upon conversion of the interest rate; (2) upon expiration, substitution or termination of the LOC; (3) following receipt of written notice from the bank of an event of default under the letter of credit and reimbursement agreement, and (4) following receipt of notice from the bank that the interest component will not be reinstated and directing such mandatory tender. Optional and mandatory redemption provisions also apply to the bonds.

#### RATING SENSITIVITIES

**Factors That Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade**  
The Long-Term rating will be tied to the underlying long-term rating assigned to the bonds and the long-term rating that Fitch maintains on the bank providing the LOC. Changes to one or both of these ratings may affect the long-term rating assigned to the bonds. Additionally, if either the underlying bond rating or the bank rating were downgraded to 'A-' or lower, the dual-party pay criteria could no longer be applied, and the Long-Term rating assigned to the bonds would then be adjusted to the higher of the bank rating and the underlying bond rating.

The short-term rating to be assigned to the bonds will be adjusted downward in conjunction with the short-term rating of the bank providing the LOC.

**Factors That Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade**  
The long-term rating will be tied to the underlying long-term rating assigned to the bonds and the long-term rating that Fitch maintains on the bank providing the LOC. Changes to one or both of these ratings may affect the long-term rating assigned to the bonds.

The short-term rating to be assigned to the bonds is at the highest rating level and cannot be upgraded.

---

### **[New York State Authority to Sell \\$1.29 Billion of Municipal Bonds.](#)**

The Dormitory Authority of the State of New York plans to sell almost \$1.29 billion of municipal bonds backed by money collected from the state's sales tax.

The Series 2024A bonds will be available in three separate tranches as part of a competitive sale

scheduled for Wednesday, according to a preliminary offering statement posted on MuniOS. Public Resources Advisory Group is acting as an advisor on the sale.

Bonds being sold in Bidding Group 1 and Bidding Group 2 total about \$430.3 million and \$437.8 million, respectively, and pay an interest rate of 5%. The securities being offered in Bidding Group 3 total about \$419 million and will be offered at a minimum interest rate of 5% and a maximum rate of 5.25%.

Proceeds from the sale will be used to finance, refinance and reimburse some or all of the costs related to certain capital projects. That includes work done as part of the Consolidated Local Street and Highway Improvement Program, and projects for the Metropolitan Transportation Authority.

The Dormitory Authority is one of three entities authorized to issue state sales tax revenue bonds. The state estimates it will collect about \$19.1 billion in sales tax receipts during the 2024-2025 fiscal year. That is up from about \$16.5 billion in the 2021-2022 fiscal year.

Moody's Ratings assigned the bonds a rating of Aa1.

## **[New York State Authority Sells \\$1.22 Billion in Bonds for Transportation Programs.](#)**

The Dormitory Authority of the State of New York sold \$1.22 billion of municipal bonds to cover the costs of transportation programs and other projects.

The authority issued three groups of tax-exempt Series 2024A bonds maturing between 2026 and 2056, all with a 5% interest rate. The 10-year bonds carry a 2.98% yield, according to a statement published Thursday on MuniOs.

DASNY initially planned to raise nearly \$1.29 billion with the sale.

The proceeds are meant to finance, refinance or reimburse the costs of certain capital projects, including work done as part of the Consolidated Local Street and Highway Improvement Program and projects for the Metropolitan Transportation Authority.

The bonds were sold in competitive bidding on Wednesday. Morgan Stanley bought the first tranche of bonds, which mature between 2026 and 2041. J.P. Morgan Securities bought the second group, maturing between 2042 and 2050, and BofA Securities bought the third tranche, maturing between 2051 and 2056.

The bonds are backed by money collected from the state's sales tax. The state estimated it would collect about \$19.07 billion in sales tax receipts during the 2024-2025 fiscal year.

Interest is payable on each March 15 and Sept. 15, starting in March 2025.

Moody's Ratings has assigned the bonds an Aa1 rating and Kroll Bond Rating Agency rated them AAA.

## **[Orrick: Henry Ford Health Closes First-of-its-Kind Central Energy Hub Transaction](#)**

Henry Ford Health plans to build a \$235 million Central Energy Hub as part of a broader \$2.2 billion Detroit hospital campus expansion known as Destination: Grand.

Orrick represented the underwriters and served as special tax counsel in design, construction, financing, operations and maintenance deal for the Central Energy Hub, which will provide electric heating and cooling to several new hospital buildings.

Innovating in the energy as a service market, the deal achieved meaningful delivery and operational risk transfer of the Central Energy Hub to Provident Resources Group and Kiewit Development Company. That enables Henry Ford Health to focus on its core mission of providing world-class healthcare to its community.

The deal also involved tax-exempt financing that lowered the cost of capital and maximized the scope for the project.

In an interview with *IJGlobal*, Orrick's [Matthew Neuringer](#) discussed the nuances of the solution the Orrick team helped design and implement.

"This is a novel application of this particular type of not-for-profit tax-exempt financing solution through a project-developer-led approach for the energy as a service space," Neuringer said.

Plans for the Central Energy Hub are part of a major construction project that includes a new state-of-the-art patient tower with all private rooms, a 1,500-space parking deck and a physical rehabilitation institute through a partnership with Shirley Ryan AbilityLab.

### **THE COMPANIES**

Henry Ford Health is a leading integrated and academic healthcare system based in Detroit, serving southeast and central Michigan.

In March of 2023, Henry Ford Health began looking for a private partner to design, build, finance, operate and maintain the Central Energy Hub. HFH selected Henry Ford Health Energy Partners (e.g. Kiewit, Veolia and Provident) as the preferred bidder.

Kiewit HFH Investors is the sole member of Henry Ford Health Energy Partners and a 100% equity sponsor.

Henry Ford Health Energy Partners has contracted with Kiewit Development Company for long-term management services.

“The project enables Henry Ford to focus on its core mission of transformational healthcare services and expanding those services while partnering with a world class provider of DBFOM services and energy development to focus on the non-core mission of the hospital development,” Neuringer said in the interview.

Henry Ford Health said in a [statement](#) that the Central Energy Hub “will feature a hot and chilled water pump system that will provide electric heating and cooling to the new hospital facilities, allowing the system to limit and eventually fully avoid natural gas usage in those facilities. That means those buildings, including the CEH itself, will produce zero fossil fuels or emissions by our target dates in 2050.”

#### THE TEAM

Orrick’s [Matthew Neuringer](#) led the team as underwriters counsel. The team also included [Robyn Helmlinger](#), [Charles Cardall](#), [Young Lee](#), [Joseph Lodico](#), [Ladan Mohaddes](#), [Joshua Bonney](#), [Ian Busche](#), [Eric Newman](#) & Henry McKenzie.

## [San Diego, California: Fitch New Issue Report](#)

The upgrade of the city’s IDR and GO rating to ‘AA+’ from ‘AA’ reflects implementation of Fitch’s new “U.S. Public Finance Local Government Rating Criteria”. The ‘AA+’ rating incorporates the city’s ‘aa’ financial resilience assessment, which reflects a limited budgetary flexibility and an expectation that available reserves will be maintained between 17.5% and 25% of spending (compared to the current 19%). The rating also reflects the city’s midrange long-term liability burden (42nd percentile of the Fitch local government rating portfolio), midrange population trend (42nd percentile) and strong demographic and economic level, the composite of which is at the 64th percentile of Fitch’s local government portfolio. The rating further reflects the application of positive additional analytical factor notches that recognize the city’s role as the center of an important and large MSA with a vital role in the national economy. The ‘AA’ rating for the lease revenue bonds and commercial paper notes reflects the slightly higher optionality associated with the requirement to budget and appropriate for their debt service.

## **[Voters to Decide if California Can Borrow \\$20B for Climate and Education.](#)**

**State lawmakers will likely place two bonds, one for climate change impacts and one for school repairs - each worth \$10 billion - on the November ballot. The bonds will require a two-thirds approval from both chambers to reach the ballot.**

California voters will likely decide whether to let the state borrow \$20 billion to fight climate change and support schools, issues that advocates say are in need of a cash influx in light of recent budget cuts.

State lawmakers said Sunday that they reached agreements to place both a \$10 billion bond to pay for climate change impacts and another \$10 billion bond for school repairs.

Voter approval of borrowing is never a sure thing, even in a presidential election when turnout is high and the electorate skews more progressive. In 2020, for example, voters rejected a \$15 billion schools facilities bond.

## **[Bay Area Residents To Vote on \\$20 Billion Housing Bond.](#)**

**Localities Seek Regional Solution As State Cuts Funding Resources**

Voters in San Francisco and eight adjoining counties will decide in the November election whether to support spending up to \$20 billion to build or preserve affordable housing.

The ballot referendum could make enough funding available through municipal bonds to develop or preserve about 70,000 houses priced for households with low and moderate incomes. Its chances of passing depend on whether voters' concerns about the housing crisis outweigh their fears of the higher property taxes needed to pay for the bonds.

The matter is headed for the ballot after the Bay Area Housing Finance Authority, the writer of the measure, voted to support it at a meeting this week. The California state legislature created the agency in 2019 to address the region's spiraling housing costs.

## [Houston to Sell \\$589.4 Million of Bonds as Part of Settlement With Firefighters.](#)

Houston plans to sell a total of \$720.4 million of municipal bonds to payoff outstanding legal obligations and existing debt.

The city will sell Series 2024A bonds totalling \$589.4 million to cover expenses related to the settlement of a legal dispute between the Houston Professional Fire Fighters's Association, according to a document posted on MuniOs. The Series 2024B securities, for \$131 million, are bonds that will go to refund debt maturing in in 2025 and 2026.

Preliminary pricing information on the interest rate and yield on the debt wasn't provided. Investors will be paid back by money raised from city taxes on property.

Moody's Investors Service has rated the bonds Aa3.

Ramirez & Co. is lead underwriter on the deal.

## **Nashville to Sell \$350 Million of Bonds for Vanderbilt University.**

Nashville plans to issue \$350 million in municipal bonds to pay for upgrades at Vanderbilt University.

Proceeds from the sale will be used to finance the cost of acquiring, constructing and installing certain capital improvements to the educational and educational support facilities at the university, according to a document posted on MuniOS.

The bonds will be sold on Vanderbilt's behalf by the Health and Educational Facilities Board of the Metropolitan Government of Nashville and Davidson County.

The interest rate and yield on the debt have yet to be determined, according to a document posted on MuniOS. The bonds are expected to price July 10 and the transaction has a preliminary closing date of Aug. 1.

Bond holders will be repaid with funds from the school's endowment, tuition, fees and other charges to students and revenue from the university's medical center.

Founded in 1873, Vanderbilt is located on a 330-acre campus in Nashville, Tenn., and has about 13,500 undergraduate, post-graduate and professional students. The university operates what it describes as 10 different academic units including schools of nursing, medicine, law and engineering.

Moody's Investors Service and S&P Global Ratings have assigned ratings of Aa1 and AAA, respectively, to the bonds.

RBC Capital Markets and BofA Securities are lead underwriters on the deal.

## **Florida's Miami-Dade to Sell \$923.5 Million in Bonds to Refund Debt Sold for Miami International Airport.**

Florida's Miami-Dade County plans to issue \$923.5 million in municipal bonds to refund debt sold in connection with capital improvements at Miami International Airport.

Proceeds will be used to refund aviation bonds series 2014, 2014A and 2014B.

Miami-Dade County is issuing \$782.4 million Aviation Revenue Refunding Bonds Series 2024A subject to the alternative minimum tax and \$141.1 million Aviation Revenue Refunding Bonds Series 2024B, which is non-AMT.

The interest rate and yield on the debt have yet to be determined, according to a document posted Tuesday on MuniOS. The bonds are expected to price July 16 and the transaction has a preliminary

closing date of Aug. 1.

Bondholders will be repaid with funds from the terminals, grounds, runways and taxiways of the Miami International Airport and three other general aviation airports.

The airport is American Airlines' largest international hub operation, including providing most of the carrier's capacity from the U.S. to the Caribbean and Latin America.

S&P Global Ratings and Fitch Ratings have each assigned A+ to the Series 2024 bonds.

Barclays is the lead underwriter.

## **Tallahassee (FL): Fitch New Issue Report**

Key Rating Drivers Revenue Defensibility – 'aa' Favorable Service Area, Affordable Rates for a Significant Majority of the Population: The city retains the legal authority to adjust rates as needed without external oversight. Fitch considers the monthly residential water and sewer bill affordable for about 77% of the service area population based on standard monthly usage of 7,500 gallons for water and 6,000 gallons for sewer. The favorable service area is supported by the city's role as a regional economic center and state capital, that is characterized by a moderate unemployment rate relative to the nation, yet below-average income levels. The customer count contracted in fiscal 2023 with the implementation of a new billing system, but in prior years was growing less than 1% annually; modest growth around this level is expected to continue. Income levels are about 30% lower than the national median as of 2022. The unemployment rate has decreased to 3% since 2020. However, it was 6% less than the national average in 2023.

## **Washington, State of (WA): Fitch New Issue Report**

Key Rating Drivers Revenue Framework – 'aaa' Revenue performance over time has exceeded U.S. GDP growth, and Fitch expects this to continue to support strong growth prospects. The state has complete independent control over taxation, with an unlimited legal ability to raise operating revenues as needed. Expenditure Framework – 'aa' Washington possesses ample expenditure flexibility, with statutory commitments, broad responsibility for education and infrastructure spending offset by low carrying costs. Washington also benefits from the broad expense-cutting authority common to most U.S. states. Washington's spending growth, absent policy actions, will likely be marginally above its solid revenue growth, requiring regular budget management to ensure ongoing balance. Long-Term Liability Burden – 'aaa' The combined burden of debt and net pension liabilities is low as a percentage of personal income but above the median for U.S. states. Debt ratios

incorporate the funding of substantial capital needs, particularly for transportation, but are offset by a moderate net pension liability and an expanding economic resource base.

### **District of Columbia Water & Sewer Authority: Fitch New Issue Report**

The 'AA' Issuer Default Rating (IDR) and subordinate lien bond rating reflect the authority's very strong financial profile in the context of its very strong revenue defensibility and operating risk profile, both assessed at 'aa'. The strength of the revenue defensibility is rooted in the authority's independent ability to increase user charges for both retail and wholesale customers without external oversight as well as its location within a robust economic area. The operating risk profile reflects a very low operating cost burden and moderate life cycle ratio.

### **Ohio Sells \$250 Million of Municipal Bonds to Finance Clean Water Projects.**

The Ohio Water Development Authority has sold \$250 million of revenue bonds to fund clean water projects across the state.

Money from the sale will go to the authority's Drinking Water Assistance Fund, which lends money to government agencies to help them pay for public water projects.

Securities maturing in 2034 will pay investors an interest rate of 5% and yield of 2.9%, according to a document posted Tuesday on MuniOS.

The bonds are backed by various sources of revenue, including all interest payments made on loans by the fund, along with all payments made on already existing and future loans that the fund makes.

The fund was established in 1997 following passage of the Safe Drinking Water Act Amendments of 1996, which was meant to help states finance infrastructure repairs so they could maintain compliance with federal clean water requirements and protect public health.

The bonds were rated by Moody's Ratings Aaa, and by S&P Global Ratings AAA.

Stifel Nicolaus & Company and Ramirez & Co. were lead underwriters on the deal.

## [\*\*Chicago Pension Debt Rises to \\$37 Billion as City Hunts for Cash.\*\*](#)

- **Net liability rose 5% in 2023, according to annual report**
- **Mayor says city still faces long-term structural challenges**

Chicago's pension burden climbed again last year as new laws and accounting measures added to costs, and first-term Mayor Brandon Johnson looks for new revenue.

The net pension liability across the city's four retirement funds rose about 5% to \$37.2 billion as of Dec. 31, up from \$35.4 billion a year earlier, according to Chicago's latest annual financial report.

The amount the city owes to its four pensions that pay benefits to retired firefighters, police officers, municipal workers and laborers increased because of changes in pension assumptions and legislation, according to the report. The increase in costs was partly offset by investment income.

## [\*\*New Jersey College Asks Bondholders to Borrow Against Mortgage.\*\*](#)

- **School would be able to borrow more if Princeton campus sells**
- **Effort shows struggle of small schools facing enrollment pinch**

Rider University, a small college outside of Trenton, New Jersey, is trying to raise additional funds to help an ongoing liquidity crunch.

College officials asked bondholders for permission to borrow against the mortgage on the school's main campus in Lawrenceville, New Jersey, according to a bond filing dated Friday. If approved, the move would free up much-needed cash for Rider in the short-term.

"In the spirit of good partnership with our current bondholders, we have been in discussion with them regarding this, and we understand that a majority of them are willing to consent to the amendment," said Kristine Brown, a spokesperson for the school.

The proposal shows the mounting challenges for small schools to make ends meet as they contend with declining enrollments and rising costs. Those pressures have driven colleges across the US to close or merge, while pushing others into new lines of business like online education, adult learning and monetizing real estate.

### **[Massachusetts Bay Transportation Authority: Fitch New Issue Report](#)**

The 'AAA' rating on the Massachusetts Bay Transportation Authority's (MBTA) senior dedicated sales tax bonds reflects the strong standalone credit quality of the dedicated portion of the commonwealth's sales tax allocated to the MBTA. The rating incorporates leverage limitations that provide structural resilience, in light of a sizable ongoing borrowing program and relatively strong revenue growth. The bonds are insulated from both the operations of the MBTA and the commonwealth, allowing for a rating distinct from MBTA operations and linked to, but not capped by, the commonwealth's 'AA+' Issuer Default Rating (IDR).

[ACCESS REPORT](#)

Thu 20 Jun, 2024

---

### **[Metropolitan Transportation Authority, New York: Fitch New Issue Report](#)**

Expectations for pledged payroll taxes and certain transportation fees reflect the large, diverse and

wealthy economic base of the Metropolitan Commuter Transportation District (MCTD). The payroll component constituted an estimated 89% of receipts in 2023 and will constitute a larger share following the July 2023 rate increase. Pledged receipts are economically sensitive, particularly the component levied on regional payrolls, but the bonds' structure supports resilience against revenue volatility at a level consistent with a 'aaa' assessment. A statutory prohibition against a Metropolitan Transportation Authority (MTA) bankruptcy filing, the allocation of dedicated revenues to the MTA without appropriation and the state legislature's ability to change the taxable base eliminates MTA operating exposure and caps it at the state's Issuer Default Rating.

### [Los Angeles Is Borrowing \\$150 Million to House Thousands of Its Homeless.](#)

- **City plans to raise funds by selling municipal debt on June 24**
- **Unhoused population is up 63% since 2016 vote to tackle crisis**

Los Angeles plans to issue \$150 million of municipal debt next week to raise money for housing construction as it moves to ease a mounting homelessness crisis in the second-most populous US city.

The sale is part of a \$1.2 billion city bond measure — Proposition HHH — that voters approved in 2016. It was designed to develop permanent, rent-stabilized housing for some of the city's residents most in need. Proceeds of this month's borrowing will finance the construction of 2,574 units, bond documents show. Ultimately, the financing earmarked through HHH is expected to provide residences for as many as 16,000 people.

The city of 3.8 million has been pouring money into addressing a growing homelessness emergency that's been magnified by soaring rents and stagnant incomes in the wake of the pandemic. Some 46,260 people in Los Angeles were unhoused in 2023, up almost a third from before the pandemic and 63% from eight years ago when the measure passed, the Los Angeles Homeless Services Authority estimates. Combining the city and county, Los Angeles trails only New York City in terms of the size of its homeless population, federal data show.

### [Trial Over Austin's Project Connect Financing Model Halted by Appeal from Texas AG.](#)

Lawyers in the Texas attorney general's office filed an appeal in a Travis County courtroom Monday, halting the trial to determine whether the funding model for Austin's planned multibillion-dollar light

rail is allowed under state law.

Project Connect, which was approved by voters in 2020 with an increase of more than 20% in the city's maintenance and operations property tax rate, originally was to include several transit projects and miles of light rail — the centerpiece of the proposition, which supporters lauded as a generational investment in Austin's transit infrastructure.

Plans for the light rail portion of the project have since been scaled down to under 10 miles, and construction is estimated to cost more, city and Austin Transit Partnership leaders have said. The Austin Transit Partnership is a local government corporation established by the city and Capital Metro to plan and build the light-rail system.

### **[S&P Pension Spotlight: Massachusetts](#)**

#### **Key Takeaways**

- Massachusetts' largest commonwealth and regional pension systems are comparably poorly funded, and the commonwealth has mandated that government pension plans be fully funded by 2040.
- Pension plan funding schedules include large annual contribution increases and elevated discount rate assumptions. We believe that contribution costs will continue to outpace local governments' budgetary growth, pressuring many municipal budgets, especially those with limited tax base growth or little revenue raising flexibility under Proposition 2 ½ limits.
- Many local governments do not plan to fund their other postemployment benefits (OPEBs) until their pension system is fully funded, resulting in liabilities that rise in tandem with budgetary and funding risk.
- We will evaluate, on a case-by-case basis, the influence rising pension contributions within

municipal and state budgets have on our ratings.

## **Fitch: Securing Funds Key to MTA Credit in Wake of NYC Congestion Pricing Pause**

Fitch Ratings-New York-11 June 2024: Fitch Ratings does not anticipate taking near-term negative rating action on the Metropolitan Transportation Authority's (MTA) 'AA'/Stable Issuer Default Rating (IDR) in response to New York State Governor Hochul's decision to pause the MTA's New York City congestion pricing plan. The governor and state legislative leaders have emphasized the state's strong commitment to support and find alternative revenue sources for the MTA. This aligns with Fitch's view that the MTA has a close fiscal relationship with the state (AA+/Stable), as assessed under our Government-Related Entities (GRE) Rating Criteria, which explicitly recognizes the likelihood of support.

The MTA's operating outlook remains stable, reflecting an improved fiscal outlook largely driven by the state's increase of the maximum rate of the Payroll Mobility Tax (PMT) last year. However, the indefinite suspension of congestion pricing creates significant uncertainty for the MTA capital program only months after the agency announced it was halting all new construction contracts due to lawsuits against congestion pricing. Extended delays in replacing the lost revenue from the congestion plan could weaken Fitch's assessment of the state's support of the MTA under the GRE criteria and negatively affect the MTA's Standalone Credit Profile and IDR.

Congestion pricing, which was to begin on June 30, 2024, was expected to raise \$1 billion in annual revenue to support \$15 billion in borrowing capacity, or approximately half of the approximately \$30 billion of remaining project costs under the MTA's current \$51.5 billion 2020-2024 capital plan. Congestion pricing as a bond financing vehicle was itself not without uncertainty, lacking a proven revenue history for a first-of-its-kind system in the U.S. Nevertheless, the delay will postpone various projects including signal upgrades and replacement, the purchase of new railcars and electric buses, and ADA accessibility projects.

Fitch does not view the loss of proceeds from congestion pricing as a near-term liquidity challenge for the MTA. Per Fitch's GRE criteria, the MTA's IDR reflects an 'extremely likely' score assessment that the state would support the MTA in case of need. However, extended delays by the state in establishing a long-term revenue solution threatens the MTA's ability to effectively execute its 2020-2024 capital program. This could have long-term ramifications for system performance and ridership, which is still only at about 70% of pre-pandemic levels on most weekdays. An extended delay could also lead Fitch to reassess the state's propensity to provide support in the future, which would result in a negative rating action on the MTA's IDR.

Long-term replacements for congestion pricing project revenues could include new or expanded state or regional taxes and fees or a limited draw on state resources. The state legislature adjourned this weekend without deciding on an alternative long-term funding source with the next regular session starting in January 2025. However, the governor can convene an extraordinary session before then.

The MTA, through its Triborough Bridge and Tunnel Authority (TBTA), has a \$544 million contract with Transcore to design, build, operate and maintain the tolling program. Congestion pricing infrastructure, including gantries and license plate readers, is already in place, supported with \$193 million in TBTA bond anticipation notes (A+/Stable). Although TBTA intended to take out the bond anticipation notes with debt backed by congestion toll revenues, Fitch's rating conservatively assumes the bonds will be rolled over to long-term TBTA revenue bonds (outstanding senior and subordinate bonds rated 'AA-'/'A+' Stable).

The MTA's CEO recently stated the authority intends to continue pursuing congestion pricing, including challenging outstanding lawsuits. The governor's decision may face litigation alleging violations of the 2019 Traffic Mobility Act, which mandated that the MTA create the congestion pricing program but without an explicit deadline. The MTA board, which is scheduled to meet on June 26, has stated it cannot proceed with congestion pricing without the consent of the state under applicable federal law and regulation. This appears to address questions related to the MTA board's legal standing to suspend congestion pricing.

---

## **[S&P Bulletin: Postponement Of Congestion Pricing Could Strain Revenue Sources For Metropolitan Transportation Authority, NY](#)**

NEW YORK (S&P Global Ratings) June 7, 2024—S&P Global Ratings said today that the likely indefinite postponement of the Metropolitan Transportation Authority, N.Y.'s (MTA) central business district tolling program (CBDTP) increases uncertainty regarding funding sources for MTA's current and next multiyear capital plan. At the same time, the postponement could eliminate the risk of lower traffic on MTA's bridges and tunnels.

As a result of these two developments, we don't anticipate revising the MTA's transportation revenue bonds (TRB) rating or outlook (A-/Positive) at this time. However, we are expecting MTA's upcoming July and November financial plans to provide clarity on this funding shortfall. We also anticipate the MTA will release the cost and funding plan for its next multiyear capital program this fall.

We also do not expect to change our rating on MTA's payroll mobility tax bonds (AA+/Stable), given that the pledge of revenues consists mainly of employer mobility tax collected from private- and public-sector employers within the Metropolitan Commuter Transportation District and is not dependent on MTA's operation or ridership levels.

[Continue reading.](#)

## **[New York's MTA Braces for Higher Borrowing Costs With Toll Halt.](#)**

- **Debt service may increase by \$300 million without new funding**
- **MTA may need to sell farebox bonds sooner than anticipated**

While delaying New York City's congestion pricing initiative blew a \$15 billion hole in the Metropolitan Transportation Authority's capital program, it also may strain the transit agency's

operating budget.

The MTA, which runs the city's subways, buses and commuter rail lines, was counting on \$1 billion of new revenue each year from motorists paying a new toll to drive into Manhattan's central business district. The MTA would then issue new congestion pricing bonds to provide \$15 billion to modernize the more than 100-year-old system.

Selling the congestion pricing bonds would have allowed the MTA to postpone issuing debt that's repaid from its operating budget, giving that spending plan some breathing room as it works to increase ridership before taking on more debt. But without congestion pricing bonds or an alternative revenue source, the MTA says it will need to sell such debt earlier than planned. That means debt-service costs would increase sooner than anticipated by as much as \$300 million a year, the MTA has warned.

## **[MarketAxess Announces First Portfolio Trade for Tax-Exempt Municipal](#)**

## **Bonds.**

### **New tool brings e-trading efficiency and certainty of execution to muni baskets of up to 1,500 CUSIPs**

NEW YORK, June 13, 2024-(BUSINESS WIRE)—MarketAxess Holdings Inc. (Nasdaq: MKTX), the operator of a leading electronic trading platform for fixed-income securities, today announced the platform’s first ever portfolio trade for tax-exempt municipal bonds. The portfolio trade was executed earlier this month between a large bank and a large asset manager.

The new Portfolio Trading for Tax-Exempt Munis tool allows clients to send lists to multiple counterparties or a single dealer, negotiating price improvements and trading discreetly on a diversified basket of Tax-Exempt Munis in one singular point of transaction. Clients can load portfolio trades manually or utilize straight-through-processing via their OMS. Once loaded, clients can see instantly the changes in portfolio metrics, any impact on the portfolio’s overall market value and utilize MarketAxess’ technology to make split-second decisions on portfolio composition and pricing. During the portfolio negotiation process, clients also have the option to counter or remove individual line items for optimal execution.

Daniel Kelly, Head of Municipal Securities at MarketAxess, commented, “The portfolio trading tool was among the most requested enhancements to our Municipal bond franchise. Now muni traders can finally experience the same efficiency their counterparts in the corporate bond market have enjoyed for years—the flexibility to negotiate on individual line items without sacrificing certainty of execution for up to 1,500 unique CUSIPs in a single transaction.

With the launch of our automated execution suite of tools for munis last year and now, portfolio trading—we are proud to be delivering the innovation municipal market participants have asked for, and needed, to effectively scale their businesses,” he continued.

MarketAxess is one of the fastest growing electronic marketplaces for muni bonds. Last month, MarketAxess accounted for 8.1% estimated market share of municipal bonds—up from 5.6% the year prior—and representing \$577 million in average daily volumes.

For more information on MarketAxess muni solutions, visit:

## **[Orrick: Nearly \\$725 Million in Bond Proceeds to Finance New Replacement Passenger Terminal at Hollywood Burbank Airport](#)**

The authority that operates Hollywood Burbank Airport has closed on \$724.78 million in bonds to help finance construction of a new passenger terminal.

Orrick represented the Burbank-Glendale-Pasadena Airport Authority as bond and disclosure counsel in issuing 2024 Series A, B and C Airport Senior Revenue Bonds.

The final pricing terms resulted in a true interest cost of 4.54% and total net debt service of \$1.32 billion, the authority said in a [statement](#).

THE AUTHORITY

The Burbank-Glendale-Pasadena Airport Authority is a government agency created under a joint powers agreement between the cities of Burbank, Glendale and Pasadena for the sole purpose of owning and operating Hollywood Burbank Airport.

## THE IMPACT

The financing will support a new 14-gate passenger terminal at Hollywood Burbank Airport.

More than 100 institutional investors participated in the transaction.

“The Authority and its financing team believe the overwhelming reception for the bonds by the investment community provides a strong foundation for a second bond issue, anticipated to occur in 2026, to complete funding of the (Replacement Passenger Terminal) Project,” says Felicia Williams, President of the Authority.

The replacement terminal is scheduled to open in October 2026.

## THE TEAM

Orrick’s Larry Sobel and Jenna Magan led the team advising the authority. The team also included Les Krusen, Sean Baxter and Cathleen Chang.

## [How Debt Ate Chicago.](#)

### **Mounting liabilities are the greatest threat to the city’s survival.**

A fight broke out late one Saturday night, or, more accurately, early Sunday morning, at a bar on Chicago’s South Side. Someone called the police just after 4:30 AM. But the police didn’t come. The fight soon moved outside; one man issued a threat, got into his car, and then plowed it into the crowd, just before five o’clock. Three people were killed. Still no police. An officer wasn’t dispatched until 5:20 and didn’t arrive until more than an hour after the original call.

Chicago faces a dire police shortage. (See “Can We Get Back to Tougher Policing?,”) Over half of high-priority 911 calls had no cops available to respond. One important reason is that the city is now allocating almost half of its budget to debt and pensions, leaving ever less for essential services, including public safety. The municipal government is acting more like a conduit channeling money from residents to check-collectors than a protector of its citizens’ rights and liberties.

Chicago has dominated America’s heartland since the late nineteenth century. As the City of the Big Shoulders, it has been a place whose self-reliance and drive allowed it to compete with coastal metros boasting more obvious advantages. Chicago’s landscape and weather may leave something to be desired, but the city’s combination of cosmopolitanism and localism, embodied in its diverse neighborhoods, has helped give it a distinctive American personality. Yet bad services, corrupt politics, and elevated crime have made life in Chicago increasingly unpleasant, all worsened by the city’s parlous finances.

## **Illinois Debt Penalty Shrinks as 'Unexciting' Budget Passes.**

- **Fiscal 2025 budget heads to Governor Pritzker for signature**
- **State has 'come a long way' narrowing gap with peers: Schoback**

Illinois is closing the gap with its peers in the municipal-bond market as investors herald the passing of an on-time budget and a broad improvement in the state's fiscal standing.

The extra yield that investors demand on Illinois debt shrank on Wednesday toward the lowest levels of 2024 as lawmakers approved a \$53 billion budget for the year starting July 1, a sign pressure is easing on the US state with the weakest credit rating.

The budget was the tightest in several years and led to back and forth in the two Democrat-controlled chambers about how to balance revenue with rising costs. But there were none of the kind of fireworks Illinois has exhibited in past years, such as in the budget impasses seen from 2015 to 2017, said Ty Schoback, a senior municipal research analyst for Columbia Threadneedle Investments.

## **Yale University's Hospital System to Sell \$670 Million of Debt.**

- **Connecticut chain is returning to muni market like its peers**
- **Half of the proceeds will be used on capital projects**

Yale New Haven Health System is slated to join a flurry of hospitals issuing municipal bonds this year.

The Connecticut-based chain affiliated with the Ivy League university plans to borrow about \$670 million next month. Half of the proceeds from the debt sale will be used for its capital-spending program, which includes a neurosciences center, said Dana Marnane, a spokesperson for the system, in an email.

Hospital borrowing in the state and local government debt market has boomed this year, with deals already running at more than triple the rate of 2023, and more bond issuances are expected. Many of the larger systems are seeing their finances stabilize after the upheaval of the pandemic, though they've had to adjust to much higher costs for labor and supplies.

### **[Bank of America Backtracks on Lending Ban to Some Gunmakers.](#)**

- **Ban ends on loans to makers of assault weapons for civilians**
- **Policy pullback comes as Florida, Texas hit banks in ESG fight**

Bank of America Corp. is loosening restrictions on lending to the firearms and energy industries amid pressure from anti-ESG politicians in Texas and Florida.

The bank backed off its ban on lending to companies that make assault-style guns used for non-military purposes. Rather, the firm will make such decisions on a case-by-case basis with senior risk officers, according to its latest environmental and social risk policy framework. The Charlotte, North Carolina-based bank also made similar changes to its energy lending policies — it no longer has a blanket ban on financing for Arctic drilling.

“Certain client relationships or transactions that carry heightened risks go through a due diligence process that involves senior level risk review,” a Bank of America spokesperson said in an emailed statement. “We recently detailed that in our updated risk policy framework.”

### **[Philadelphia Arts College With \\$50 Million of Muni Debt to Shut.](#)**

- **The University of the Arts is the latest to announce closure**
- **School was in fragile financial state with enrollment dip**

University of the Arts, a private college in Philadelphia that trains future animators and dancers with roughly \$50 million of municipal debt outstanding, is abruptly closing after its finances deteriorated.

The college, founded in 1876 with about 1,200 full-time students, announced on Friday that it would close on June 7, marking the latest college to announce plans to do so this year. The school’s campus is located in a historic arts district of Philadelphia.

“Like many institutions of higher learning, UArts has been in a fragile financial state, with many years of declining enrollments, declining revenues, and increasing expenses,” Judson Aaron, chair of the board of trustees, and Kerry Walk, president of the college, said in a statement dated May 31. “We are struggling to make sense of the present moment.”

### **[Texas Capital Securities Launches Public Finance Division, Taps Veteran Investment Banker to Spearhead Expansion.](#)**

**Steve Genyk has joined Dallas-based Texas Capital Securities as Managing Director and Head of Public Finance. The investment banker, formerly head of public finance at UBS Financial Services, will build out TCS's new Public Finance business.**

Launched in 2022, Texas Capital Securities initially focused on corporate and mortgage sales/trading services. The new public finance division will provide municipal underwriting services to governments, nonprofits, and institutions in Texas and across the country.

The announcement was made by Texas Capital Bancshares, the parent company of Texas Capital.

Texas Capital President & CEO Rob C. Holmes said the expansion to serve municipal and public finance clients was “the next logical step to ensure Texas Capital remains the first call for companies and institutions” across the state.

“We’re particularly excited about our prospects in public finance thanks to potential synergies with Texas Capital’s well-established Government, Nonprofit and Institutions corporate banking group,” he said in a statement.

Holmes emphasized that “Texas cities, towns, schools and other institutions should be served by Texas-based municipal dealers and advisors,” adding that TCS is proud to extend its full-service platform to the government and public finance sector.

Holmes called Genyk’s appointment a “significant milestone” for Texas Capital as it continues to expand its corporate & investment banking capabilities. “Municipalities, nonprofits, and other municipal issuers in the state of Texas deserve to have a firm that makes decisions locally,” he said.

Genyk, who is based in Dallas, comes to Texas Capital from UBS Financial Services, where he held several leadership positions, including head of public finance, head of institutional middle markets and head of municipal trading.

As head of public finance, TCS said Genyk brings a proven track record of business building in the public finance sector and a shared obsession for client service. The company said Genyk’s addition underscores its commitment to being a full-service financial services institution equipped to serve the state, cities, schools, and institutions of Texas and beyond.

“It’s an honor to join Texas Capital as it continues to build the premier full-service financial services firm headquartered in Texas,” Genyk said in a statement.

The new managing director looks forward to “building on the track record of innovation at TCS with

the successful launch of our Public Finance business, partnering with the other firms conducting municipal business in this great state, and serving our clients with diligence and integrity.”

TCS said Genyk brings more than three decades of comprehensive leadership experience in the financial industry to his new role.

Before joining UBS, Genyk was head of fixed-income capital markets at Janney Montgomery Scott LLC and SVP of financing services at Philadelphia Industrial Development Corp. Genyk also held the role of managing director of public finance at Bear, Stearns & Co.

## **[Texans Face Higher Taxes Due To a Republican Fight With ‘Woke’ Banks.](#)**

“Banks should act like banks, not like political activists that are hostile to our state, our citizens, and our economy.” Those are the words of Ken Paxton, the attorney general for the State of Texas. If only Paxton would abide a variation of his advice for banks, whereby Republicans would act like Republicans, and not act in hostile fashion toward businesses that operate in the state of Texas. Alas, Paxton isn’t abiding the proposed variation.

Instead, he’s supported legislation in the Lone Star State dating back to 2021 that disallows governmental bodies in Texas from doing business with financial institutions seen as hostile toward or taking a stand against firearms or fossil fuels. Put another way, Paxton and other Texas pols are using swagger not their own to bully financial institutions operating within Texas to do the kind of business they think they should do.

Up front, politicians harassing businesses isn’t a huge surprise. That’s the way of things, or frequently the way of things among Democrats. Except that Paxton et al are yet again Republicans. Which lends the story a man-bites-dog quality. Republicans don’t do this, do they?

## **[Posh Florida Care Facility to Borrow \\$260 Million for Expansion.](#)**

- **Shell Point Retirement plans to build a new 14-story tower**
- **Hurricane Ian hit operator with up to \$85 million in damages**

The largest single-site, not-for-profit retirement community in the US is selling municipal bonds to

finance an expansion, less than two years after Hurricane Ian caused as much as \$85 million of damages.

Fort Myers, Florida-based Shell Point Retirement Community plans to borrow about \$260 million to build a new tower with independent-living units, plus a 152,000 square-foot “town center” facility. The new community center will also be a hurricane-grade shelter, said Burke Rainey, Shell Point’s chief financial officer.

Retirement communities with land to build are adding independent-living units “because that’s what’s driving their businesses right now, higher occupancies, for which they generally receive an entrance fee,” Richard Scanlon, senior managing director at B.C. Ziegler and Company, said.

## **[Florida’s 125% Surge in Property-Insurance Bills Sows Havoc.](#)**

- **Mounting costs push assisted-living centers in state to brink**
- **‘We are headed into a train wreck,’ one operator says**

For Filicia Porter, the insurance bills were the final straw. They’d been climbing steeply for her assisted-living business as Florida was battered with ever more-powerful storms, and eventually, the numbers stopped adding up.

So in March, she finally decided to call it quits, shutting the facility near Palm Beach that she opened just two years ago. That came four months after she closed an older location in Port St. Lucie, opened in 2017. Together, they left a dozen residents scrambling to find another place to live.

“Each year you see a rise. Why pay more?” said Porter, who first started The House of Cares to capitalize on the burgeoning demand for elder care as baby boomers flooded into the Sunshine State. But now, as her premiums soared on top of all her other costs, she just couldn’t “continue to deplete” herself.

## **[NY’s MTA Mulls Replacing Build America Bonds With Lower-Cost Debt.](#)**

- **Transit agency has \$3.73 billion of BABs outstanding**

## • **MTA seeks to use special provision to refund BABs for savings**

New York's Metropolitan Transportation Authority is considering refunding at least a portion of its \$3.73 billion of taxable Build America Bonds into tax-exempt debt, even as some investors push back against such transactions.

The MTA's board is set to meet this Wednesday and could give the transit agency the authority to refinance its BABs if officials see an opportunity to reduce debt-service costs, according to MTA board documents. The transit agency, which runs New York City's subways, buses and commuter rail lines, has yet to announce a potential refunding sale.

BABs are taxable municipal securities that were sold in 2009 and 2010. The federal government originally said it would cover 35% of the interest costs on the securities but has since lowered that subsidy through sequestration. Some issuers claim that a subsidy cut is an extraordinary event, which allows them to use an optional redemption provision to refinance the debt at a lower cost.

State and local governments have been refinancing their BABs this year by using that provision. The MTA also believes it can use that option rather than refund through a make-whole call, which is more expensive for an issuer.

"Based on MTA staff review and outside legal advice, a material adverse change to certain sections of the Internal Revenue Code, which resulted in the decrease in the cash-subsidy payments to MTA and TBTA caused by sequestration, constitutes an 'extraordinary event'," according to MTA board documents, referring to the Triborough Bridge and Tunnel Authority, which the MTA oversees.

The Regents of the University of California in March closed a \$1 billion refunding deal that refinanced BABs for tax-exempt munis even after investors questioned the legality of the transaction. Some bondholders risk taking a loss in such refundings as the cash payment may be lower than what they originally paid to buy the bonds.

The Municipal Securities Rulemaking Board last month [warned investors](#) of the risks in buying BABs that are trading at more than 100 cents on the dollar as some issuers are buying back the securities before they mature.

## **[Teachers, School Boards Threaten to Sue Over Gov. Newsom's Fix for Revenue Shortfall.](#)**

### **Powerful organizations argue governor would address immediate problem but deny schools additional funding they're entitled to**

Two powerful education groups' opposition could derail Gov. Gavin Newsom's plan to fix a massive state budget shortfall for TK-12 schools and community colleges and lead to litigation this summer

with an unpredictable outcome.

The dispute is over Proposition 98, the 35-year-old, complex formula that determines how much money schools and community colleges must receive annually from the state's general fund. Newsom says he's complying with the law while largely sparing schools and community colleges the larger budget cuts facing UC, CSU and non-educational parts of state government.

To which the California School Boards Association and the California Teachers Association say, "Thanks, but no thanks."

## [\*\*Alaska's New 'Green Bank' Hopes to Improve the Financial Case for Renewable Energy.\*\*](#)

Alaskans looking to invest in solar panels or other renewable energy infrastructure for their homes will likely have some new options in the next few years. The state is setting up a new "green bank" that aims to help Alaskans keep their power costs down and speed the transition to renewable energy.

The legislation creating Alaska's green bank hasn't been signed into law yet — it's awaiting a few final checks before Gov. Mike Dunleavy's signature — but Chris Rose, who has led the nonprofit Renewable Energy Alaska Project for two decades, is excited.

"I think the green bank can actually play a pretty big role in helping people get upfront capital to do the kinds of projects that they want to do, but they just don't have that money," Rose said in a phone interview.

## [\*\*BNP Bond Desks Stop Offering Regular Oil and Gas Deals.\*\*](#)

- **Bank no longer doing conventional bond sales for sector**
- **Development follows stricter ESG rules, climate lawsuit**

BNP Paribas SA, the European Union's biggest bank, has effectively ceased underwriting bonds for oil and gas producers, representing one of the most dramatic crackdowns on fossil fuels among the world's major financial firms.

BNP is no longer participating in conventional bond sales for the sector, according to clarifications

provided by the bank in connection with its annual general meeting on Tuesday. The lender, which hasn't formulated an official policy on the matter, told Bloomberg separately that the practice currently applies to all upstream activities.

BNP has gradually been limiting oil and gas clients' access to financing as the bank contends with ever stricter ESG regulations in Europe, as well as a lawsuit brought by climate activists last year. At the same time, BNP has continued to step up its presence in sustainable finance, and is now the biggest underwriter of green bonds globally, according to data compiled by Bloomberg.

## **[Texas State University System Board of Regents \(TX\): Fitch New Issue Report](#)**

Key Rating Drivers Revenue Defensibility - 'aa' Sound Growth Prospects for System; Strong State Funding Support TSUS serves students across seven campuses in several regions of the state of Texas (AAA/Stable). Its student base has generally tracked flat to modest growth in recent years, although full time enrollment (FTE) rose by a robust nearly 5% yoy to 69,936 in fall 2023 (fiscal 2024) or 91,334 in headcount. Applications are reportedly up year-to-date for fall 2024, and further TSUS enrollment expansion is anticipated by management over the next few years. Management reports student housing occupancy remains strong (96% in fall 2023) at nearly all of TSUS' four-year institutions, bolstered in part by limitations inherent in a low inventory of student housing. Fitch expects sound demand fundamentals will generate similar trends over the intermediate term. TSUS' revenue base is strong and fairly diverse, with additional pricing power, if needed. The system also benefits from the state's strong funding framework for operations and capital. Net tuition/fees and auxiliary revenue contributed a more typical 45% of fiscal 2023 adjusted total operating revenues, followed by 28% from state appropriations.

## **[Texas Capital Hires Ex-UBS Banker to Head New Muni Practice.](#)**

- **Steve Genyk starts as bank's head of public finance in Dallas**
- **State's No. 4 bank swoops in as recent laws crimp Wall Street**

Texas Capital Bancshares Inc. has hired a former UBS Group AG executive to build out its municipal bond desk.

Steve Genyk, who most recently served as head of public finance at UBS before it shuttered much of its muni division, will lead a newly formed group devoted to state and local government debt, according to a release announcing the hire. He will be based in Dallas.

The move is the first step in Texas Capital's entry into the underwriting of municipal bonds, an industry that's been recently upended in Texas because of legislation targeting some Wall Street banks' stances on environmental, social or governance causes.

"The expansion of our broker dealer to serve municipal and public finance clients was the next logical step to ensure Texas Capital remains the first call for companies and institutions across our state," Chief Executive Officer Rob Holmes said in a statement. Texas Capital is the state's fourth-largest commercial bank and has recently expanded its investment banking and wealth management services.

Rapid population growth in Texas and the subsequent need for updated infrastructure such as schools and airports make it a lucrative market for public finance bankers. Last year, Texas was the biggest market for muni sales, according to data compiled by Bloomberg.

However, the state's political backdrop has complicated the muni underwriting business for some banks. Certain firms have been barred from working on deals there due to a pair of Republican-backed laws targeting their energy and firearm policies. UBS was put on a state list of companies that it deems to "boycott" the fossil fuels industry in 2022, representing a blow to its muni group.

Attorney General Ken Paxton is currently reviewing banks' energy policies and could bar more national firms from the state's muni market. That may create an opportunity for smaller firms to gain market share.

### **[Dimon Met With Texas AG as State Bans Banks Over ESG Policies.](#)**

- **The April meeting with the JPMorgan CEO took place in New York**
- **Banks are being examined for their stance on oil and gas**

JPMorgan Chase & Co. Chief Executive Officer Jamie Dimon met with Texas Attorney General Ken Paxton as the Republican official threatens to bar more banks from helping the state and its local governments sell bonds to raise funds for projects.

Dimon and Paxton met in New York in April, according to a person familiar with the meeting who is not authorized to speak on the matter and asked not to be identified. Staffers in the attorney general's office have been meeting with several bankers as they examine companies to determine whether they engage in a boycott of the oil and gas industry. Paxton has targeted members of the Net-Zero Banking Alliance, which includes JPMorgan.

"Jamie meets with elected officials all the time, but his message has been consistent on Texas: JPMorgan Chase is committed to the state in the long-term and to helping Texas remain a top energy producer," a spokesperson for the bank said in a statement. "We make independent business decisions and are not constrained by our memberships to any third-party organizations."

### **[New CA Bills Aim to Protect Water Rates, Charges from Prop. 218 Litigation: Brownstein](#)**

#### **Lawmakers introduce tools to ease pressure from SGMA and infrastructure demands on public agency revenue powers**

Adopted in 1996, Proposition 218 (and later Proposition 26 in 2010) amended the California Constitution to create limits, including voter approval requirements, around local and regional government revenue powers (taxes, assessments and fees). While the intent of these laws is clear, ensuring proper compliance is far more convoluted. The California State Legislature introduced three bills this session in an apparent effort to reduce the vulnerability of public agencies' revenue streams to legal attack.

#### **Why now?**

One major factor is the significant pending costs of infrastructure and service improvements that agencies are planning to implement to meet future water supply and reliability needs in the face of climate change and implementation of the Sustainable Groundwater Management Act (SGMA).

Along with the increased need to raise revenue, there are significant questions as to who should pay and how much. Using SGMA implementation as an example: how should costs for projects to mitigate subsidence, shrinking groundwater storage, seawater intrusion, declining groundwater levels, poor water quality and depleted interconnected surface water be allocated? Most would probably answer, "fairly." But what fair means is not always clear, even assuming there is sufficient data to determine the cause of these undesirable results. For example, how should project costs be allocated between:

**[Great Lakes Water Authority \(Sewer\) - Fitch New Issue Report](#)**

The 'AA-' and 'A+' sewer revenue bond rating, along with the 'a+' Standalone Credit Profile, reflect the system's very strong financial profile in the context of its very strong revenue defensibility and very strong operating risk profile, both assessed at 'aa'. The system's leverage, measured as net-adjusted debt to adjusted funds available for debt service (FADS), was very low at 9.2x in fiscal 2023. Leverage is projected to peak at 9.7x in fiscal 2024 in Fitch's Analytical Stress Test (FAST) rating case, supporting the Positive Outlook. The revenue defensibility assessment considers Great Lakes Water Authority's (GLWA, or the authority) ability to reallocate any shortfalls from a non-performing customer to its performing customers via a rate increase and the overall strength of such customers. While Fitch Ratings considers the credit quality of Detroit Water and Sewerage Department's (DWSD) sewer system midrange, the authority's other large wholesale customers have stronger credit profiles, resulting in a strong aggregate purchaser credit quality (PCQ). The operating risk profile considers the system's very low operating cost burden, coupled with its favorable life cycle ratio, while recognizing continued robust capital plans.

[ACCESS REPORT](#)

Thu 16 May, 2024 - 4:47 PM ET

---

**[Great Lakes Water Authority, Michigan: Fitch New Issue Report](#)**

Great Lakes Water Authority (GLWA) has contract provisions that allow for full cost recovery and the unlimited reallocation of costs across users. Under the water and sewer services agreements in place with wholesale customers, the authority has the exclusive right to establish rates for the water service it provides. The authority has delegated to the city of Detroit its right to establish rates with respect to services provided to city of Detroit customers. In fiscal 2023, the system's operating cost burden was considered very low at \$2,568 per million gallons (mg), consistent with the operating risk assessment. The life cycle ratio was very low at 35% in fiscal 2023. The system had moderate leverage of 10.2x as of fiscal 2023, which is in line with historical performance of between 9.7x and 10.2x since fiscal 2019. GLWA provides wholesale water services to a population of approximately 3.8 million, or 38% of the state's population.

## **California Statewide Communities Development Authority: Fitch New Issue Report**

Key Rating Drivers Revenue Defensibility - 'bbb' Maintenance of Leading Market Positions; Growing in Accretive Markets Adventist's revenue defensibility continues to be midrange, with solid positions in multiple markets, all of which exhibit stable-to-favorable population growth trends and socioeconomic characteristics. Adventist is a multistate provider, with system operations in four states and inpatient hospital facilities located in three states: California, Oregon and Hawaii, (with one retirement facility in Washington), although the vast majority of facilities are located in California. Operating Risk - 'bbb' Improved, but Challenged Performance in Fiscal 2023; Expected Operational Progress with Robust Capex Plan The system's operating risk assessment remains midrange with the expectation of adequate cost management opportunities to continue supporting improved operating performance. In fiscal 2023 (Dec. 31), Adventist recorded an operating loss of approximately \$108 million, which is significantly improved from the prior period's \$241 million operating loss in fiscal 2022. Fiscal 2023's improved operating performance translated into a better 3.0% operating EBITDA margin (up from 0.3%), and is in line with management's projections. Fitch anticipates operational performance to continue to track positively and reach between 6%-7% over the next 24 months, which should be attainable.

Fri 10 May, 2024

---

### **Dormitory Authority of the State of New York (School Districts Revenue Bond Financing Program): Fitch New Issue Report**

The 'AA-' program rating, two notches below the State of New York's 'AA+' /Stable Issuer Default Rating (IDR), reflects linkage to the IDR given the statutory ability to intercept available state school aid to provide funds to pay debt service on a timely basis if borrowers fail to make payments on the underlying loans to the Dormitory Authority of the State of New York (DASNY). Although annual state aid has provided coverage of pro forma maximum annual debt service for all participating school district borrowers, not all school districts participating in the program have historically received sufficient state aid in the time between when loan payments are due to DASNY and when debt service is due (intercept periods). There is no provision for advancement of aid that has been appropriated but not yet paid. There is a constitutional mandate for, and strong history of, state support for education. Fitch Ratings believes program management by DASNY, a key issuer for the state's capital program, is a credit strength for this pooled financing program and mitigates the above-mentioned concerns, including around intercept periods.

### **BlackRock Cuts Jobs in Muni Business Under New Leadership.**

- **Patrick Haskell took over muni group from Peter Hayes in 2024**
- **BlackRocks' muni ETF dwarfs its largest actively-managed fund**

BlackRock Inc., the world's largest money manager, cut fewer than 10 jobs in its municipal bond department under the new leadership of Patrick Haskell, according to a person familiar with the matter.

Haskell, a former co-head of fixed-income capital markets at Morgan Stanley, took over the group this year from Peter Hayes, who retired after nearly four decades managing state and local government debt.

"BlackRock continuously organizes its teams to better serve the market and our clients, and this week aligned our municipal bond investment team to help us accelerate processes, improve information sharing and drive performance," a BlackRock spokesperson wrote in an emailed statement.

### **Muni Momentum Spurs Illinois to Speed Up \$1.8 Billion Bond Sale.**

- **Demand allowed state to sell earlier as spread tightened**
- **Market rally and state's improved credit rating helped sale**

Illinois took advantage of an improving credit grade to speed up an \$1.8 billion debt sale, bolstered by investors' hunger for yield amid a rally in the municipal market.

The state sold \$1.55 billion in tax-exempt bonds and \$250 million in taxable debt for capital projects and to finance an accelerated pension payment program on Tuesday. Illinois received more than \$12 billion in orders, which includes \$1.5 billion from retail investors, according to the state.

While the state is still the lowest rated in the US, it has earned nine credit rating upgrades in the last three years, pulling back from the brink of junk near the start of the pandemic. Illinois now carries three A-level grades.

### **WSJ: Texas Ban on 'Woke' Banks Opens Door for Smaller Firms.**

#### **Megabanks are in retreat in the \$4 trillion municipal-bond market**

The political conflict over socially conscious finance is a boon for smaller investment banks in one contentious market: Texas.

The clash over environmental, social and corporate-governance investing follows state restrictions passed in 2021 on government business with financial firms perceived as taking a stand against firearms or fossil fuels. Wall Street heavyweights such as Bank of America and Wells Fargo have pulled back in Texas, even as the state's growth has made it the nation's top issuer of state and local debt, with \$42 billion last year.

Even beyond Texas, big banks are in retreat in the \$4 trillion municipal-bond market. Higher rates and depressed borrowing have dented profits, which weren't that spectacular to begin with. Large firms are pulling back at varying rates as a result.

### **[Barclays Is the Latest Firm to Face Anti-ESG Wrath in Oklahoma.](#)**

- **Treasurer added company to state list of oil boycotters**
- **Move could hurt bank's public finance business in Oklahoma**

Oklahoma State Treasurer Todd Russ announced on Friday that Barclays Plc would be added to his list of companies that he claims have boycotted the fossil fuel industry — a gesture that aims to limit the governmental business the bank can conduct in the state.

The Republican treasurer's office justified the move by saying the British bank has "publicly committed to boycott fossil-fuel companies," according to an emailed statement. Barclays' [2024 climate change statement](#) says the bank does not provide project financing, or other direct financing to energy clients, for upstream oil and gas expansion projects or related infrastructure.

According to the 2022 Republican-backed law, Oklahoma state agencies and political subdivisions can't contract with a company unless it provides a written verification that it doesn't boycott energy companies.

### **[Wells Fargo, RBC Bankers Met Texas AG Staff Regarding ESG Probe.](#)**

- **Paxton's office is investigating banks' stance on fossil fuels**
- **Meetings took place in Austin last month, emails show**

The Texas Attorney General's staff met with municipal finance executives from Wells Fargo & Co. and RBC Capital Markets as Ken Paxton's probe into whether the Wall Street banks "boycott" the fossil fuels industry drags on.

Bankers from RBC, including Bob Spangler, the New York-based head of municipal finance for the firm, met with Paxton's staff on Tuesday at the attorney general's office in Austin, according to emails obtained by Bloomberg News through a public records request.

Earlier in April, Wells Fargo also met with members of the attorney general's office, other emails between the bank's employees and Paxton's staff show. Attendees included Scott Fontenot, senior

vice president for state and local government relations at the bank, and Blaine Brunson, a Texas public finance banker. They were joined by the bank's lawyers.

### **[What Could Ken Paxton's Bank Bans Mean for the Dallas Bond?](#)**

**As banks are banned from the Texas bond industry, interest rates are inflating and taxpayers are footing the bill.**

Finance experts from across the state gathered in Austin last month for The Bond Buyer's Texas Public Finance conference, where they lamented, among other things, the cost of Ken Paxton's bank bans.

The bans stem from a 2021 anti-ESG (environment, social and governance) state law barring banks from underwriting municipal bonds if the bank is seen as boycotting or discriminating against the fossil fuel or firearm industries. The law pertains to any local government contract over \$100,000, and has been enforced through investigations by Attorney General Ken Paxton.

#### **So What Does That Mean for Dallas?**

When voters approve a bond package, city officials go to major banks for the loans. Once local governments find underwriters for the bonds, Paxton signs off on the deals, per state law. With a \$1.25 billion bond package approved by Dallas voters on May 4, the city now has to find a bank or banks to loan the money. But now they have fewer options than they did with previous bond measures.

### **[Bonds for Florida High-Speed Rail Pop in Market 'Starved' for High-Yield Munis.](#)**

- **Florida rail firm tapped muni, corporate bond market last week**
- **Muni high-yield fund flows helped drive demand for the issue**

Municipal bonds issued last week for Florida's private rail operator, Brightline, climbed in the

secondary market as investors clamored for new high-yield securities.

Prices on large block trades for the BBB- rated securities issued with a 5.5% coupon rose as high as 105.4 cents on the dollar Tuesday, up from 102.3 cents when they were priced last week. Eager investors drove risk premiums, or the spread over top-rated debt, on the bonds tighter to about 75 basis points from 120 basis points.

Brightline's Florida route where trains can reach speeds as fast as 125 miles per hour, is the first new US private passenger railroad in the US in more than a century. The railroad issued about \$3.2 billion of municipal bonds as part of a debt restructuring and recapitalization last week. With backing from Fortress Investment Group, Brightline is also building a new, faster train line connecting Las Vegas to Southern California.

### **[Connecticut Waterfront Real Estate Project to Tap Muni Market.](#)**

- **Roughly \$30 million in bonds are expected to be issued**
- **Bridgeport district's first phase now calls for 420 apartments**

A district set up by Bridgeport, Connecticut, to transform a waterfront steelworks site off of Interstate 95 into a new residential neighborhood with shops and parks plans to sell more municipal bonds to fund the project.

The Steel Point Infrastructure Improvement District — on behalf of a subsidiary of developer RCI Group — will issue \$30 million of additional debt in May, according to an investor presentation disclosed Monday on the Municipal Securities Rulemaking Board's EMMA website. Since the sale of about \$50 million in unrated muni bonds in 2021, plans for the first phase of the massive 2.8 million-square-foot development have changed, necessitating extensive site clean up and infrastructure.

Proceeds of the latest bond offering will cover public improvements and remediation.

## **[State of Illinois: Fitch New Issue Report](#)**

The 'A-' Long-Term Issuer Default Rating (IDR) of Illinois reflects its solid operating performance, albeit still weaker than most other states', and long record of structural imbalance, primarily related to pension underfunding offset by continued progress toward more sustainable budgeting practices. The 'A-' IDR also reflects the state's elevated long-term liability position and resulting spending pressure. Illinois' deep and diverse economy is only slowly growing, but still provides a strong fundamental context for its credit profile.

## **[Oklahoma Republicans Weigh Rolling Back Anti-ESG Law They Passed.](#)**

- **Oklahoma study shows anti-ESG law has caused higher debt costs**
- **The state's house is considering the Republican-backed bill**

Lawmakers in Oklahoma are having second thoughts about anti-ESG legislation that limits which Wall Street banks local governments can do business with.

A Republican-introduced [bill](#) that would narrow the scope of a state law that blacklisted financial firms for their restrictions on lending to oil, gas and coal companies, is making its way through Oklahoma's legislature.

The proposal comes as concerns mount that the 2022 law is driving up municipalities' borrowing costs in the state. Three major municipal-bond underwriters — Bank of America Corp., Wells Fargo & Co. and JPMorgan Chase & Co. — are on a state list of companies considered to “boycott” the fossil fuels industry.

A new [study](#) published Monday from the Oklahoma Rural Association — a group representing smaller communities — found that the state is incurring “avoidable” costs as a result of the law.

According to Oklahoma's Energy Discrimination Elimination Act, state agencies and political subdivisions can't contract with a company unless it provides a written verification that it doesn't boycott energy companies. In the 17 months since the law went into effect it's cost the state and its governments \$185 million in additional expenses, the study estimated.

“This increase in borrowing costs imposes an unnecessary financial burden on Oklahoma municipalities, potentially forcing them to cut spending on important public services or infrastructure projects, or raise taxes,” according to the report's author, Travis Roach, an economics professor at the University of Central Oklahoma. The estimate is conservative, he noted.

The GOP stronghold is one of a handful of US states, including Texas, that enacted legislation targeting environmental, social and governance corporate policies in recent years, driving upheaval in local muni markets. Bank of America, Wells Fargo and JPMorgan are among the six companies considered energy boycotters by Oklahoma's Republican State Treasurer Todd Russ. Since the law went into effect, the firms have seen their public finance business in the state dry up.

Bank of America was Oklahoma's top muni bond underwriter in 2021 and has since ceded its spot to Robert W. Baird & Co., according to data compiled by Bloomberg. JPMorgan and Wells Fargo - also once major underwriters in Oklahoma — have also seen their public finance business there dwindle.

### **'Free Market' Barrier**

Roach's study compared the average coupon rate on muni bonds sold in Oklahoma against those of states without a similar law. He found that Oklahoma's coupon rates are now 59 basis points higher than they would have been if the law didn't pass.

“This number will continue to grow for as long as the EDEA policy restricts municipalities from participating in a free market and selecting banks that meet their economic needs,” he said.

Oklahoma's Senate Bill 1510, would rein in the energy law so it only applies to state agencies and no longer applies to cities and counties.

The bill was introduced by Republican state senator Chuck Hall, who is the chief executive officer of Exchange Bank and Trust Co. He told the Oklahoma Voice that he didn't think the law should preempt local decision-making. The legislation has advanced to the state house.

John Collison, director of the Oklahoma Rural Association, said that the bill is a “step in the right direction” and the group hopes it passes. Still, he said he would like to see more work done on the issue.

“The ideal outcome would be to get back to where we were two years ago and let the lending institutions lend to cities and municipalities and the state of Oklahoma at the best rate possible,” he said.

## **[S&P Charter School Brief: North Carolina](#)**

### **Overview**

As of April 23, 2024, S&P Global Ratings maintains six public ratings on North Carolina charter schools. North Carolina began allowing charter schools to operate after passing the Charter Schools Act of 1996. As of the 2023-2024 school year, North Carolina is home to 211 charter schools serving approximately 145,000 students, representing around 9% of all public school students in the state.

Although our six rated North Carolina charter schools represent a small sample size, we believe growing charter school enrollment, compared with that of traditional district schools, reflects increasing demand for charter school options in the state.

## **[Bears Request More Than \\$2 Billion in Public Money to Fund \\$4.6 Billion Stadium Project.](#)**

The Chicago Bears have some big plans for the new stadium they're looking to build to replace their longtime home of Soldier Field. Of course, they aren't planning to pay for it all themselves.

The team revealed reveal plans Wednesday for a \$4.6 billion project to build a new enclosed stadium on the Lake Michigan lakefront area. The team is planning to pledge \$2.025 billion to make it happen, leaving Illinois taxpayers on the hook for the remaining \$2.6 billion.

For perspective, that works out to \$183 per Illinois resident.

## **[Vegas-to-California \\$12 Billion Rail Line Kicks Off Construction.](#)**

- **Brightline West awarded \$3 billion under infrastructure bill**
- **Fortress-backed rail refinancing some \$4 billion for Florida**

Brightline West, a \$12 billion high-speed rail project connecting Las Vegas to Southern California, broke ground Monday, the latest step in bringing high-speed rail to the US.

“People have been dreaming of high-speed rail in America for decades — and now, with billions of dollars of support made possible by President Biden’s historic infrastructure law, it’s finally happening,” Department of Transportation Secretary Pete Buttigieg said in a statement.

The Fortress Investment Group-backed rail operator is projected to run 218 miles (about 350 kilometers) along the median of Interstate 15. Trains will be capable of running at speeds of 200 miles per hour, making it the first true high-speed rail line in the US. Amtrak’s 457-mile Acela service on the East Coast tops out at 150 miles per hour and is variously labeled high-speed or “higher-speed.”

The project has been in the works for years as Brightline — the operator of the first new US private passenger railroad in more than a century — seeks to expand its footprint outside of Florida.

Currently, the rail company is seeking to refinance roughly \$4 billion in debt for its Florida line. Brightline plans to sell \$2 billion of municipal bonds with some of the lowest investment grade ratings as well as about \$1.25 billion of subordinate taxable debt.

Last year, Brightline West was awarded \$3 billion in funding under President Joe Biden’s Bipartisan Infrastructure Bill. The rest of the project will be privately funded and has also received a total allocation of \$3.5 billion in private activity bonds from the US Department of Transportation.

“This is a historic project and a proud moment where we break ground on America’s first high-speed rail system and lay the foundation for a new industry,” said Wes Edens, Brightline founder. “Today is long overdue, but the blueprint we’ve created with Brightline will allow us to repeat this model in other city pairs around the country.”
