SIFMA is the voice of the U.S. securities industry. We represent the broker-dealers, banks and asset managers whose nearly 1 million employees provide access to the capital markets, raising over \$2.5 trillion for businesses and municipalities in the U.S., serving clients with over \$18.5 trillion in assets and managing more than \$67 trillion in assets for individual and institutional clients including mutual funds and retirement plans. SIFMA, with offices in New York and Washington, D.C., is the U.S. regional member of the Global Financial Markets Association (GFMA). For more information, visit http://www.sifma.org.

MARKET SUMMARY

Municipal Issuance Overview - Primary Market

According to Thomson Reuters, long-term public municipal issuance volume totaled \$100.7 billion in the second quarter of 2017, an increase of 16.3 percent from the prior quarter (\$86.6 billion) but a decline of 15.8 percent year-over-year (y-o-y) (\$119.5 billion). As of the end of June, year-to-date municipal issuance totaled \$187.2 billion and was generally in line with the 10-year average of \$185.7 billion. Including private placements¹ (\$4.6 billion), long-term municipal issuance for 2Q'17 was \$105.1 billion.

Tax-exempt issuance totaled \$87.6 billion in 2Q'17, an increase of 14.4 percent q-o-q but a decline of 16.9 percent y-o-y; year to date, tax-exempt issuance was \$164.2 billion. Taxable issuance totaled \$9.3 billion in 2Q'17, an increase of 29.0 percent q-o-q and an increase of 36.4 percent y-o-y; year to date, taxable issuance totaled \$16.6 billion. AMT issuance was \$3.7 billion in 2Q'17, an increase of 35.3 percent q-o-q but a decline of 48.3 percent y-o-y; year to date, AMT volumes were \$6.5 billion.

By use of proceeds, general purpose led issuance totals in 2Q'17 (\$22.0 billion), followed by primary & secondary education (\$20.6 billion) and water & sewer facilities (\$10.4 billion). Refunding volumes rose slightly to comprise 40.8 percent of issuance in 2Q'17 from 34.2 percent in the prior quarter but were a decline from 51.5 percent year-over-year.²

Yields, Inflows, and Total Return

Ratios of 10-year tax-exempt AAA GOs and similar-maturity Treasuries fell in the first quarter on a q-o-q basis, averaging 89.6 percent in 2Q'17 from 95.6 percent in 1Q'17.

According to the Investment Company Institute (ICI), first quarter net flow into long-term tax-exempt funds was positive, with \$7.9 billion of net inflow in 2Q'17 compared to \$7.1 billion of inflow from 1Q'17 and \$19.2 billion of inflow y-o-y.

According to Bank of America-Merrill Lynch indices, municipals gained 2.9 percent in the second quarter of 2017. The utilities, tobacco, and health sectors had the strongest performance within the individual sectors (2.4 percent, 2.3 percent and 2.3 percent respectively) in 2Q'17 while general obligation (G.O.), tax, and toll/turnpike underperformed relative to other municipal sectors (1.4 percent, 1.4 percent and 1.7 percent total return, respectively). Build America Bonds (BABs) gained 2.9 percent, outperforming both tax exempts bonds (2.2 percent) and similarly-rated corporate bonds (2.0 percent) in 2Q'17.

Year to date ending June, tax-exempt municipals returned 3.4 percent, Build America Bonds returned 4.2 percent, and investment grade corporates returned 3.3 percent.

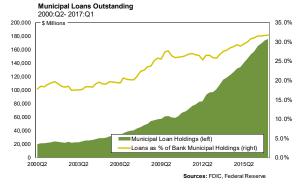

Trading Activity and Bank Holdings

Trading activity fell q-o-q to \$10.6 billion daily in 2Q'17, a 5.1 percent decrease from 1Q'17 (\$11.1 billion) and a 6.2 percent decline from 2Q'16 (\$11.3 billion). By number of trades, trading activity also fell 5.6 percent on a q-o-q basis but rose 9.7 percent on a y-o-y basis.

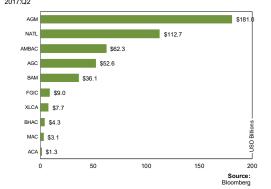

¹ Private placement figures are excluded in charts and tables.

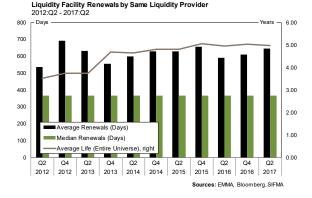

² Percentages represent both full refundings and the half the dollar amount of deals that contain both refundings and new financing.

Outstanding Insured Municipal Bonds by Insurer 2017:Q2

Bank holdings of both municipal loans and bonds rose in 1Q'17 from the prior quarter to \$176.0 billion (from \$173.7 billion) and \$378.2 billion (from \$375.4 billion), respectively.

Bond Insurance Update

Insured municipal issuance totaled \$6.6 billion in 2Q'17, a 27.4 percent increase q-o-q (\$5.2 billion) but a decline of 7.5 percent y-o-y (\$7.1 billion). Year-to-date ending June, insured bond issuance totaled \$11.8 billion, down 8.5 percent from the first half of 2016. At its peak in 2005, nearly 60 percent of all municipal issuance by dollar amount was insured; at its low in 2012, only 3.6 percent was insured. Since the low, insured bonds issuance has gradually picked up to represent approximately 6 percent of all issuance by 2014 and has stayed relatively steady by proportion since then.

By outstanding, \$468.1 billion, or approximately 12.9 percent, of all municipal bonds outstanding, were insured as of the end of June.

ARS, FRN and VRDO Update

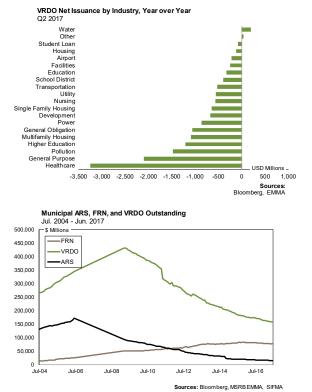

Issuance of variable-rate demand obligations (VRDOs), puttable long-term municipal bonds with interest rates that reset periodically, continue to remain muted in the second quarter. A total of \$1.1 billion was issued in 2Q'17, an increase of 13.3 percent q-o-q but a decline of 65.0 percent y-o-y. Outstanding volumes continue to decline, with \$158.1 billion outstanding as of the end of June 2017, a decline of 1.7 percent q-o-q and a decline of 8.8 percent from June 2016; from its peak of \$442.8 billion in November 2008, the market has shrunk by 64.3 percent altogether. For the first half of 2017, \$2.0 billion of VRDOs were issued.

The SIFMA Municipal Swap index, a seven-day high-grade market index comprised of tax-exempt VRDOs, ended June at 0.91 percent, averaging 0.84 percent throughout 2Q'17, 15 basis points wider than than 1Q'17's average (0.84 percent) and 44 basis points wider than 2Q'16's average (0.40 percent).

As of the end of June, \$21.7 billion of VRDO liquidity facilities were scheduled to expire in 2017 with an additional \$36.7 billion in 2018 for a total of \$58.4 billion of liquidity facilities on 2,598 CUSIPs, a relatively mangeable rate given the current stability of liquidity providers in this space. VRDO liquidity facility renewals with the same liquidity provider on approximately 863 unique CUSIPS averaged 645.9 days from the original expiration date, rising from 608.3 days in 4Q'16. The median extension, however, continues to remain unchanged at 1 year (365 days). The average tenor of a liquidity facility of the entire universe of VRDOs was approximately 4.98 years, falling slightly from 4Q'16. However, excluding self-liquidity deals, the average remaining tenor of liquidity facilities in the entire VRDO universe was 3.87 years, down slightly from the 3.94 years in 4Q'16.

Unlike VRDOs, floating rate bond issuance declined quarter over quarter with \$606.3 million issued in 2Q'17, a 36.5 percent decline q-o-q but an increase of 121.6 percent y-o-y. For the first half of 2017, \$1.6 billion of floating rate bonds were issued. At end-June, \$77.9 billion of floating rate bonds were outstanding, a decline of 0.2 percent q-o-q and a 4.1 percent decline y-o-y. Both the LIBOR and SIFMA swap index remain popular benchmark indices for floating rate issuance.

Auction rate securities (ARS) continue to remain in run off mode, with \$15.4 billion of ARS outstanding end-June, a decline of 7.0 percent q-o-q and 18.0

percent y-o-y. From its peak of \$205.6 billion in December 2017, the market has declined 92.5 percent. Student loan ARS continues to remain an outsized portion (34 percent) of remaining ARS outstanding, followed by healthcare (20 percent).

Government & Rating Update

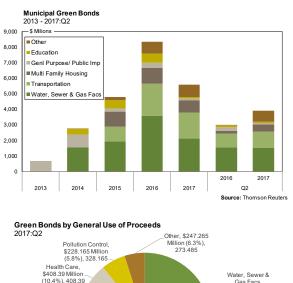

On May 3, the Fiscal Oversight Board of Puerto Rico officially filed for bankruptcy under Title III of the PROMESA Act with \$74 billion in bond debt. In early July, the Puerto Rico Electric Power Authority's (PREPA) defaulted on its \$9 billion debt and also filed for bankruptcy under Title III of the PROMESA Act in early July.

In May, Moody's Investor Services and Fitch Ratings cut Connecticut's rating, to A1 (from Aa3) and A+ (from AA-) respectively, noting the state's limited ability to address its increasing budget gap. In June, Moody's and Standard & Poor's downgraded Illinois (to Baa3 from Baa2 and to BBBfrom BBB respectively) on the state's budget woes, while Fitch Ratings downgraded Massachusetts to AA (from AA+) on state's declining reserves and increasing debt levels.

Among the larger cities, Fitch upgraded Jersey City in April to AA- (from A-) while Moody's upgraded Los Angeles's rating in June to Aa2 (from Aa1).

According to the Nelson A. Rockefeller Institute of Government, while first quarter figures for state tax revenue for the first quarter of 2017 were strong (3.4 percent growth), preliminary figures for state tax revenue for the second quarter of 2016 appear to be far weaker than expected.³ April tax returns were extremely weak, with state income tax revenue down 4 percent from the prior year; 24 out of 41 states reported revenue falls, particularly among the New England and mid-Atlantic states. Although several states expected declines in tax revenue for April or May, revenue was weaker than expected, with a 6.4 percent median shortfall. The shortfall may multiple fronts: from taxpayers shifting taxable income into 2017 in anticipation of tax cuts or a weaker than expected economy.

GREEN BOND UPDATE, 1H 2017

Green bond issuance totaled \$3.91 billion in the second quarter of 2017, an increase of 133.4 percent in 1Q'17 from \$1.68 billion and an increase of 30.7 percent y-o-y from \$2.99 billion. For the first half of 2017, green bond issuance totaled \$5.59 billion, up 24.6 percent from the first half of 2016. Water, sewer and gas facilities and transportation continue to generally remain the largest sectors in the green bond sector, typically accounting for more than half of all issuance since 2014.

Issuers from 10 states issued green bonds in 2Q'17. Issuers from California and New York collectively issued 72.20 percent of the green bonds in 2Q'17, issuing \$1.69 billion and \$1.14 billion respectively. The top use of proceeds in California's green bond issuance was for water, sewer and gas facilities (\$635.51 million), health care (\$408.39 million), transportation (\$356.34 million), and pollution control (\$228.17 million). Top use of proceeds for New York green bonds totaled \$680.27 million for the transportation sector, followed by \$459 million for multifamily housing.

A Kansas issuer (Lawrence City) debuted as a green bond issuer for the first time in 2Q'17 with a \$11.38 million deal for electric and public power, making Kansas the 25th state to issue a green bond in the municipal market. Additionally, 8 issuers debuted green bonds for the first time in the second quarter: California Health Facilities Finance Authority (CA), San Francisco Bay Area Rapid Transit District (CA), California Pollution Control Finance Authority (CA), Denver City and County Board of Water Commission(CO), Fort Bend Independent School District (TX), King County (WA), Santa Clara County Fermont Union High School District (CA), and Long Beach City (CA).

For the first half of 2017, the biggest issuers were Metropolitan Transport Authority (NY) (\$1.32 billion, transportation), followed by NYC Housing Development Corporation (NY) (\$589.52 million, multifamily housing), and California Infrastructure & Economic Development Bank (\$450 million, water, sewer and gas).

⁵ Due to securities falling into more than one category within subcategories, state breakouts are not identical to other non-state-specific breakdowns, particularly related to coupon types (e.g., zeros are higher by dollar amount when broken out by state but would instead be assigned to the convertible or fixed rate categories when not broken out by state). This is a quirk of the SDC database.

⁸ As of the first quarter 2017, outstanding totals includes both short- and long-term municipal debt and now includes all refunded (inclusive of prerefunded) debt, but does not include municipal derivatives. Data prior to 1Q'17 excluded refunded debt from general totals. "Due in 13 months" looks at original maturity and will not include securities with short puts unless original maturity is within 13 months. Differences between this data and the Federal Reserve Flow of Funds are due to underlying database differences (Fed: Mergent; these tables: Bloomberg) as well as the growth of the municipal direct loan market. Fixed rate debt does not include those multimodal bonds that are currently in long-term fixed rate mode.

Addendum Tables –Rating and Industry⁹ \$ Millions

⁹ As of the first quarter 2017, outstanding totals includes both short- and long-term municipal debt and now includes all refunded (inclusive of prerefunded) debt, but does not include municipal derivatives. Data prior to 1Q'17 excluded refunded debt from general totals. Rating based on the lowest long-term rating assigned to the bond by Fitch Ratings, Moody's Investor Services, or Standard and Poor's; split-rated debt are therefore included in the HY category. Differences between this data and the Federal Reserve Flow of Funds are due to underlying database differences (Fed: Mergent; these tables: Bloomberg) as well as the growth of the municipal direct loan market. Fixed rate debt does not include those multimodal bonds that are currently in long-term fixed rate mode.
